**Administration in the Balkans from Weberian Bureaucracy to New Public Management** Spyridon Flogaitis, Lucica Matei, 2011 **Measuring Regional Authority** Liesbet Hooghe, Gary Marks, Arjan H. Schakel, Sandra Chapman

Osterkat, Sara Niedzwiecki, Sarah Shair-Rosenfield, 2016-01-28 This is the first of five ambitious volumes theorizing the structure of governance above and below the central state This book is written for those interested in the character causes and consequences of governance within the state and for social scientists who take measurement seriously The book sets out a measure of regional authority for 81 countries in North America Europe Latin America Asia and the Pacific from 1950 to 2010 Subnational authority is exercised by individual regions and this measure is the first that takes individual regions as the unit of analysis On the premise that transparency is a fundamental virtue in measurement the authors chart a new path in laying out their theoretical conceptual and scoring decisions before the reader The book also provides summaries of regional governance in 81 countries for scholars and students alike Transformations in Governance is a major new academic book series from Oxford University Press It is designed to accommodate the impressive growth of research in comparative politics international relations public policy federalism environmental and urban studies concerned with the dispersion of authority from central states up to supranational institutions down to subnational governments and side ways to public private networks It brings together work that significantly advances our understanding of the organization causes and consequences of multilevel and complex governance The series is selective containing annually a small number of books of exceptionally high quality by leading and emerging scholars The series targets mainly single authored or co authored work but it is pluralistic in terms of disciplinary specialization research design method and geographical scope Case studies as well as comparative studies historical as well as contemporary studies and studies with a national regional or international focus are all central to its aims Authors use qualitative quantitative formal modeling or mixed methods A trade mark of the books is that they combine scholarly rigour with readable prose and an attractive production style The series is edited by Liesbet Hooghe and Gary Marks of the University of North Carolina Chapel Hill and the VU Amsterdam and Walter Mattli of the University of Oxford *Divided we Fall: An Insider's Perspective on Local Government Amalgamations* Dr Ian

Tiley, 2012-12-11 Recent Australian local government structural reform has manifested as council amalgamations and predominantly as imposed merger processes This book examines council amalgamations across Australia over the past two decades and uncovers the case of council amalgamation in the NSW Clarence Valley Council CVC since 2004 The case of forced amalgamation of four general purpose and two county councils could have been a recipe for chaos instead this book

describes the gains and the challenges Writing from deep seated knowledge of local government this book details the net positive economic outcomes and financial benefits against measurable indicators and describes the impacts on local democracy Based on detailed research this long term local government insider perspective will be of value to all those interested in driving change through local government reform **Politics, Patronage and Public Works: 1842-1900**

Hilary Golder,2005 New South Wales government administration increased four fold during the first six decades of the twentieth century and with the growth in population came increasing community expectations This tells how the Public Service Board became responsible for employing staff for this burgeoning administrative corps **The Municipal Year**

**Book and Public Services Directory** ,1988 **Freedom on the Fatal Shore** John Hirst,2008-05-01 Freedom on the Fatal Shore brings together John Hirst s two books on the early history of New South Wales Both are classic accounts which have had a profound effect on the understanding of our history This combined edition includes a new foreword by the author Convicts with their own time convicts with legal rights convicts making money convicts getting drunk what sort of prison was this Hirst describes how the convict colony actually worked and how Australian democracy came into being despite the opposition of the most powerful He writes This was not a society that had to become free its freedoms were well established from the earliest times Colonial Australia was a more normal place than one might imagine from the folkloric picture of society governed by the lash and the triangle composed of groaning white slaves tyrannised by ruthless masters The book that best conveys this and has rightly become a landmark in recent studies of the System is J B Hirst s Convict Society and Its Enemies Robert Hughes The Fatal Shore Anyone with an interest in Australian political culture will find The Strange Birth of Colonial Democracy invaluable Professor Colin Hughes former Electoral Commissioner for the Commonwealth

**Australia's Metropolitan Imperative** Richard Tomlinson,Marcus Spiller,2018-07 Since the early 1990s there has been a global trend towards governmental devolution However in Australia alongside deregulation public private partnerships and privatisation there has been increasing centralisation rather than decentralisation of urban governance Australian state governments are responsible for the planning management and much of the funding of the cities but the Commonwealth government has on occasion asserted much the same role Disjointed policy and funding priorities between levels of government have compromised metropolitan economies fairness and the environment Australia s Metropolitan Imperative An Agenda for Governance Reform makes the case that metropolitan governments would promote the economic competitiveness of Australia s cities and enable more effective and democratic planning and management The contributors explore the global metropolitan renaissance document the history of metropolitan debate in Australia and demonstrate metropolitan governance failures They then discuss the merits of establishing metropolitan governments including economic fiscal transport land use housing and environmental benefits The book will be a useful resource for those engaged in strategic transport and land use planning and a core reference for students and academics of urban governance and government

**Sand in Our Souls** Leone Huntsman, 2001 Images of the beach pervade Australian popular culture However the deeper significance of the experience of the beach and its influence on Australian culture generally have not yet been seriously explored How why and when did the beach become part of the Australian way of life In *Sand in our Souls* Leone Huntsman describes the forces and pressures that encouraged or impeded Australians enjoyment of sand and surf from early enjoyment of bathing through nearly a century of repressive restrictions to freedom won in the face of drawn out opposition The ways in which artists writers film makers and the advertising industry have depicted the beach are examined for the light they throw on the beach s significance She traces the development of a distinctively Australian way of being at the beach suggesting that the beach experience has been absorbed into our emerging culture and continues to shape it in subtle ways Huntsman s provocative arguments will stimulate debate on the concept of national identity appropriate for a new Australian century and promote a deeper understanding of an aspect of life in Australia that is cherished by many of those who live here

*Regional and National Elections in Eastern Europe* Arjan H. Schakel, 2017-02-11 This book is the second of two studies which systematically explore territoriality of the vote in Europe They investigate when and where voters treat regional elections differently from national contests and aim to increase our understanding of the dynamics of electoral competition which have become increasingly multifarious and complex in many countries due to the establishment and strengthening of regional government This volume brings together leading experts on elections who analyze differences between regional and national electoral outcomes in ten East European countries since 1990 Based on a common analytical framework each chapter investigates congruence between regional and national elections and traces and explains second order and regional election effects The editors applied a similar analytical framework in *Regional and National Elections in Western Europe* Palgrave 2013 which focused on 13 West European countries enabling the authors to compare regionalelectoral dynamics between Eastern and Western Europe and observe to what extent explanations for territorial heterogeneity in the vote in the West also apply to the East This book will be of particular interest to advanced students and scholars in the fields of comparative politics regional studies Eastern European politics and democratization
