A Handbook on the New Law of the Sea, Volume 2 Daniel Vignes, R.J. Dupuy, 2023-09-20 The fact that the Montego Bay Convention has been only ratified by 37 States at present and that it will be some time before the 60 ratifications required by Article 308 are achieved has not prevented states from acting in accordance with the rules drawn up by the Conference Close on one hundred states have established either exclusive economic zones broadly modelled on Part V or 200 nautical mile fishery zones and drawn on the principles laid down for exploiting living resources Although these laws have been formulated unilaterally by states international custom since the judgement by the International Court of Justice in the Fisheries Case of

18 December 1951 is derived from concordant national rules This shift began even before the Conference ended and has been consolidated since then Moreover the regime governing the sea bed beyond the limits of national jurisdiction defined by Part XI which was the stumbling block of the Conference is subject to transitional arrangements on the basis of two resolutions adopted in the Conference's Final Act one providing for the establishment of a Preparatory Commission and the other on the preliminary activities of pioneer investors This two volume work an earlier edition of which appeared in French has been written by a team of experts of international renown It presents an analysis of the Convention with an additional Chapter on the legal regime governing underwater archaeological and historical objects

The Federal Coastal Programs Review United States. National Oceanic and Atmospheric Administration,1981 *Predictability and Flexibility in the Law of Maritime Delimitation* Yoshifumi Tanaka,2019-11-14 This fully revised new edition offers a comprehensive picture of the law of maritime delimitation incorporating all new cases and State practice in this field As with all types of law the law of maritime delimitation should possess a degree of predictability On the other hand as maritime delimitation cases differ flexible considerations of geographical and non geographical factors are also required in order to achieve equitable results How then is it possible to ensure predictability while taking into account a number of diverse factors in order to achieve an equitable result This is the question at the heart of the law of maritime delimitation This book explores a well balanced legal framework that reconciles predictability and flexibility in the law of maritime delimitation by looking at three aspects of the question first it reviews the evolution of the law of maritime delimitation second it undertakes a comparative study of the case law and State practice and third it critically assesses the law of maritime delimitation in its current form

The Maritime Political Boundaries of the World Victor Prescott,Clive

Schofield,2005-01-01 This book addresses the often vexed question of national maritime claims and the delimitation of international maritime boundaries The number of undelimited international maritime boundaries is much larger than the number of agreed lines The two boundaries that define the marine domain of coastal states are examined First the baselines along the coast may consist of low water lines or straight lines or a combination of both When straight lines are used they define the seaward limit of the state s internal waters Second the outer limits of claims to territorial seas contiguous zones and exclusive economic zones are measured from the baselines All states will have to delimit at least one international boundary with a neighbouring state whether adjacent or opposite In confined seas no state can claim the full entitlement and must negotiate international boundaries with all neighbours Many states bordering oceans can claim the full entitlement seawards although they will need to delimit national boundaries with adjacent neighbours
