Multi-objective Decision Analysis Clinton W. Brownley, 2013-03-28 Whether managing strategy operations or products knowing how to make the best decision in a complex uncertain business environment is difficult You might be faced with multiple competing objectives which means making trade offs To complicate matters any uncertainty makes it hard to explicitly understand how different objectives will impact potential outcomes This book will help you face these problems It provides a decision analysis framework implemented as a simple spreadsheet tool This multi objective decision analysis framework helps you to measure trade offs among objectives and incorporate uncertainties and risk preferences With this book you will be able to identify what information is needed to make a decision define how that information should be combined and finally provide quantifiable evidence to clearly communicate and justify the decision The process involves minimal overhead and is perfect for busy professionals who need a simple structured process for making tracking and communicating decisions This process makes decision making more efficient by focusing only on information and factors that are well defined measureable and relevant to the decision at hand The framework requires clear characterization of a decision ensuring that it can be traced and is consistent with the intended objectives and organizational values Using this structured decision making framework anyone can consistently make better decisions to gain competitive and strategic advantage

Talk to the Mirror Florine Mark, 2008-10 One of the most successful women in America Florine Mark built a weight loss empire spanning fourteen states and parts of Canada and Mexico CEO and Chairman of the Board of The WW Group Inc Florine was the owner of the largest number of Weight Watchers franchises in the world In *Talk to the Mirror* she tells you how she turned a lackluster life into the one she once only dreamed of And even better she wants to teach you how to do it giving you the tools to realize

that the most important asset you have is YOU Florine was a painfully self conscious girl Being fifty pounds overweight and poor she looked in the mirror and hated what she saw It wasn't until after a failed marriage years of struggling self esteem issues and a bout with diets pills that almost killed her that she turned her life around and is one of the most admired businesswoman and motivational speakers in America Talk to The Mirror is the place to feel safe as you challenge yourself with Florine's self quizzes exercises and inspirational stories that will help you to discover how to improve your self image so you can achieve your goals socially professionally and romantically

Non-Bayesian Decision Theory Martin Peterson, 2008-06-06 For quite some time philosophers economists and statisticians have endorsed a view on rational choice known as Bayesianism The work on this book has grown out of a feeling that the Bayesian view has come to dominate the academic community to such an extent that an alternative non Bayesian position is rarely researched Needless to say I think this is a pity Non Bayesian positions deserve to be examined with much greater care and the present work is an attempt to defend what I believe to be a coherent and reasonably detailed non Bayesian account of decision theory The main thesis I defend can be summarised as follows Rational agents maximise subjective expected utility but contrary to what is claimed by Bayesians utility and subjective probability should not be defined in terms of preferences over uncertain prospects On the contrary rational decision makers need only consider preferences over certain outcomes It will be shown that utility and probability functions derived in a non Bayesian manner can be used for generating preferences over uncertain prospects that support the principle of maximising subjective expected utility To some extent this non Bayesian view gives an account of what modern decision theory could have been like had decision theorists not entered the Bayesian path discovered by Ramsey de Finetti Savage and others I will not discuss all previous non Bayesian positions presented in the literature
