The Struggle for Power in Colonial America, 1607-1776 William R. Nester, 2017-10-11 America's colonial era began and ended dramatically with the founding of the first enduring settlement at Jamestown on May 14 1607 and the Declaration of Independence in Philadelphia on July 4 1776 During those 169 years conflicts were endemic and often overlapping among the colonists between the colonists and the original inhabitants between the colonists and other imperial European peoples and between the colonists and the mother country As conflicts were endemic so too were struggles for power This study reveals the reasons for stages and results of these conflicts The dynamic driving this history are two inseparable transformations as English subjects morphed into American citizens and the core American cultural values morphed from communitarianism and theocracy into individualism and humanism These developments in turn were shaped by the changing ways that the colonists governed made money waged war worshipped thought wrote and loved Extraordinary individuals led that metamorphosis explorers like John Smith and Daniel Boone visionaries like John Winthrop and Thomas Jefferson entrepreneurs like William Phips and John Hancock dissidents like Rogers Williams and Anne Hutchinson warriors like Miles Standish and Benjamin Church free spirits like Thomas Morton and William Byrd and creative writers like Anne Bradstreet and Robert Rogers Then there was that quintessential man of America's Enlightenment Benjamin Franklin And finally George Washington who more than anyone was responsible for winning American independence when and how it happened

Williamson, 2006 Shaping the Stuart World examines the wide ranging European interaction inherent in British expansion and discovers a multi dimensional multi national Atlantic as a result Spain Sweden and especially the Netherlands emerge as central to English and Scottish endeavors overseas and to the extremely diverse populations and cultures that eventually came to be known as British North America

Imbarrato Carol Berkin Brett Barney Lisa Paddock Matthew J Bruccoli George Parker Anderson Judith S **Encyclopedia of the Atlantic World, 1400-1900** David Head, 2017-11-16 A first of its kind reference resource traces the interactions among four Atlantic facing continents Europe Africa and the Americas including the Caribbean between 1400 and 1900 Until recently the age of exploration and empire building was researched and taught within imperial and national boundaries The histories of Europe Africa North America and South America were told largely as independent stories with the development of individual places within each continent further separated from each other The indigenous populations of places colonized by Europeans fit into the history even more uneasily often mentioned only in passing Encyclopedia of the Atlantic World 1400 1900 synthesizes a generation of historical scholarship on the events on four continents providing readers an invaluable introduction to the major people places events movements objects concepts and commodities of the Atlantic world as it developed during a key period in history when the world first started to shrink The entries discuss specific topics with an eye toward showing how individual items people and events were connected to the larger Atlantic world This accessibly written reference book brings together topics usually treated separately and discretely alleviating the need for extra legwork when researching and it draws from the latest research to make a vast body of scholarship about seemingly far flung places available to readers new to the field **Dictionary of Modern Political Ideologies** Michael A. Riff, 1987 **Thomas Jefferson** R. B. Bernstein, 2003-09-04 In this definitive short biography Bernstein deftly synthesizes the massive scholarship on his subject into an insightful evenhanded account illuminating Jefferson s central place in the American Enlightenment Book jacket *Lustful Maidens and Ascetic Kings* Roy C. Amore, Larry D. Shinn, 1981-03-26 Includes stories about family and social roles and lay and monastic values *American Dark Age* Keidrick Roy, 2024-09-24 American Dark Age contends that life in early and antebellum America for Black people resembles what Keidrick Roy calls racial feudalism a race based system of social stratification in the U S that operates as an extension of medieval ideas and customs Accordingly this project does not read Thomas Jefferson and his Declaration of Independence against the backdrop of the European and American Enlightenment traditions as virtually all modern scholars have done Instead it seeks to understand Jefferson as a product of the same feudal frameworks he claimed to supersede Jefferson s attachment to feudalism is most evident in his approbation of two new aristocracies during the Age of Enlightenment 1 the aristocracy of the mind which he calls a natural aristocracy and 2 the aristocracy of the skin what abolitionist Frederick Douglass later dubs with emphasis skin aristocracy After tracing the lineaments of racial feudalism Roy shows how four African Americans James McCune Smith William Wells Brown Francis Harper and Harriet Jacobs present distinctive but interconnected visions for overcoming its effects in the mid nineteenth century by upending the antecedent feudal architecture of American liberalism a broad tradition whose unifying strands otherwise emphasize individual liberties egalitarianism moral universalism and meliorism the belief in the possibility for social and political progress Ultimately Roy argues McCune Smith Wells Brown Harper and Jacobs maintained a spirit of

cautious optimism against the retrogressive forces of plantation slavery in the South and what McCune Smith calls caste slavery in the North Their quest to destroy racial feudalism and reformulate American liberalism established the conditions for initiating new ways of being American

Nation Builder Charles N. Edel, 2014-10-06 America's rise from revolutionary colonies to a world power is often treated as inevitable But Charles N Edel's provocative biography of John Q Adams argues that he served as the central architect of a grand strategy whose ideas and policies made him a critical link between the founding generation and the Civil War era nation of Lincoln

Lincoln Allen Jayne,2010-05 In this compelling study of the moral principles that most influenced the thinking of Abraham Lincoln historian Allen Jayne argues persuasively that Lincoln regarded the Declaration of Independence above all other documents as the most important embodiment of American principles This American manifesto as Jayne calls it with its eloquent expression of the ideals of individual liberty and government created to protect and preserve that liberty was the script that Lincoln followed in his struggle to preserve the Union and extend individual liberties to African Americans Moreover Jayne demonstrates that Lincoln s philosophy was rooted not in a Bible based evangelical Christian perspective but in the European Enlightenment and deism which so profoundly influenced the thinking of Thomas Jefferson and other Founding Fathers Jayne begins with a chapter devoted to the influence of deism on Jefferson s formulation of the Declaration of Independence Next he discusses Lincoln s adoption of the deistic perspective and the crucial role that the Declaration played in his thoughts and actions He also considers Lincoln s moral sense based on deism s tolerance of different belief systems and universal moral idealism Finally he describes Lincoln s role as chief advocate for the Declaration s principles and how the Gettysburg Address and his Second Inaugural Address reflect this underlying philosophy This insightful look into the thinking of one of our nation s greatest presidents during a time of crisis is highly relevant in today s climate of religious extremism and debates over the balance between individual liberty and national security **My Daily**

The Conundrum of Class Martin J. Burke, 1995-09 Martin Burke traces the surprisingly complicated history of the idea of class in America from the forming of a new nation to the heart of the Gilded Age Surveying American political social and intellectual life from the late 17th to the end of the 19th century Burke examines in detail the contested discourse about equality the way Americans thought and wrote about class class relations and their meaning in society Burke explores a remarkable range of thought to establish the boundaries of class and the language used to describe it in the works of leading political figures social reformers and moral philosophers He traces a shift from class as a legal category of ranks and orders to socio economic divisions based on occupations and income Throughout the century he finds no permanent consensus about the meaning of class in America and instead describes a culture of conflicting ideas and opinions **National**

Identity and the Agrarian Republic Manuela Albertone, 2016-04-22 With a few exceptions historiography has paid little attention to the impact of French economic thought during the American Revolution focusing instead on the Revolution's links with Britain This book outlines how from the mid eighteenth to the early nineteenth century the political and social dimension of French economic thought and particularly of Physiocracy spurred American Republicans to a radical shaping of American agrarian ideology Such a perspective allows for a reconsideration of several questions that lie at the heart of contemporary historiographic debate the connection between politics and economics the meaning of republicanism the foundations of representation the role of Europe in the Atlantic world and the interaction between national histories and global context In particular the research methodology adopted here makes it possible to reconstruct how American national identity conceived as an expression of society in economic terms emerged through a cosmopolitan way of thinking focused on the uniqueness of the new state
