Abstract

With considerable international attention, the 1990s have been called the "decade of the indigenous movement." In the past, the indigenous movement is viewed to be strictly the right of the Indian and Mestizo that have received advantage from colonialism. However, it is widely acknowledged that the indigenous movement represents all of the people who have been oppressed, that is, people who have been excluded from society and the economy. "We are all together with a single purpose: to end racism and hunger and to achieve a country of justice," said a woman leader who is in charge of the indigenous movement in Bolivia. It is clear that the indigenous movement also has a broad right challenge to economic conditions and problems of ethnic and social groups. And in the recent years, the indigenous groups in Latin America, for example, have been able to gain an active role in the government and politics. In Bolivia, the indigenous groups influence the state through the political party, joined through all of the regions. The indigenous groups that fought a revolutionary war gained access to the governmental system of the country in 1985.

Self-Management is about control's being within the individual. The practitioners believe that, through the involvement of the individual and giving a self-determined choice between responses, the individual can develop a self-determined control response that allows him to handle his life. Practitioners use the self-control program as a strategy for helping the individual learn to use self-control. The program involves the responsibility of practitioners and others now using the notion of the involvement of helping practices to help the individual learn to use self-control to be changed to the appropriate self-management. However, some people believe that self-control is a complex and difficult task that requires proper supervision and evaluation and assessment techniques (Lewin, 1990).

It is worth noting that the implementation of the 1995 amendments to the 1976 Copyright Act, which gave the Copyright Clearance Center (CCC) the right to administer the Copyright Clearance Center (CCC) system, was a significant step in the development of the CCC system. The CCC system was established in 1997, and it has since become the primary mechanism for the collection and distribution of royalties for the use of copyrighted material. The CCC system has been successful in increasing the revenue of the CCC system, and it has also been successful in increasing the revenue of the CCC system. The CCC system has been successful in increasing the revenue of the CCC system, and it has also been successful in increasing the revenue of the CCC system.
