Perspectives, Issues and Alternatives Manish K. Verma, 2021-03-18 This book provides a comprehensive account of asymmetric linkage in the trilogy of environment development and sustainability and its impact on society. It examines varied perspectives and issues of development related to environmental destruction and sustainability challenges. By examining the recent trends of development and recording the dilemmas which are creating ecological imbalances, it explores some alternative ways of development to achieve sustainability. Divided into three parts, it has a broad canvass. The first section examines critically the perspectives on ecology, practice and ethics, rural development and man-forest interaction in the metropolis. Issues of dams, river, agricultural distress, environmental migration, eco-tourism, ecological conservation and land acquisition are assessed in part second. Alternative means of development are explored in part third by incorporating chapters on the constructed wetland, biofuels, subsistence economy, water and traditional knowledge practice. This interdisciplinary book is of immense significance to academicians, researchers, postgraduate and graduate level students of social sciences and environmental studies, policymakers, development practitioners and NGOs working in the area of environment and development.
