assumption underlining this unusual directory is that a community of the book does exist and that it can be mobilized to keep books and reading central in the life of Democratic societies The listings provide a richly detailed account of 89 major resource centers providing names of directors addresses telephone numbers and founding dates In addition each listing discusses the purposes of the organization examples of its activities publications sponsored and sources of fiscal support In short the volume is intended to serve as a national catalyst for stimulating public interest in books in particular and reading in general Cole provides a pellucid opening essay on the subject Is There a Community of the Book What is surprising is not his clear affirmative answer so much as the closely argued historical and analytical study of how this community has been deepened through the conscious activities of The Library of Congress The work concludes with a brief but valuable guide to other resources ranging from publishing broadcasting bookselling libraries and book collecting and culture
