ROBINSON AND BEYOND: JOAN ROBINSON AND MODERN ECONOMIC THEORY ,1989 *The Economics of Imperfect Competition* 2nd Joan Robinson,1969 The Economics of Imperfect Competition and Employment George R. Feiwel,1989

Reconstructing Keynesian Economics with Imperfect Competition Robin Laphorn Marris,1991-01-01 Professor Robin Marris who almost thirty years ago made pioneering contributions on the theory of managerial capitalism has now written a fascinating and highly unusual book on Keynesian macroeconomics Amitava Krishna Dutt Review of Social Economy the book provides many valuable insights for macroeconomists on both sides of the Atlantic Stephen McCafferty Journal of Economic Literature This path breaking book written by a leading economist is certain to create controversy and will lead to a fundamental reassessment of Keynesian economics Building on his previous work on modern capitalism Robin Marris has made an important theoretical advance which will have a major impact on the economics profession **Joan Robinson and Modern Economic Theory** George R. Feiwel,1989-02-01 The Macroeconomics of Imperfect Competition and Nonclearing Markets Jean-Pascal Benassy,2005-01-14 In this book Jean Pascal Benassy attempts to integrate into a single unified framework dynamic macroeconomic models reflecting such diverse lines of thought as general equilibrium theory imperfect competition Keynesian theory and rational expectations He begins with a simple microeconomic synthesis of imperfect competition and nonclearing markets in general equilibrium under rational expectations He then applies this framework to a large number of dynamic macroeconomic models covering such topics as persistent unemployment endogenous growth and optimal fiscal monetary policies The macroeconomic methodology he uses is similar in spirit to that of the popular real business cycles theory but the scope is much wider All of the models are solved by hand making the underlying economic mechanisms particularly clear *The Economics of Joan Robinson* Maria Cristina Marcuzzo,Luigi Pasinetti,Alesandro Roncaglia,2005-08-12 Joan Robinson is widely regarded as the greatest female economist Her published work spanned six decades and is analysed here by a distinguished international team of scholars **The Theory of Imperfect Competition** Donald Dewey,1969 **Mrs. Robinson's Economics of Imperfect Competition** Nicholas Kaldor,1934 **Monopsony in Motion** Alan Manning,2005-01-30 What happens if an employer cuts wages by one cent Much of labor economics is built on the assumption that all the workers will quit immediately Here Alan Manning mounts a systematic challenge to the standard model of perfect competition Monopsony in Motion stands apart by analyzing labor markets from the real world perspective that employers have significant market or monopsony power over their workers Arguing that this power derives from frictions in the labor market that make it time consuming and costly for workers to change jobs Manning re examines much of labor economics based on this alternative and equally plausible assumption The book addresses the theoretical implications of monopsony and presents a wealth of empirical evidence Our understanding of the distribution of wages unemployment and human capital can all be improved by recognizing that employers have some monopsony power over their workers Also considered are policy issues including the minimum wage equal pay legislation

and caps on working hours In a monopsonistic labor market concludes Manning the free market can no longer be sustained as an ideal and labor economists need to be more open minded in their evaluation of labor market policies Monopsony in Motion will represent for some a new fundamental text in the advanced study of labor economics and for others an invaluable alternative perspective that henceforth must be taken into account in any serious consideration of the subject
