Shamy, 2013-04-22 We instinctively know that exercise eating the right things and taking vitamins sustains our health maintains our youth and offers a sense of wellbeing Traditional fitness publications do a great job telling you what to do but lack any explanation as to the why and how They offer a map to youth by micromanaging your diet exercise and or supplements You blindly follow their lead in expectation of finding your fountain of youth through their training Every body is different which is why one map may work for one person but not another maybe it failed you so you try another What you may not realize is that although they offer step by step instruction to find the fountain they are not teaching you how to read the map Although the map is the same the directions are different for each of us to find the fountain of youth the difference between the layperson and expert is their ability to read the map as a whole that map is our anatomy That cartography lesson is learned by teaching you how exercise diet and supplements work rather than being told what in the same to follow At the end of the lesson you may now understand that your journey may require parts of many methods rather than the single direction of one the author shares his own journey as he teaches you how to read the map so you understand how one has successfully read the map to discover his fountain of youth **Physical Best Activity Guide** Physical Best (Program), 2011 This comprehensive health related fitness education program is back and better than ever Developed by top level physical educators this third edition will help students gain the knowledge skills appreciation and confidence they need to lead active healthy lives regardless of physical and mental abilities or disabilities Physical Best Activity Guide Middle and High School Levels has been used with much success across the United States and for good reason The text contains 70 easy to use instructional activities ranging from noncompetitive to competitive and from less demanding to more demanding It also includes activities that allow for maximum time on task All the instructional activities address the national physical education standards dance standards or health standards This new edition retains the best activities from previous editions and offers new ones from outstanding teachers throughout the United States You will learn how to adapt the activities for all students regardless of skill level or disability and students will learn how to set realistic goals manage their activity levels and remain healthy throughout their lives In addition this text offers the following features A Combined Component Training chapter combines aerobic fitness muscular strength and endurance and flexibility into single activities A CD ROM contains a wealth of reproducibles including charts posters signs station cards handouts and
