## **The Economics Of Justice:**

**The Economics of Justice** Richard A. Posner,1983-08-16 Posner uses economic analysis to probe justice and efficiency primitive law privacy and the constitutional regulation of racial discrimination **The Economics of Justice** ,2014-07-14

**Wealth and Value** Luigina Mattioli,1985 *Economic Justice* Emma Coleman Jordan,Angela P. Harris,2005 Economic Justice Race Gender Identity and Economics is a new casebook offered as a means to further the conversation between critical legal scholarship and law and economics The phrase economic justice signals the authors aim to engage these two cultures and to find the answer to questions such as What can economics tell us about democracy and the law What can theories of justice tell us about economic theory and the law Why is there no legal language of class in the United States and what might one look like Economic Justice Race Gender Identity and Economics also uses the problem of racial and gender injustice as a site to interrogate both critical theory and economic theory Just as race gender and class seem inextricably intertwined economic and critical analysis both seem crucial to unraveling the knot of racial and gender inequality

**Economic Justice** Kenneth Kipnis,Diana T. Meyers,1985 Twenty distinguished philosophers and social theorists have contributed original papers to this stimulating investigation into the nature of the economically just society Collectively and in a remarkably coherent fashion these papers set out the problems of contemporary social theory within the context of the distributive justice vs property rights debate initiated by the works of John Rawls and Robert Nozick **Macrojustice** Serge-Christophe Kolm,2004-12-13 The main features of the just society as they would be chosen by the unanimous impartial and fully informed judgment of its members present a remarkable and simple meaningful structure In this society individuals freedom is fully respected and overall redistribution amounts to an equal sharing of individuals different earnings obtained by the same limited equalization labour The concept of equalization labour is a measure of the degree of community solidarity reciprocity redistribution and equalization of the society under consideration It is determined by a number of methods presented in this study which also emphasizes the rationality meanings properties and ways of practical implementation of this optimum distribution This result is compared with the various distributive principles found in practice and in political philosophical and economic thinking with the conclusion that most have their proper specific scope of application The analytical presentation of the social ethics of economics is particularly enlightening **The Paradox of Punishment** Thomas J. Miceli,2019-11-06 This book explores the insights that can be gained by looking at the criminal justice system from an economic point of view It provides an economic analysis of the institutional structure and function of the criminal justice system how its policies are formulated and how they affect behavior Yet it goes beyond an examination of specific policies to address the broad question of how law influences behavior For example it examines how concepts such as the possibility of redemption affect the decisions of repeat offenders and whether individual responsibility is or should be a pre requisite for punishment Finally the book argues that in addition to the threat of criminal sanctions law inculcates

principles of acceptable behavior among citizens by asserting that certain acts are against the law This expressive function of law can influence behavior to the extent that at least some people in society are receptive to such a message For these people the moral content of law has more than mere symbolic value and consequently it can expand the scope of traditional law enforcement while lowering its cost Another goal of the book is therefore to use economic theory to assess this dualistic function of law by specifically recognizing how its policies can both internalize an ethic of obedience to the law among some people irrespective of its consequences while simultaneously threatening to punish those who only respond to external incentives

**Modern Theories of Justice** Serge-Christophe Kolm, 2002 This first book in English by Serge Christophe Kolm provides an overview of his far reaching vision of distributive justice Kolm derives justice from considerations of rationality Justice cannot be defined by one all encompassing principle or set of a few principles It has the general form of an equality of individuals liberties in a broad sense with different applications and specific adjustments when several liberties conflict or when everybody prefers another outcome Kolm describes the theory of justice and presents and evaluates each of the various modern theories principles or criteria of justice He shows how some complement each other how some are unworkable and how some could be rescued The result is an intensive introduction to the general theory of justice for economists and noneconomists alike

**Drugs, Crime, and the Justice System**, 1993 **The Oxford Handbook of Evidence-based Crime and Justice Policy** Brandon Welsh, Steven N. Zane, Daniel P. Mears, 2024 An evidence based approach to crime and justice policy can go a long way toward ensuring that the best available research is considered in decisions that bear on the public good However the term evidence based is characterized by a great deal of rhetoric Indeed there remains a marked disjuncture between calls for evidence based policy and an understanding of what it means for policy to be evidence based The calls for evidence based policy nonetheless provide a powerful foundation for propelling a movement toward bringing about rational cost effective and humane policies for the betterment of society This handbook showcases the state of research on evidence based crime and justice policy and the challenges that impede its creation and use The volume has three core objectives to promote new and productive ways to think about evidence based policy to demonstrate how research can contribute to and guide evidence based policy in juvenile justice criminal justice and alternatives to system responses and to identify strategies that can increase reliance on evidence based policy To meet these objectives each chapter is guided by several central questions What do we know about evidence based policy and practice in crime and justice How can we improve knowledge of evidence based policy and practice How can we promote more use of evidence based policy and practice Taken as a whole the volume emphasizes the critical need for policies that are grounded in high quality research that address critical research gaps and that fully acknowledge the limitations of what extant research can do to inform policy decisions

**Theories of Justice** Alejandra Mancilla, 2017-05-15 Forty years ago in his landmark work *A Theory of Justice* the American philosopher John Rawls depicted a just society as a fair system of cooperation between citizens regarded as

free and equal persons Justice Rawls famously claimed is the first virtue of social institutions Ever since then moral and political philosophers have expanded expounded and criticized Rawls s main tenets from perspectives as diverse as egalitarianism left and right libertarianism and the ethics of care This volume of essays provides a general overview of the main strands in contemporary justice theorising and features the most important and influential theories of justice from the post Rawlsian era These theories range from how to build a theory of justice and how to delineate its proper scope to the relationship between justice and equality justice and liberty and justice and desert Also included is the critique of the Rawlsian paradigm especially from feminist perspectives and from the growing strand of non ideal theory as well as consideration of more recent developments and methodological issues

The Psychology of Restorative Justice Theo Gavrielides,2016-02-24 This ground breaking collection dares to take the next step in the advancement of an autonomous inter disciplinary restorative justice field of study It brings together criminology social psychology legal theory neuroscience affect script psychology sociology forensic mental health political sciences psychology and positive psychology to articulate for the first time a psychological concept of restorative justice To this end the book studies the power structures of the restorative justice movement the very psychology motivations and emotions of the practitioners who implement it as well as the drivers of its theoreticians and researchers Furthermore it examines the strengths and weakness of our own societies and the communities that are called to participate as parties in restorative justice Their own biases hunger for power and control fears and hopes are investigated The psychology and dynamics between those it aims to reach as well as those who are funding it including policy makers and politicians are looked into All these questions lead to creating an understanding of the psychology of restorative justice The book is essential reading for academics researchers policymakers practitioners and campaigners

**Collected Papers of Kenneth J. Arrow: Social choice and justice** Kenneth Joseph Arrow,1983 Arrow takes up the basic question of whether collective choices can reflect individual preferences The seminal 1950 paper that opens the volume shows that given reasonable conditions that social choices must satisfy to reflect individual preferences it is impossible to make a choice among alternatives without violating some of the conditions
