Regional Cooperation in the South Caucasus Tracey German, 2016-04-08 The South Caucasus region comprising the former Soviet states of Armenia Azerbaijan and Georgia occupies a key strategic location squeezed between the Black and Caspian Seas Iran Russia and Turkey Since the disintegration of the Soviet Union in 1991 the region has become an arena of geopolitical confrontation with regional powers such as Russia Turkey and Iran vying for influence in the face of growing Western involvement The Russian military intervention in Georgia in 2008 not only raised questions about Moscow's intentions towards its Near Abroad and the future direction of its foreign policy it also demonstrated that ostensibly local separatist disputes have serious ramifications for regional relations and the wider international community In this book German explores the extent of regional cooperation in the South Caucasus analyses the reasons for the relative lack of regional cooperation and assesses the potential for deeper cooperation in the future Snow Mountain Wilderness in the Mendocino National Forest United States. Securing Europe Fotios Moustakis, Tracey German, 2009-07-30 The new model of intervention that emerged from Bosnia and Kosovo signalled a revolution in International Affairs The crises in the Balkans revealed a new division of labour amongst Western states US forces are primarily responsible for military action while European partners are more committed to Peace Support Operations and the subsequent building of security communities via integration into the NATO and EU This model has been evidenced in the post 9 11 war on terror Here Moustakis and German examine the emergence and practice of this new Western model of intervention which combines hard military and soft peace approaches and assess its success and failures in the light of recent operations in Bosnia Kosovo Chechnya Georgia and Nagorno Karabakh The fragile democratisation processes unfolding in the Balkans and the Caucasus offer important insights into the challenges of securing volatile regions and peripheries
