**Coronary Microvascular Obstruction in Acute Myocardial Infarction** Giampaolo Niccoli,Ingo Eitel,2018-07-07  
Coronary Microvascular Obstruction in Acute Myocardial Infarction From Mechanisms to Treatment provides a comprehensive understanding of the phenomenon of coronary microvascular obstruction CMVO that is the main limitation of reperfusion therapies in ST elevation myocardial infarction It provides in depth coverage of the phenomenon of CMVO which heavily affects prognosis by increasing the risk of death and heart failure at follow up A first of its kind reference dedicated solely to this topic it is appropriate for a wide audience from researchers to those who aid in the management prevention and treatment of CMVO Provides in depth coverage of coronary microvascular obstruction CMVO spanning research management prevention and treatment Includes the most up to date information on CMVO as presented from top experts around the world Provides access to a companion website with extra material including tables additional references and instructional videos Gives extensive coverage on how to measure CMVO including in depth indexes that can be used to detect and quantify the phenomenon  
*Principles and Treatment of Lipoprotein Disorders* Gotthard Schettler,Andreas J.R. Habenicht,2012-12-06 Major advances have been made in the understanding of the molecular mechanisms of atherosclerosis the disease that still affects more than 50 percent of the population in the highly industrialized countries This volume covers the most recent advances in the treatment of hyperlipidemia It represents a necessary update because molecular mechanisms of atherogenesis have been discovered in the past few years and their molecular mechanisms of action identified Extensively treated are the molecular mechanisms of disease etiology of arteriosclerosis in relation to the major risk factor hyperlipidemia rationale for more effective treatment of this disease by dietary means the treatment of associated or causing diseases and the treatment using hypolipidemic drugs  
Pan Vascular Medicine Peter Lanzer,Eric J. Topol,2013-12-20 The textbook provides an interdisciplinary and integrated perspective of modern vascular cure Written by experts the text proceeds from fundamental principles to advanced concepts The book is divided into four parts each focusing on different basic concepts of vascular cure All fundamental principles of the area are clearly explained to facilitate vascular diagnostics and treatment in clinical practice It is aimed at junior practitioners and experts  
**Oxidative Stress, Inflammation and Atherosclerosis-Related Diseases: From basic to clinical research** Qiang Liu,Mark Slevin,Wen-Jun Tu,2023-11-27 Atherosclerosis can affect any artery in the body including arteries in the heart brain arms legs pelvis and kidneys As a result different diseases ischemic heart disease carotid artery disease peripheral artery disease ischemic stroke and chronic kidney disease may develop based on which arteries are affected Atherosclerosis related diseases are a global crisis and require a global response The increasing global crisis in atherosclerosis related diseases is a barrier to development goals including poverty reduction health equity economic

**The ESC Textbook of Intensive and Acute Cardiovascular Care** Marco Tubaro, Pascal Vranckx, Susanna Price, Christiaan Vrints, Eric Bonnefoy, 2021-03-08 The ESC Textbook of Intensive and Acute Cardiovascular Care is the official textbook of the Acute Cardiovascular Care Association ACVC of the ESC Cardiovascular diseases CVDs are a major cause of premature death worldwide and a cause of loss of disability adjusted life years For most types of CVD early diagnosis and intervention are independent drivers of patient outcome Clinicians must be properly trained and centres appropriately equipped in order to deal with these critically ill cardiac patients This new updated edition of the textbook continues to comprehensively approach all the different issues relating to intensive and acute cardiovascular care and addresses all those involved in intensive and acute cardiac care not only cardiologists but also critical care specialists emergency physicians and healthcare professionals The chapters cover the various acute cardiovascular diseases that need high quality intensive treatment as well as organisational issues cooperation among professionals and interaction with other specialities in medicine SECTION 1 focusses on the definition structure organisation and function of ICCU's ethical issues and quality of care SECTION 2 addresses the pre hospital and immediate in hospital ED emergency cardiac care SECTIONS 3 5 discuss patient monitoring diagnosis and specific procedures Acute coronary syndromes ACS acute decompensated heart failure ADHF and serious arrhythmias form SECTIONS 6 8 The main other cardiovascular acute conditions are grouped in

SECTION 9 Finally SECTION 10 is dedicated to the many concomitant acute non cardiovascular conditions that contribute to the patients case mix in ICCU This edition includes new chapters such as low cardiac output states and cardiogenic shock and pacemaker and ICDs troubleshooting and chapters have been extensively revised Purchasers of the print edition will also receive an access code to access the online version of the textbook which includes additional figures tables and videos to better to better illustrate diagnostic and therapeutic techniques and procedures in IACC The third edition of the ESC Textbook of Intensive and Acute Cardiovascular Care will establish a common basis of knowledge and a uniform and improved quality of care across the field **Frontiers in Cardiovascular Health** Naranjan S. Dhalla, Arun

Chockalingam, H. Ivan Berkowitz, Pawan K. Singal, 2012-12-06 The Frontiers in Cardiovascular Health varies between and within nations depend ing upon the level at which the battle is fought for better cardiovascular health According to the 1997 World Health Report 15 million deaths i e 30% of the total number of deaths were attributable to cardiovascular diseases and this number is on the rise The projection for the year 2020 is quite alarming with an expected cardiovascular mortality reaching 50 million Much of this burden is projected to occur in developing countries more specifically in the most populous countries of the world namely China and India These countries are already burdened with infectious and parasitic diseases and are trying to eradicate such diseases With increasing life expectancies people all over the world especially in developing coun tries are exposed to degenerative atherosclerosis resulting in increased cardiovascu lar mortality and morbidity In developing countries resources available for health care are very limited For example many of the African countries spend less than 10 per person per year on his her entire health care let alone cardiovascular health The average health care budget for nearly two thirds of the global population is well below 100 per year on a per capita basis Therefore in developing countries health promotion and primary prevention are the frontiers by necessity Improving awareness and health education is not only a matter of choice but is an absolute necessity Textbook of Cardiovascular Medicine Eric J. Rooke,2008-04-15 If you plan to take the Vascular Medicine Board Examination this book is essential Presenting the compiled knowledge of experts in the field and emphasizing topics covered on the exam this concise text facilitates review and retention of material with questions and answers for each chapter covers topics from multiple perspective through multidisciplinary authorship serves as a convenient quick reference with highlighted bullet points is endorsed by the Society for Vascular Medicine and Biology Beginning with vascular biology the book progresses through a series of specific diseases disorders and conditions The authors cover testing treatment and techniques providing a comprehensive source of dependable information on clinical evaluation and management     **Cardiological Society of India: Cardiology Update 2014** H K Chopra,2015-04-30     **Biomechanics of Coronary Atherosclerotic Plaque** ,2020-03-15 Biomechanics of Coronary Atherosclerotic Plaque From Model to Patient First Edition is the first comprehensive text to focus on important biomechanical studies conducted in the last decade that have increased our understanding of coronary atherosclerotic plaque initiation growth and rupture as

well as improving the design of medical devices and clinical interventions including surgical procedures The book provides students researchers engineers clinicians and interventional cardiologists with an overview of the main topics related to the biomechanics of atherosclerosis in a single volume written by several experts in the field This volume is part of the Biomechanics of Living Organs book series The biomechanics of human soft tissues and organs has been an emerging research field since the publication of Y C Fung's original book series in the 1990s The publication of such books entirely dedicated to a specific biomechanical subject is necessary to advance scientific research in the field of biomechanics and to transfer important knowledge to future generations Therefore this series of volumes on the biomechanics of living organs has been created This series began in July 2017 with the publication of a first volume on the fundamentals of Hyperelastic Constitutive Laws for Finite Element Modeling of Living Organs The current volume on the Biomechanics of Coronary Atherosclerotic Plaque is the latest in this new series Presents the main computational fluid dynamic studies performed describing blood flow in healthy and pathological artery branches including in coronary bifurcations Highlights the correlation between plaque initiation regions and blood shear stress amplitude Discusses the main biomechanical and mechanobiological models to highlight the importance of quantifying the residual and peak cap stresses and the presence of calcifications to evaluate the risk of plaque rupture Introduces the most recent intravascular imaging biomarker techniques elastography palpography and modulography

**Phospholipases in Health and Disease** Paramjit S. Tappia, Naranjan S. Dhalla, 2014-03-13 Phospholipases generate lipid signaling molecules through their hydrolytic action on phospholipids and are known to regulate function of a variety of cells under normal and diseased conditions While several physiological biochemical and molecular techniques have identified key players involved in different disease processes phospholipases have also emerged as critical players in the pathogenesis of a number of different diseases including cancer and heart disease In addition phospholipases are also implicated in such conditions as brain disorder injury kidney and immune cell dysfunction Phospholipases in Health and Disease is a compilation of review articles dedicated to the study of the field with respect to biochemical and molecular mechanisms of normal and abnormal cell function The wide range of area covered here is of interest to basic research scientists clinicians and graduate students who are engaged in studying pathophysiological basis of a variety of diseases Furthermore this book highlights the potential of the different phospholipases as therapeutic targets as well as part of prevention strategies Twenty three articles in this book are organized in four sections that are designed to emphasize the most characterized forms of the phospholipases in mammalian cells The first section discusses general aspect of phospholipases Section two covers the role and function of phospholipase A in different pathophysiological conditions The third section is focussed on phospholipase C which is believed to play a central role in transmembrane signaling The final section covers phospholipase D which is present in a variety of different cells The book illustrates that the activation of phospholipases is of fundamental importance in signal transduction affecting cell function Overall this book

discusses the diverse mechanisms of phospholipase mediated signal transduction in different pathophysiological conditions and raises the possibility of specific forms of phospholipases serving as novel targets for drug development
