precious color blue travel all the way from remote lapis mines in Afghanistan to Michelangelo's brush. What is the connection between brown paint and ancient Egyptian mummies? Why did Robin Hood wear Lincoln green? In *Color*, Finlay explores the physical materials that color our world such as precious minerals and insect blood as well as the social and political meanings that color has carried through time. Roman emperors used to wear togas dyed with a purple color that was made from an odorous Lebanese shellfish which probably meant their scent preceded them. In the eighteenth century black dye was called logwood and grew along the Spanish Main. Some of the first indigo plantations were started in America amazingly enough by a seventeen year old girl named Eliza. And the popular van Gogh painting *White Roses* at Washington's National Gallery had to be renamed after a researcher discovered that the flowers were originally done in a pink paint that had faded nearly a century ago. *Color* is full of extraordinary people, events and anecdotes painted all the more dazzling by Finlay's engaging style. Embark upon a thrilling adventure with this intrepid journalist as she travels on a donkey along ancient silk trade routes with the Phoenicians sailing the Mediterranean in search of a special purple shell that garners wealth, sustenance and prestige with modern Chilean farmers breeding and bleeding insects for their viscous red blood. The colors that craft our world have never looked so bright.

**The Carrot Purple and Other Curious Stories of the Food We Eat** Joel S. Denker, 2015-10-01 How many otherwise well educated readers know that the familiar orange carrot was once a novelty? It is a little more than 400 years old. Domesticated in Afghanistan in 900 AD, the purple carrot in fact was the dominant variety until Dutch gardeners bred the young upstart in the seventeenth century. After surveying paintings from this era in the Louvre and other museums, Dutch agronomist Otto Banga discovered this stunning transformation. The story of the carrot is just one of the hidden tales this book recounts. Through portraits of a wide range of foods we eat and love from artichokes to strawberries, *The Carrot Purple* traces the path of foods from obscurity to familiarity. Joel Denker explores how these edible plants were in diverse settings invested with new meaning. They acquired not only culinary significance but also ceremonial, medicinal and economic importance. Foods were variously savored, revered and reviled. This entertaining history will enhance

the reader's appreciation of a wide array of foods we take for granted From the carrot to the cabbage from cinnamon to coffee from the peanut to the pistachio the plants beans nuts and spices we eat have little known stories that are unearthed and served here with relish      **THE LADIES COMPANION AND MONTHLY MAGAZINE** ,1870
