Betts, 1985 Uncertain Dimensions was first published in 1985 Minnesota Archive Editions uses digital technology to make long unavailable books once again accessible and are published unaltered from the original University of Minnesota Press editions World War I battered the Western imperial systems and destroyed one that of Germany but it did not sound the death knell of an empire The scramble for overseas territory has reached a virtual conclusion shortly before the war afterwards the main business of empire was to ensure a pax colonia the often contradictory goals of a stable government and Sovereignty Stephen D. Krasner, 1999-08-02 The acceptance of human rights and minority rights the increasing role of international financial institutions and globalization have led many observers to question the continued viability of the sovereign state Here a leading expert challenges this conclusion Stephen Krasner contends that states have never been as sovereign as some have supposed Throughout history rulers have been motivated by a desire to stay in power not by some abstract adherence to international principles Organized hypocrisy the presence of longstanding norms that are frequently violated has been an enduring attribute of international relations Political leaders have usually but not always honored international legal sovereignty the principle that international recognition should be accorded only to juridically independent sovereign states while treating Westphalian sovereignty the principle that states have the right to exclude external authority from their own territory in a much more provisional way In some instances violations of the principles of sovereignty have been coercive as in the imposition of minority rights on newly created states after the First World War or the successor states of Yugoslavia after 1990 at other times cooperative as in the European Human Rights regime or conditionality agreements with the International Monetary Fund The author looks at various issues areas to make his argument minority rights human rights sovereign lending and state creation in the nineteenth and twentieth centuries Differences in national power and interests he concludes not international norms continue to be the most powerful explanation for the behavior of states **Nigerian Chiefs** Olufemi Vaughan, 2006 An analysis of how traditional power structures in Nigeria have survived the forces of colonialism and the modernization processes of postcolonial regimes This book analyzes how indigenous political power structures in Nigeria survived both the constricting forces of colonialism and the modernization programs of postcolonial regimes With twenty detailed case studies on colonial and postcolonial Nigerian history the complex interactions between chieftaincy structures and the rapidly shifting sociopolitical and economic conditions of the twentieth century become evident Drawing on the interactions between the state and chieftaincy this study goes beyond earlier Africanist scholarship that attributes the resilience of these indigenous

structures to their enduring normative and utilitarian qualities Linked to externally derived forces and legitimated by neotraditional themes chieftaincy structures were distorted by the indirect rule system transformed by competing communal claims and legitimated a dominant ethno regional power configuration Olufemi Vaughan is Professor in the Department of Africana Studies and the Department of History State University of New York at Stony Brook Winner of the 2001 Cecil B Currey Book length Award from the Association of Third World Studies *Plural International Relations in a Divided World* Stephen Chan, 2017-02-27 The world is troubled and full of misunderstandings It seems a new world order of fundamentalist violence and meaningless atrocity is upon us whilst civilised instruments for cooperation and compromise are becoming increasingly ineffective In this timely book Stephen Chan explores the historical and philosophical roots of difference and discord in the international system He begins with the introduction of the Westphalian system showing how throughout the 20th century new states from the Middle East Asia and Africa entered that system with reservations preconditions and great efforts to introduce new forms of concerts and congresses but without seriously challenging the international status quo By contrast the 21st century has brought turmoil and change in the form of militant Islam be it the Taleban Al Qaeda or ISIS whose varied roots and fluid emergence have so far prevented the West from being able to understand and combat it Developing Kissinger's suspicion of Saudi Arabia as an Islamic state in Westphalian dress Chan argues that what is at stake today is not the development of a new Caliphate or an old radicalism but the effort to supplant and replace the Westphalian system itself This is the complex and challenging reality to which a truly modern and persuasively relevant plural international relations must now adapt Whether it can do so remains to be seen
