Stages Of Faith The Psychology Of Human Development And The Quest For Meaning:

Stages of Faith James W. Fowler, 1995-09-15 Dr James Fowler has asked these questions and others like them of nearly six hundred people He has talked with men women and children of all ages from four to eighty eight including Jews Catholics Protestants agnostics and atheists In many cases the interviews became in depth conversations that provided rare intimate glimpses into the various ways our lives have meaning and purpose windows into what this books calls faith Faith as approached here is not necessarily religious nor is it to be equated with belief Rather faith is a person s way of leaning into and making sense of life More verb than noun faith is the dynamic system of images values and commitments that guide one s life It is thus universal everyone who chooses to go on living operated by some basic faith Building on the contributions of such key thinkers as Piaget Erikson and Kohlberg Fowler draws on a wide range of scholarship literature and firsthand research to present expertly and engagingly the six stages that emerge in working out the meaning of our lives from the intuitive imitative faith of childhood through conventional and then more independent faith to the universalizing self transcending faith of full maturity Stages of Faith helps us to understand our own pilgrimage of faith the passages of our own quest for meaning and value
