

The background is a dark, abstract digital space. It features several bright, glowing lines of binary code (0s and 1s) that appear to be streaming or falling from the top left towards the center. A brilliant, multi-colored light burst, with hues of white, yellow, orange, and red, emanates from the center, creating a sense of energy and convergence. The overall aesthetic is futuristic and high-tech.

The Enchantments Of Technology:

The Enchantments of Technology Lee Bailey,2010-10-01 In *The Enchantments of Technology* Lee Worth Bailey erases the conventional distinction between myth and machine in order to explore the passionate foundations concealed in technological culture and address its complex ethical moral and social implications Bailey argues that technological society does not simply disenchant the world with its reductive methods and mechanical metaphors then shape machines with political motives but is also borne by a deeper subversive undertow of enchantment Addressing examples to explore the complexities of these enchantments his thought is full of illuminating examinations of seductively engaging technologies ranging from the old camera obscura to new automobiles robots airplanes and spaceships This volume builds on the work of numerous scholars including Jacques Ellul and Jean Brun on the phenomenological and spiritual aspects of technology Carl Jung on the archetypal collective unconscious approach to myth and Martin Heidegger on Being itself Bailey creates a dynamic interdisciplinary postmodern examination of how our machines and their environments embody not only reason but also desires

The Enchantments of Mammon Eugene McCarraher,2019-11-12 Eugene McCarraher challenges the conventional view of capitalism as a force for disenchantment From Puritan and evangelical valorizations of profit to the heavenly Fordist city the mystically animated corporation and the deification of the market capitalism has hijacked our intrinsic longing for divinity laying hold to our souls

Artificial Intelligence in Architecture Matias del Campo,2024-05-13 Artificial intelligence AI applications in architectural design have achieved a critical mass and exploded into the mainstream of architectural imaginations From practical applications in design and

construction to the implications for architectural theory to a plethora of novel tools for accelerated morphological studies what has become clear is that the discipline is passing a threshold that fundamentally changes architecture as a whole However the most radical change is the interrogation and novel discussion of authorship and agency in design ecologies driven by synthetic imaginations What does it mean for authorship when more than 50 per cent of the content is generated by a nonhuman player This issue seems more pressing than ever In a world that is being transformed by AI on a daily basis what is the role of the sole genius and designers artists and architects This AD dives deep into current discussions about the human position in architectural design which is increasingly entangled in an AI driven design context Contributors Cesare Battelli Phil Bernstein Mario Carpo Benjamin Ennemoser and Ingrid Mayrhofer Hufnagl Sarah Fox Wanyu He Andrew Kudless Ryan Vincent Manning Sandra Manninger Kyle Steinfeld Andrew Witt and Michael Young *The Business of Speed* David N. and the supernatural **Magical Realism and the History of the Emotions in Latin America** Jerónimo Arellano, 2015-05-21 Iconoclastic in spirit *Magical Realism and the History of the Emotions in Latin America* is the first study of affect and emotion in magical realist literature Against the grain of a vast body of scholarship it argues that magical realism is neither exotic commodity nor postcolonial resistance but an art form fueled by a search for spaces of wonder in a disenchanted world Linking the rise and fall of magical realism and kindred narrative forms to the shifting value of wonder as an emotional experience this thought provoking study proposes a radical new approach to canonical novels such as *One Hundred Years of Solitude* Received as one of the most convincing manifestations of the turn to affect in contemporary Latin American critical thought *Magical Realism and the History of the Emotions* draws on affect theory the history of emotions and new materialism to reframe key questions in Latin American literature and culture *Temples of Modernity* Robert M. Geraci, 2018-08-15 *Temples of Modernity* uses ethnographic data to investigate the presence of religious ideas and practices in Indian science and engineering Geraci shows 1 how the integration of religion science and technology undergirds pre and post independence Indian nationalism 2 that traditional icons and rituals remain relevant in elite scientific communities and 3 that transhumanist ideas now percolate within Indian visions of science and technology This work identifies the intersection of religion science and technology as a worldwide phenomenon and suggests that the study of such interactions should be enriched through attention to the real experiences of people across the globe *Eighteenth-century Fiction and the Reinvention of Wonder* Sarah Tindal Kareem, 2014 A footprint materializes mysteriously on a deserted shore a giant helmet falls from the sky a traveler awakens to find his horse dangling from a church steeple Eighteenth century British fiction brims with moments such as these in which the prosaic rubs up against the marvelous While it is a truism that the period's literature is distinguished by its realism and air of probability *Eighteenth Century Fiction and the Reinvention of Wonder* argues that wonder is integral to rather than antithetical to the developing techniques of novelistic fiction Positioning its reader on the cusp between recognition and estrangement between faith and doubt modern fiction hinges upon wonder *Eighteenth Century Fiction and the Reinvention of Wonder*'s chapters unfold its new account of British fiction's rise through surprising new readings of classic early novels from Daniel Defoe's *Robinson Crusoe* to Jane Austen's *Northanger Abbey* as well as bringing to attention lesser known works most notably Rudolf Raspe's *Baron Munchausen's Narrative of His Marvellous Travels* In this bold new account the eighteenth century bears witness not to the world's disenchantment but rather to wonder's relocation from the supernatural realm to the empirical world providing a reevaluation not only of how we look back at the Enlightenment but also of how we read today **Lockdown Therapy** Stefano Carpani, Monica Luci, 2022-10-17 Nominated as an IAJS Book Award Finalist 2023 This fascinating volume explores from the perspective both of analysts and their patients how the COVID 19 pandemic quickly and unexpectedly created profound and lasting changes in the ways psychoanalysis is conducted and what those changes mean for analysis moving forward The first

part of the book is made up of interviews conducted by Stefano Carpani with authoritative authors in analytical psychology during the earliest phase of lockdown centered on themes of the pandemic lockdown and how each individual was coping with the challenges those circumstances brought on The second part features personal essays that further details the subjective experiences of Jungian analysts and therapists worldwide comprising a collection of reflections on how COVID 19 affected and changed the way analysts work with patients These reflections focus on the theoretical clinical technical and also practical points of view including clinical materials on transference and counter transference considerations The third part of the book is specular to the second and offers reflections from patients perspective on how the pandemic changed their therapies and lockdown affected their experience of therapy Patients have provided anonymous testimonies through their writing of how they experienced of the change of setting mindset and related implications A comprehensive overview of an important and ongoing conversation Lockdown Therapy is crucial reading for Jungian analysts and scholars as well as other clinicians training in analysis psychotherapy and counselling

Future Interaction Design A. Pirhonen, 2005-01-04
The perspectives and techniques used in human computer interaction design practice and research are broadening This book looks at emerging approaches which are likely to contribute to the discipline in near future The emphasis is on the social cognitive emotional creative and active dimensions of the human actor The underlying idea is that human character rather than technology should determine the nature of interaction The concept of interaction design covers this broader range of concerns relevant to enabling quality design Each chapter emphasizes alternative perspectives on interaction and new concepts to help researchers and practitioners relate to alternative design approaches and opportunities Many of these new elements can be found to be successful and established in other fields such as information systems development and industrial design This volume will be of considerable value to those seeking innovative and developing perspectives upon both designing and ensuring effective interaction between humans and technology

Tantalisingly Close Imar Vries, 2025-10-01 While studies of mobile wireless communication devices usually focus on their social implications De Vries proposes to venture into a more historical and comparative direction to shed light on our preoccupation with them in the first place He constructs an archaeological view of the development of communication technologies over the past 200 years providing a comprehensive account of how persistent hopes and beliefs have come to give mobile wireless media such a prominent position today Our expectations and uses of them are surprisingly similar to those of older media consequently they reconfirm the idea that living in an anyone anything anytime anywhere world is both a blessing and a curse and that the desire for sublime communication is a tragic yet highly powerful regulative principle in our media evolution

Tantalisingly Close Imar de Vries, 2012 A number of recent studies of mobile wireless communication devices focus on use values social implications changing norms and ethics conversation strategies and culture dependent domestication De Vries proposes to venture into a more historical and comparative direction to shed light on our preoccupation with them in

the first place He constructs an expanded archaeological view of the development marketing and reception of communication technologies over the past 200 years providing a comprehensive account of how persistent paradoxical desires for sublime communication have come to gi

Escaping Japan Blai Guarné,Paul Hansen,2017-10-12 The idea that Japan is a socially homogenous uniform society has been increasingly challenged in recent years This book takes the resulting view further by highlighting how Japan far from singular or monolithic is socially and culturally complex It engages with particular life situations exploring the extent to which personal experiences and lifestyle choices influence this contemporary multifaceted nation state Adopting a theoretically engaged ethnographic approach and considering a range of escapes both physical and metaphorical this book provides a rich picture of the fusions and fissures that comprise Japan and Japaneseness today
