Ashwood, 2015-07-01 This is not only the best environmental sociology text I've used but it is the best text of any type I've used in college level teaching Dr Cliff Brown University of New Hampshire Join author Mike Bell and new co author Loka Ashwood as they explore the biggest community of all and bring out the sociology of environmental possibility The highly anticipated Fifth Edition of **An Invitation to Environmental Sociology** delves into this rapidly changing and growing field in a clear and artful manner Written in a lively engaging style this book explores the broad range of topics in environmental sociology with a personal passion rarely seen in sociology books The Fifth Edition contains new chapters entitled Money and Markets Technology and Science and Living in An Ecological Society In addition this edition brings in fresh material on extraction between core and periphery countries the industrialization of agriculture the hazards of fossil fuel production environmental security and making environmentalism normal      *Our Grandchildren Redesigned* Michael Bess, 2016-09-06 A panoramic overview of biotechnologies that can endlessly boost human capabilities and the drastic changes these superhuman traits could trigger Biotechnology is moving fast In the coming decades advanced pharmaceuticals bioelectronics and genetic interventions will be used not only to heal the sick but to boost

human physical and mental performance to unprecedented levels People will have access to pills that make them stronger and faster informatic devices will interface seamlessly with the human brain and epigenetic modification may allow people to reshape their own physical and mental identities at will Until recently such major technological watersheds like the development of metal tools or the industrialization of manufacturing came about incrementally over centuries or longer People and social systems had time to adapt they gradually developed new values norms and habits to accommodate the transformed material conditions But contemporary society is dangerously unprepared for the dramatic changes it is about to experience down this road on which it is already advancing at an accelerating pace The results will no doubt be mixed People will live longer healthier lives will fine tune their own thought processes and will generate staggeringly complex and subtle forms of knowledge and insight But these technologies also threaten to widen the rift between rich and poor to generate new forms of social and economic division and to force people to engage in constant cycles of upgrades and boosts merely to keep up Individuals who boost their traits beyond a certain threshold may acquire such extreme capabilities that they will no longer be recognized as unambiguously human In this important and timely book prize winning historian Michael Bess provides a clear nontechnical overview of cutting edge biotechnology and paints a vivid portrait of a near future society in which bioenhancement has become a part of everyday life He surveys the ethical questions raised by the enhancement enterprise and explores the space for human agency in dealing with the challenges that these technologies will present Headed your way over the coming decades new biotechnologies that can powerfully alter your body and mind The possibilities are tantalizing Rejuvenation therapies offering much longer lives 160 and even beyond in full vigor and mental acuity Cognitive enhancement through chemical or bioelectronic means the rough equivalent of doubling or tripling IQ scores Epigenetic tools for altering some of your genetically influenced traits at any point in your lifetime body shape athletic ability intelligence personality Bioelectronic devices for modulating your own brain processes including your pleasure centers a potentially non stop high Direct control of machines by thought and perhaps direct communication with other people brain to brain a new dimension of sharing and intimacy But some of the potential consequences are also alarming A growing rift between the biologically enhanced and those who can t afford such modifications A constant cycle of upgrades and boosts as the bar of normal rises ever higher Humans 95 Humans XP Humans 8 The fragmentation of humankind into rival bioenhancement clusters A gradually blurring boundary between person and product Extreme forms of self modification with some individuals no longer recognized as unambiguously human

**The Five-Ton Life** Susan Subak, 2018-08-01 At nearly twenty tons per person American carbon dioxide emissions are among the highest in the world Not every American fits this statistic however Across the country there are urban neighborhoods suburbs rural areas and commercial institutions that have drastically lower carbon footprints These exceptional places as it turns out are neither poor nor technologically advanced Their low emissions are due to culture In *The Five Ton Life* Susan Subak uses previously untapped sources to

discover and explore various low carbon locations In Washington DC Chicago suburbs lower Manhattan and Amish settlements in Lancaster County Pennsylvania she examines the built and social environment to discern the characteristics that contribute to lower greenhouse gas emissions The most decisive factors that decrease energy use are a commitment to small interiors and social cohesion although each example exhibits its own dynamics and offers its own lessons for the rest of the country Bringing a fresh approach to the quandary of American household consumption Subak s groundbreaking research provides many pathways toward a future that is inspiring and rooted in America s own traditions

has become a nationwide trend in response to changing demographics and the real estate crisis The book primarily utilizes comparative case studies within both inner city and suburban areas While a growing number of articles have been written on both suburban and inner city new urbanist communities few books have connected new urbanism to its roots in historical preservation communities This book distinguishes itself from other works by assessing the commonalities between greenfield suburban new urbanist development and inner city redevelopment projects      **Suburban Nation** Andres Duany, Elizabeth Plater-Zyberk, Jeff Speck, 2000 Duany and Elizabeth Plater Zyberk are at the forefront of the New Urbanism movement and in *Suburban Nation* they assess sprawl's costs to society be they ecological economic aesthetic or social 115 illustrations

**Car Country** Christopher W. Wells, 2013-05-15 For most people in the United States going almost anywhere begins with reaching for the car keys This is true Christopher Wells argues because the United States is Car Country a nation dominated by landscapes that are difficult inconvenient and often unsafe to navigate by those who are not sitting behind the wheel of a car The prevalence of car dependent landscapes seems perfectly natural to us today but it is in fact a relatively new historical development In *Car Country* Wells rejects the idea that the nation's automotive status quo can be explained as a simple byproduct of an ardent love affair with the automobile Instead he takes readers on a tour of the evolving American landscape charting the ways that transportation policies and land use practices have combined to reshape nearly every element of the built environment around the easy movement of automobiles Wells untangles the complicated relationships between automobiles and the environment allowing readers to see the everyday world in a completely new way The result is a history that is essential for understanding American transportation and land use issues today Watch the book trailer <http://www.youtube.com/watch?v=48LTKOxxrXQ>      **Make Way for the Superhumans** Michael Bess, 2016-07-07 Biomedical research is changing the both the format and the functions of human beings Very soon the human race will be faced with a choice do we join in with the enhancement or not *Make Way for the Superhumans* looks at how far this technology has come and what aims and ambitions it has From robotic implants that restore sight to the blind to performance enhancing drugs that build muscles improve concentration and maintain erections bio enhancement has already made massive advances Humans have already developed the technology to transmit thoughts and actions brain to brain using only a computer interface By the time our grandchildren are born they will be presented with the option to significantly alter and redesign their bodies *Make Way for the Superhumans* is the only book that poses the questions that need answering now suggesting real practical ways of dealing with this technology before it reaches a point where it can no longer be controlled      **America Town** Mark L. Gillem, 2004 Covers the land development and architectural policies and practices that the US military follows worldwide in planning building and expanding installations of untold extent in 140 countries      *Beyond Cutting Edge?* Paul C. Heidebrecht, 2014-03-10 A quick scan of any newsstand is enough to confirm the widespread preoccupation with technological change As a myriad of articles and advertisements demonstrate not only are we preoccupied with technology

but we are bombarded with numerous reminders that the cutting edge is in constant motion Most often the underlying assumption of Christians is that we have no choice but to find ways to cope with the latest and greatest Indeed it is often assumed that the church has no choice but to find ways to cope with its new technological context This book does not make the same assumptions Building on the work of Mennonite theologian John Howard Yoder it argues that the practices of the church make it possible for Christians to conscientiously engage technology This happens when we recognize that marks of the church such as patience vulnerability and servanthood can put technological ideals such as speed control and efficiency in their proper place In the course of grappling with three examples of morally formative technologies automobiles genetically modified food and the Internet this book goes beyond Yoder s thought by emphasizing that the church also plays a crucial role in our moral formation **Handbook of Regional and Urban Economics** V.
