The Economics Of Saving And Growth Theory Evidence And Implications For Policy:

The Economics of Saving and Growth Klaus Schmidt-Hebbel, Luis Servén, 1999-05-13 A look at major research and policy issues surrounding saving across the world first published in 1999 **Real Exchange Rates, Saving and Growth:** Peter J. Montiel, Luis Servén, 2009 *Growth and Development in the Global Economy* Harry Bloch, 2003 What are the forces behind the increasing globalization of economic life How does globalization affect the functioning of national economies What difficulties confront government policymakers in dealing with the global economy These issues are addressed in this volume by leading specialists The contributors present a range of unique and varied perspectives from which they consider aspects of the increasing integration of economic life exploring implications for the functioning of domestic markets in a rapidly changing global economy The result is a collection of insights that provide a framework for understanding globalization as an economic phenomenon The Composition of Growth Matters for Poverty Alleviation Norman Loayza, Claudio E. Raddatz, 2006 This paper contributes to explain the cross country heterogeneity of the poverty response to changes in economic growth It does so by focusing on the structure of output growth The paper presents a two sector theoretical model that clarifies the mechanism through which the sectoral composition of growth and associated labor intensity can affect workers wages and thus poverty alleviation Then in presents cross country empirical evidence that analyzes first the differential poverty reducing impact of sectoral growth at various levels of disaggregation and the role of unskilled labor intensity in such differential impact The paper finds evidence that not only the size of economic growth but also its composition matters for poverty alleviation with the largest contributions from labor intensive sectors such as agriculture construction and manufacturing The results are robust to the influence of outliers alternative explanations and various poverty measures **International Handbook of Development Economics** Amitava Krishna Dutt, Jaime Ros, 2008-01-01 The essays are concise yet comprehensive and each essay contains a substantial set of references which an interested researcher or student could follow up In addition to representing multidisciplinary interactions this collection encompasses several different perspectives within development economics so the reader can learn for example both about neoclassical approaches and dependency theories in the same volume This makes the collection unique and all the more valuable This is a very good reference collection as the individual essays are informative and provide a good overall perspective on the topic that they set out to address The extensive bibliography at the end of each essay adds further value to this collection Ashwini Deshpande *Economic and Political Weekly* These new volumes impress along two dimensions First they highlight important connections between economic development and variables such as culture warfare and ethnicity which are sometimes ignored by mainstream economists Second they analyze the economic development experience of different regions such as Africa Latin America and East Asia a valuable reference for scholars and practitioners in the field Highly recommended H A Faruq *Choice* This two volume original reference work provides a comprehensive overview of development economics and

comprises contributions by some of the leading scholars working in the field. Authors are drawn from around the world and write on a wide range of topics. After providing an introduction to the subject by examining issues like the meaning and measurement of development, historical and interdisciplinary approaches, empirical regularities and data problems, the contributors provide a wealth of perspectives on and analyses of development economics. They discuss alternative approaches to development, the macroeconomics of growth factors and sources of economic development such as capital, labor, entrepreneurship, resources and technology, major sectors of concern such as agriculture, industry, services and the informal sector, and international issues such as trade, capital and labor flows and technology transfers. Income distribution and poverty, the state and other institutions, and actual development experiences are explored. The contributors provide analytical contributions as well as the relation between these contributions and real world and policy issues from a variety of alternative perspectives. Scholars, students, policymakers and other development practitioners will all find this comprehensive reference invaluable.

The Economics of Saving James H. Gapinski, 2013-03-09. This book began when a letter reached my desk in November 1989. Written by Warren Samuels, professor of economics at Michigan State University and editor for Kluwer Academic Publishers, the letter reviewed the philosophy behind Kluwer's series on recent economic thought and accordingly expressed interest in the controversies that surround contemporary topics in the

discipline It graciously went on to invite me to organize consonant with that philosophy a volume of chapters on saving Soon thereafter I learned that the chapters were to be original compositions I also learned that I would have substantial flexibility in structuring the volume and in recruiting contributors who logically would be authorities in the field Succinctly Samuels was inviting me to work with leading scholars in exploring the current controversies in saving one of my favorite subjects That invitation was simply too tempting to refuse Preparation of the book s outline went smoothly It was obvious that the statistics of saving should be covered along with the theories of saving It was equally obvious that special issues must be addressed Ricardian Equivalence supply side doctrine and economic development among others These themes should be handled so as to bring out the ideological tensions in the profession and that criterion helped to shape the list of potential contributors That is both sides of a conflict should be represented and both should be given the same treatment

International Trade and Economic Development Rajat Acharyya, Saibal Kar, 2014 This graduate textbook offers advanced and contemporary readings in international trade and economic development and provides an overview of the fundamental topics in this area It brings together many of the issues that are considered staple reading for a course in trade and development and it offers a systematic coverage of the relevant and state of the art research on various aspects of the subject This includes detailed analysis of important sub topics such as trade and labour market trade and public economics the theory of the second best foreign aid factor mobility and regional and global welfare It also covers international trade and labour standards the informal labour market and TRIPS Aimed at post graduate students interested in trade theory and applications in development issues this book should also prove a valuable resource for practicing economists policy makers and advanced undergraduate students studying international trade The text balances extensive coverage of available literature in the area with substantive inclusions from new research published in leading journals and volumes It aims to fill the gap in the teaching resources and should promote further theoretical and empirical research in the subject

Contemporary Issues in Development Finance Joshua Yindenaba Abor, Charles Komla Delali Adjasi, Robert Lensink, 2020-12-29 Contemporary Issues in Development Finance provides comprehensive and up to date coverage of theoretical and policy issues in development finance from both the domestic and the external finance perspectives and emphasizes addressing the gaps in financial markets The chapters cover topical issues such as microfinance private sector financing aid FDI remittances sovereign wealth trade finance and the sectoral financing of agricultural and infrastructural projects Readers will acquire both breadth and depth of knowledge in critical and contemporary issues in development finance from a philosophical and yet pragmatic development impact approach The text ensures this by carefully integrating the relevant theoretical underpinnings empirical assessments and practical policy issues into its analysis The work is designed to be fully accessible to practitioners with only a limited theoretical economic background allowing them to deeply engage with the book as useful reference material Readers may find more advanced information and technical details

provided in clear concise boxes throughout the text Finally each chapter is fully supported by a set of review questions and by cases and examples from developing countries particularly those in Africa This book is a valuable resource for both development finance researchers and students taking courses in development finance development economics international finance financial development policy and economic policy management Practitioners will find the development impact policy and conceptual analysis dimensions insightful analysing and designing intervention strategies

The Limits of Choice

Sahra Wagenknecht,2013-10-02 In *The Limits of Choice* Sahra Wagenknecht examines household saving decisions and basic needs in Germany and the United States based on official data from both countries from the 1950s to present day Arguing against the hypothesis that assumes consumers optimize their consumption intertemporally based exclusively on their permanent or lifetime income Wagenknecht proposes a rule of thumb according to which consumers will save if their current income exceeds basic expenditure while they will demand credit when income can no longer meet basic needs
