

Figure 5.4: Weight of a body is equal to the gravitational force between the body and the Earth.

5.2 MASS OF THE EARTH

Consider a body of mass m on the surface of the Earth as shown in figure 5.4. Let the mass of the Earth be M_e and radius of the Earth be R . The distance of the body from the centre of the Earth will also be equal to the radius R of the Earth. According to the law of gravitation, the gravitational force F of the Earth acting on a body is given by

$$F = G \frac{mM_e}{R^2} \quad \dots \quad \dots \quad \dots \quad \dots \quad (5.3)$$

But the force with which Earth attracts a body towards its centre is equal to its weight w . Therefore,

$$F = w = mg \quad \dots \quad \dots \quad \dots \quad \dots \quad (5.4)$$

$$\text{or} \quad mg = G \frac{mM_e}{R^2} \quad \dots \quad \dots \quad \dots \quad \dots \quad (5.5)$$

$$\therefore \quad g = G \frac{M_e}{R^2} \quad \dots \quad \dots \quad \dots \quad \dots \quad (5.6)$$

$$\text{and} \quad M_e = \frac{R^2 g}{G} \quad \dots \quad \dots \quad \dots \quad \dots \quad (5.7)$$

Mass M_e of the Earth can be determined on putting the values in equation (5.7).

5.3 VARIATION OF g WITH ALTITUDE

Equation (5.6) shows that the value of acceleration due to gravity g depends on the radius of

A Conspiracy Website # 11 , The Planet Earth D. R. Bates, 2016-10-13 The Planet Earth Second Edition reviews remarkable advances in understanding the physical aspects of the Earth including technical developments that have made various new types of observation and measurement possible as well as a deepened understanding of the fundamental laws of nature that have given the necessary basis for the interpretation of many of the complex phenomena concerned Topics covered include the Van Allen radiation belts the Mohole project continental drift and polar wandering the theory of magnetic storms and aurorae and the possibility of extra terrestrial sources of life This book is comprised of 18 chapters and begins with an overview of the work and achievements of the International Geophysical Year The reader is then introduced to the Earth's physical properties such as the deep interior crust oceans climate and geomagnetic field as well as its origin age and possible ultimate fate Subsequent chapters explore the composition and structure of the Earth's atmosphere the general circulation of the atmosphere and oceans the ice ages meteorology and weather forecasting and experimental proof of the existence of the ionosphere The airglow aurorae and magnetic storms meteors cosmic radiation and radiation belts are also described The final chapter examines the genesis of life on Earth This monograph is intended for students and practitioners of planetary and geophysical sciences **Dynamics of the Earth** V. I. Ferronsky, S.V. Ferronsky, 2010-06-28 In their search for solutions to problems concerning the dynamics of the Earth as a self gravitating body the authors have applied the fundamentals found in their book Jacobi Dynamics 1987 Reidel First satellite observations have shown that the Earth does not remain in hydrostatic equilibrium which forms the physical basis of modern geodynamics Secondly satellite data have established a relationship between the planet's polar moment of inertia and the potential of the Earth's outer force field which proves the most basic point of Jacobi dynamics This allowed the authors to revise their derivation of the classical virial theorem introducing the concept of a volumetric force and volumetric moment and so to obtain a generalized virial theorem in the form of Jacobi's equation The main dynamical effects are the kinetic energy of oscillation of the interacting particles which explains the physical meaning and nature of gravitational forces separation of shells of a self gravitating body with respect to its mass density differences in angular velocities of the shell's rotation continuity in variance of the potential of the outer gravitational force field together with reductions in the envelope of the interacting masses volumetric center of gravity the nature of Earth Moon and satellite precession the nature and generating mechanism of the planet's electromagnetic field the common nature of gravitational and electromagnetic energy and other related issues The work is a logical continuation of the book Jacobi Dynamics and is intended for researchers teachers and students engaged in theoretical and experimental research in various branches of astronomy geophysics planetology and cosmogony and for students of celestial statistical quantum and relativistic mechanics and hydrodynamics **THE DYNAMIC EARTH SYSTEM, Fourth Edition** PATWARDHAN, A. M., 2020-06-01 Addressed to the undergraduate and postgraduate students pursuing studies in the broad

interdisciplinary field of Earth Science this thoroughly revised book in its Fourth Edition is aimed at facilitating the comprehension between the pre planetary history and the subsequent geological processes of the Earth system This is done keeping in mind the current interest in exoplanets and the evolution of the life supporting crustal composition of the Earth much different from that of the other planets in terms of the Earth s internal heat density distribution and the strong magnetic field due to the dominant presence of metallic Fe in its core The new edition draws the attention of the reader to the different surface gravity features and the internal compositional structures of the Earth Moon and the Sun acquired during the Hadean Examples of lithospheric movements rifting subduction and the continued mantle crust interaction from Indian and Southeast Asian geology would bring the readers close to interlinking these tectonic processes to the genesis of igneous sedimentary and metamorphic rocks as well as to the episodes of mineralizations Emphasizing these dynamic processes the text focuses on the constitution of oceans the causes of mass extinctions and the evolution of life forms the biogeochemical cycles of elements and also on the life protecting ozone layer of the stratosphere all unique to the Earth System The student is sensitized towards the natural hazards of frequent volcanic eruptions earthquakes tsunamis floods and climate change besides explicating the threats posed by global warming atmospheric and hydrosphere pollution caused by the industrial emanations and indiscrete waste disposal

KEY FEATURES Each chapter is replete with examples illustrations tables and figures to make reading more fruitful and enriching Chapter end summary helps in recapitulation of the concepts discussed Additional Reading provided at the end of each chapter directs the readers to the vast source of information

NEW TO THE FOURTH EDITION Considering the growing global interest in locating a habitable exoplanet like the Earth and in exploring the Moon and the Mars the present edition thoroughly updates the information about the geochemical processes unique to the Earth System that gave rise to the life supportive crust oceans and the atmosphere the role played by plate tectonics in forming the igneous sedimentary and metamorphic rocks mineral deposits and also in the evolution of life the geo environmental hazards of volcanic eruptions earthquakes floods tsunamis droughts and desertification the growing adoption of solar hydro wind and nuclear energy in power generation and in management of clean environment

What sets this book *Deep Space Exploration* apart from other astronomy texts on the market is its comprehensive approach. Unlike many books that superficially touch on various topics adorned with glossy images, this book delves deeper. We have meticulously researched and crafted each subject in an accessible, easy-to-understand language, ensuring that complex concepts are distilled into engaging, bite-sized explanations. Recognizing that mathematical equations can be daunting for some readers, we have strategically incorporated only essential, straightforward formulas accompanied by illustrative examples. Our primary focus is on providing a solid foundation in theoretical astronomy rather than delving into advanced mathematical derivations. As you embark on this journey through our book, you will discover how the vast expanse of the universe is woven into a singular, cohesive narrative. Get ready to explore the wonders of the cosmos in a refreshingly clear and concise manner. So join us as we embark on this cosmic adventure, unraveling the secrets that lie among the stars.

Seven years of research, 2017 to 2024. *How to Swindle by Faking Science* P. S. J. (Peet) Schutte, 2012. *How To Swindle by Faking Science* then you are going to read what is the mother of all the conspiracies in science, which is about how science applies mind control by processing thought control. This is the truth. Science practicing physics about Astronomy, Cosmology, and everything to do with Stars, the Cosmos, or Universe. Galactica is under a Conspiracy to hide and conceal the truth. Does this sound far-fetched? I challenge you to read this book and then still think it is far-fetched. Read what science hides, and I prove every word. This book reveals what Science in Physics concerning Astronomy, Cosmology, hides for hundreds of years. You read how science swindles to make Newton seem truthful, and every time they find out how nature works, nature destroys Newtonian concepts completely. This is the conspiracy. For the first time in history, I prove gravity is P. But if science was as unblemished and perfect as physicists say it is, then my work has no place to be. This then is the attitude in science about my work. To counter that claim, I prove that there is a mother conspiracy in place about covering the misconceptions hidden under a cloak of false, lily white purity and truthfulness. To hide Newton's indefensible incorrectness, science created a mother conspiracy, which I reveal. There is a mother conspiracy hiding mistakes in place. Science benefits from and builds upon this mother conspiracy being in place while I can't get further with my work while it is in place. It's imbedded in the teaching and learning process, students undergo in learning Newtonian dogma. Students are brainwashed by the instigation of mind control that forces students to accept the dogma. I prove gravity has a value of P, still, by keeping me quiet. I am perverted to introduce a new cosmic vision showing how the Universe forms when enlisting the four phenomena. How it works in science is Newton gets undeserved, undue credit in discrediting nature. I show how singularity takes on every shape and space we know. Are you up to facing the truth about what you thought is more righteous than God? Read this and see what those in science hide to make them seem so surreal.
