How Whole Brain Thinking Can Save the Future James Olson, 2017-01-10 When facing a tough dilemma the wise person tackles the whole problem They don't just focus on one part and ignore the rest That's a matter of common sense but such holistic thinking rarely occurs in our most consequential organizations Although women are catching up in the corridors of power most people in charge today are highly specialized males whose perception is too often myopic For example while they may focus well on the immediate symptoms of a problem they often miss deeper causes wider effects and longer term consequences Such people some of whom are also women are left brain dominant thinkers who tend to miss the forest for the trees Sadly these left brain dominants fail to use all the mental faculties available to them in particular the holistic and intuitive perceptions provided by their right brain And this is why our future is now in great peril In this multiple award winning book James Olson carefully explores these issues and shows us how to minimize conflict by gaining creative control over our two modes of perception He goes on to describe the left brain bias in our civilization revealing it to be the root cause for centuries of war racism sexism exploitation and hyper polarization Left brain dominance also explains eons of misunderstanding between the sexes and our inability to understand LGBTQ variants of which there are as many as 32 fluid variations as Olson shows While most of our technological and scientific progress is driven by left brain thinking the great advances to come especially in ethics politics the arts and religion will require that we consciously harness both sides of our brain to greatly improve our thinking so we can more often reach agreement Independent scholar Olson concludes by explaining how we can achieve greater internal coordination between these two operating systems thus showing us how and why thinking with our whole brains will lead us to peace justice prosperity and to the ultimate healing of our relationships and our world
