Patterns of Disintegration. The EU and the Emerging European Order Federico Nicolaci, 2012-08-15 Paraphrasing Marx one could say that a spectre is hunting Europe the spectre of disintegration The crisis of the Monetary Union the

pinnacle of European integration seems to call into question the core assumption of more than half a century of Europe's integration history the functionalist idea that economic integration would be self sustaining and would ultimately lead to the emergence of a political community This book presents evidence suggesting that the current crisis is not an accidental snag but the collapse of the ideological architecture of Europe showing that the disintegrating dynamics threatening the EU are structurally determined *The European Union and Emerging Powers in the 21st Century* Sven Biscop, 2016-02-11 The emergence of new powers fundamentally questions the traditional views on international relations multilateralism or security as a range of countries now competes for regional and global leadership economically politically technologically and militarily As the focus of international attention shifts from the Atlantic to the Pacific the European states in particular are seen to lose influence relative to the emerging economic powerhouses of China Russia India and Brazil European nations find themselves too small to engage meaningfully with these continent sized powers and in an increasingly multipolar world are concerned their influence can only continue to decline This book analyses the shifts in the structure of global power and examines the threats and opportunities they bring to Europe Leading European Contributors reflect on how the EU can utilise collective strength to engage and compete with rapidly developing nations They examine perceptions of the EU among the emerging powers and the true meaning and nature of any strategic partnerships negotiated Finally they explore the shape and structure of the international system in the 21st century and how the EU can contribute to and shape it *Governance, Citizenship and the New European Football Championships* Wolfram Manzenreiter, Georg Spitaler, 2013-09-13 Over the past decade European football has seen tremendous changes impacting upon its international framework as well as local traditions and national institutions Processes of Europeanization in the fields of economy and politics provided the background for transformations of the production and consumption of football on a transnational scale In the course of such rearrangements football tournaments like the UEFA Championship or the European Champions League turned into mega events and media spectacles attracting ever growing audiences The experience of participating in these events offers some of the very few occasions for the display and embodiment of identities within a European context This volume takes the 2008 EUROs hosted by Austria and Switzerland as a case study to analyze the political and cultural significance of the tournament from a multidisciplinary angle What are the special features and spatial arrangements of a UEFAesque Europe in comparison to alternative possibilities of a Europe Situating the sport tournament between interpretations of collective European ritual and European spectacle the key research question will ask what kind of Europe was represented in the cultural political and economic manifestations of the 2008 EUROs This book was published as a special issue of *Soccer and Society* **The First Year of the New European Union**, 1995 *The New European Union Enlargement* Jérôme Creel, Sandrine Levasseur, 2004 *Proceedings - Assembly of Western European Union* Western European Union, 1999 **Understanding the New European Community** William Nicoll, Trevor C.
