**European Imperialism in the Nineteenth and Twentieth Centuries** Woodruff D. Smith, 1982 This is a small book on a very large subject It is written for the general reader and for students who want an overview of modern European imperialism and an indication of some of the major issues with which historians of imperialism are currently concerned Obviously such a book cannot go into detail on any aspect of the subject I have attempted wherever possible to use particular cases of imperialism to represent larger phenomena that occurred in many different places and at different times I have also included references to important works on the subjects discussed in each section of the book preference has been given to recently published studies and to those in English which are most likely to be available to the reader Although the book is not purely a narrative and is organized around a number of theses the presentation of the theses is necessarily abbreviated and the support for them incomplete They should be considered as means of structuring the material fuller exposition must await future publications

*The Economics of Empire* Maureen E. Ruprecht Fadem, Michael O'Sullivan, 2020-12-30 The Economics of Empire Genealogies of Capital and the Colonial Encounter

is a multidisciplinary intervention into postcolonial theory that constructs and theorizes a political economy of empire This comprehensive collection traces the financial genealogies associated with the colonial enterprise the strategies of economic precarity the pedigrees of capital and the narratives of exploitation that underlay and determined the course of modern history One of the first attempts to take this approach in postcolonial studies the book seeks to sketch the commensal relation a symbiotic phoresy between capitalism and colonialism reading them as linked structures that carried and sustained each other through and across the modern era The scholars represented here are all postcolonial critics working in a range of disciplines including Political Science Sociology History Peace and Conflict Studies Legal Studies and Literary Criticism exploring the connections between empire and capital and the historical and political implications of that structural hinge Each author engages existing postcolonial and poststructuralist theory and criticism while bridging it over to research and analytic lenses less frequently engaged by postcolonial critics In so doing they devise novel intersectional and interdisciplinary frameworks through which to produce more greatly nuanced understandings of imperialism capitalism and their inextricable relation new postcolonial critiques of empire for the twenty first century This book will be an excellent resource for students and researchers of Postcolonial Studies Literature History Sociology Economics Political Science and International Studies among others

*Empires* Michael W. Doyle, 1986 As a contribution to multicausal analysis of social change this is a major work And as a general introduction to European imperialism its theoretical sophistication broad sweep and the clear presentation and organization of historical detail leave it with few peers American Journal of Sociology

Although empires have shaped the political development of virtually all the states of the modern world imperialism has not figured largely in the mainstream of scholarly literature This book seeks to account for the imperial phenomenon and to establish its importance as a subject in the study of the theory of world politics Michael Doyle believes that empires can best be defined as relationships of effective political control imposed by some political societies those called metropolises on other political societies called peripheries To build an explanation of the birth life and death of empires he starts with an overview and critique of the leading theories of imperialism Supplementing theoretical analysis with historical description he considers episodes from the life cycles of empires from the classical and modern world concentrating on the nineteenth century scramble for Africa He describes in detail the slow entanglement of the peripheral societies on the Nile and the Niger with metropolitan power the survival of independent Ethiopia Bismarck's manipulation of imperial diplomacy for European ends the race for imperial possession in the 1880s and the rapid setting of the imperial sun Combining a sensitivity to historical detail with a judicious search for general patterns *Empires* will engage the attention of social scientists in many disciplines

**The Routledge Companion to European History Since 1763** Chris Cook, John Stevenson, 2005 The Routledge Companion to European History since 1763 is a compact and highly accessible work of reference with a fully comprehensive glossary a biographical section a thorough bibliography and informative maps

*Imperialism in the Modern World* William

Bowman, Frank Chiteji, J. Megan Greene, 2016-11-03 *Imperialism in the Modern World* combines narrative primary and secondary sources and visual documents to examine global relations in the nineteenth and twentieth centuries. The three co-editors, Professors Bowman Chiteji and Greene, have taught for many years global history classes in a variety of institutions. They wrote *Imperialism in the Modern World* to solve the problem of allowing teachers to combine primary and secondary texts easily and systematically to follow major themes in global history. Some readers use primary materials exclusively. Some focus on secondary arguments. This book is more focused than other readers on the markets for those teachers who are offering more specialized world history courses. One important trend in global history is away from simply trying to cover everything to teaching real connections in more chronologically and thematically focused courses. The reader also provides a genuine diversity of global perspectives and invites students to study seriously world history from a critical framework. Too many readers offer a smorgasbord approach to world history that leaves students dazed and confused. This reader avoids that approach and will therefore solve many problems that teachers have in constructing and teaching world history courses at the introductory or upper division levels. The reader will allow show students how to read historical documents through a hands on demonstration in the introduction. The book also incorporates images as visual documents. Finally, the book conceives of global history in the widest possible terms; it contains pieces on political, diplomatic, economic, and military history to be sure, but it also has selections on technology, medicine, women, the environment, social changes, and cultural patterns. Other readers can not match this text's breadth because they are chronologically and thematically so extended.

*The Economic Problems of Europe* Morgan Philips Price, 1928      *Decolonizing Methodologies* Linda Tuhiwai

Smith, 2016-03-15 A landmark in the process of decolonizing imperial Western knowledge, Walter D. Mignolo, Duke University. To the colonized, the term research is conflated with European colonialism; the ways in which academic research has been implicated in the throes of imperialism remains a painful memory. This essential volume explores intersections of imperialism and research, specifically the ways in which imperialism is embedded in disciplines of knowledge and tradition as regimes of truth. Concepts such as discovery and claiming are discussed, and an argument presented that the decolonization of research methods will help to reclaim control over indigenous ways of knowing and being. Now in its eagerly awaited second edition, this bestselling book has been substantially revised with new case studies and examples and important additions on new indigenous literature, the role of research in indigenous struggles for social justice, which brings this essential volume urgently up to date.
