**The Effects of Social Security on Income and the Capital Stock** Michael R. Darby, 1979 Monograph on effects of social security on aggregate savings income ratio in the USA uses an economic model to estimate relationships between capital stock labour supply and social security etc and finds that a regression run for 1947 1974 shows no effect of social security on saving Bibliography pp 85 to 88 graphs references and statistical tables      **The Impact of Social Security on Private Saving** Robert J. Barro, Martin S. Feldstein, 1978 Report on the impact of social security on private sector savings in the USA presents the controversial points of view of r j barro and m feldstein concerning capital formation taking into consideration consumer expenditure in the period from 1929 to 1974 and includes estimates on the reduction of personal savings due to social security wealth References and statistical tables      *The Effect of Pension Wealth on the Age of Retirement* Stephen I. Kutner, 1984      **Economic Effects of Social Security** Henry J. Aaron, 2010-12-01 The social security system affects people throughout most of their lives at work and in retirement The supposed effects of social security on saving labor supply and the distribution of income figure prominently in current debates about whether and how to change the system Theorists have developed alternative analytical frameworks for studying social security but all involve extreme assumptions introduced for the sake of analytical tractability Each study seems to describe the behavior of some but not all or even most people The shortcomings of available data have created additional roadblocks As a result the effects of social security on saving and labor supply are difficult to measure and how such a complex system influences behavior is not at all well understood Yet decisions on social security cannot be avoided If analysts cannot agree policymakers are likely to increase the weight they attach to perceptions of equity adequacy of benefits fairness of taxes and similar qualitative considerations Hence it is desirable for lay observers to understand the framework that analysts use and the reasons why there is so much uncertainty This book sheds light on social security issues by examining evidence from economic studies about how the system affects saving labor supply and income distribution It shows that these studies provide little evidence to support or refute assertions that social security has reduced saving but they do indicate that it has contributed to the trend toward early retirement The author finds that the aged are now about as well off on the average as the general population and that social security has played a considerable role in bringing about this equality This volume is the sixteenth in the second series of Brookings Studies of Government Finance      *The Outlook for Social Security* Noah Meyerson, Amy Rehder Harris, Josh O'Harra, 2004 NOTE NO FURTHER DISCOUNT FOR THIS PRINT PRODUCT OVERSTOCK SALE Significantly reduced list price while supplies last Presents 100 year projections for Social Security under current law Focuses on the resource demands of the Social Security system the program's finances and projections of the benefits received by individuals in different age and income groups Related products Federal Benefits Entitlement Programs is available here <https://bookstore.gpo.gov/catalog/health/benefits/federal-benefits-entitlement-programs>      **Special Study on**

*Social Security Programs and Retirement around the World* Axel Börsch-Supan, Courtney C. Coile, 2025-03-04 A global analysis of the effects of social security reforms on the retirement incentives and labor force trends of older workers Employment among older men and women has increased dramatically in recent years reversing a downward trend in the closing decades of the twentieth century Social Security Programs and Retirement around the World examines how changing retirement incentives have reshaped labor force participation trends among older workers The chapters feature country specific analyses for Belgium Canada Denmark France Germany Italy Japan Netherlands Spain Sweden the United Kingdom and the United States They find that while there is significant heterogeneity across countries the reforms of recent decades have generally reduced the implicit tax on work at older ages These changes correlate positively with labor force participation The studies exploit the variation in the timing and extent of reforms of retirement incentives and employ microeconomic methods to investigate whether this correlation reflects a causal relationship Policy changes appear to have contributed to rising labor force activity but other factors like the role of women in the labor force improved health and changes in private pensions likely also play important roles

Advisory Council on Social Security (1994-1996),1997      **The Debate Over Stabilization Policy** Franco Modigliani,1986-09-18 This 1986 book examines some of the main issues that have characterized macroeconomics the debate between monetarists and Keynesians the response to demand shocks and supply shocks by which the monetary authorities control aggregate nominal income and the use and relevance of the money supply as a target and the consumption function and the determinants of wealth It shows that Keynesian stabilization policies succeeded in reducing instability due to demand shocks dramatically but that no aggregate demand policy can stabilize both price and employment simultaneously after a supply shock However by assigning an overall social cost to excess unemployment and initially unexpected inflation an optimism path can be derived In looking at the consumption function and determinants of wealth the empirical evidence is shown to be most consistent with the life cycle hypothesis A concluding section is devoted to the impact on private and national society of the social security revolution      *Final Report, the 1981 White House Conference on Aging: A national policy on aging* ,1981 Conference report final report on ageing with recommendations on social policy in the USA examines economic implications and social implications of changing age structure issues relating to living conditions training employment opportunities social security and social services for older people the role of government private sector nonprofit organizations families and individuals social research needs public opinion attitudes etc Photographs and references List of participants Conference held in Washington 1981 Nov 30 to Dec
