St. Croix Border Country Harry Swain, Cotton Mather, 1968 Valued Environments John R. Gold, Jacquelin Burgess, 2019-03-21 First published in 1982 People care about places Inhabitants demand more participation in the changes proposed for their local environments activists urge greater protection of countryside and natural environments decision makers feel threatened by the antagonism aroused by their powers and plans The essays in this book have been drawn together to discover what lies behind these expressions of concern and discontent Valued environments are places for which people feel commitment and affection places which support a sense of personal identity and well being The authors explore the character and constituents of valued environments asking how our experiences of environments may be enhanced What is the impact of environmental change How can the future be accommodated in both rural and urban environments without destroying their essential qualities The reader will find substantive evidence from case studies of environments valued by inhabitants and outsiders which answer these questions Examples are taken from wilderness areas fenland market towns and large cities commercial streets and residential neighbourhoods environments of the past and those imagined in science fiction The essays are united in their focus on the meaning of places and landscapes The subtle but highly significant role of valued environments is examined thoroughly in the book It will be of interest to all who care deeply about their surroundings reflecting perhaps some of their own experiences as well as conveying information about the environmental experiences of others Students of geography environmental planning and conservation should also find the book directly relevant to their interests in man environment relationships Wpa Guide to Minnesota The Federal Writers' Project, 2008-10-14 **Maine to Greenland** Wilfred E. Richard, William Fitzhugh, 2014-08-05 Maine to Greenland is a testament to one of the world's great geographic regions the Maritime Far Northeast For more than three decades William W Fitzhugh and Wilfred E Richard have explored the Northeast's Atlantic corridor and its fascinating history habitat and culture The authors powerful personal essays and Richard's stunning photography transport readers to this vibrant region joining Smithsonian archaeological expeditions and trekking in vast and amazing terrain Following Fitzhugh and Richard's travels north from Maine to the Canadian Maritimes Newfoundland and northern Quebec then to Labrador Baffin and Ellesmere islands and Greenland we view incredible landscapes uncover human history and meet luminous personalities along the way Fully illustrated with 350 full color photographs Maine to Greenland is the first in depth treatment of the Northeast Atlantic corridor and essential for armchair travelers locals tourists or anyone who has journeyed there Today green technology climate change and the opening of the Arctic Ocean have transformed the Maritime Far Northeast from an icy frontier into a global resource zone and an increasingly integrated international crossroads In our rapidly converging world we have much to learn from the Maritime Far Northeast and how its variety of cultures have adapted to rather than changed their environments during the past ten thousand years Maine to Greenland is not only a complete account of the region's unique culture and environment

but also a timely reminder that amidst the very real consequences of climate change the inhabitants of the Maritime Far Northeast can show us grounded and sustainable ways of living Wisconsin Land and Life Robert Clifford Ostergren, Thomas R. these categories such as the White House The geographic view of The Parks Belong to the People sets it apart from others that have taken a solely historical approach Where parks are located what they are near where their visitors come from and how land use and activities are organized within parks are some of the fundamental issues discussed The majority of units in the NPS are devoted to recreation areas or historic sites such as battlefields archaeological sites or sites devoted to a specific person and this is reflected in the authors approach What we think of as a national park has changed over the years and will continue to change Weber and Sultana emphasize changing social and political environments in which NPS units were created and the roles they serve such as protecting scenery providing wildlife habitats preserving history and serving as scientific laboratories and places for outdoor recreation The authors also focus on parks as public facilities and sites of economic activities National parks were created by people for people to enjoy at great cost and with great benefit They cannot be understood without taking this human context into account *A Map of Vernacular Regions in America* Ruth Feser Hale,1978 **Geographers** Patrick H.
