Kudyashov, A.M. Yakovlev, 2022-03-02 First published in 1991 This volume presents a brief description of the natural conditions of the permafrost regions the properties of the permafrost and the processes occurring in it the fundamentals of the heat transfer processes during drilling and the service temperature conditions of the tool Methods and devices for cooling the flushing media principles of quality control of flushing agents and the technology and commercial viability of their use during drilling in the permafrost have been considered The main emphasis in this book is on the drilling technology which uses a variety of flushing agents The text also includes a description of the technology of utilizing grouting solutions the theory and practice of drilling with simultaneous freezing of weakly cohesive moist ground as well as drilling holes in the ice sheets of the circumpolar regions This book is intended for engineers and technical personnel engaged in drilling for exploratory geological works *Role of Internal Friction in Dynamic Analysis of Structures* A.A. Kusainov, A.I. Tseitlin, 2021-06-23 Improvement in the methods of analysis of structures machines aircrafts and ships is one of the most important problems in engineering today The computational aspects of this problem are being tackled successfully due to developments in computer science However for an adequate description of the physical properties of structures especially those made of newer non traditional materials it is essential to further study their behaviour under different load and kinematic conditions and to develop appropriate physical models that provide a comprehensive and correct description of the actual state of deformation The objective of this book is to adopt a unified approach for describing the large number of

models of internal friction and to offer recommendations regarding the methods of taking it into account at the time of dynamic analysis It is also intended to provide a comprehensive analysis of the various models accompanied by detailed solutions of specific problems which could serve as examples for dynamic analysis of real structures taking into account the effect of internal friction **Modelling in Geomechanics** F.P.
