**The Education of Free Men** Ernest Oscar Melby,1955     Horace Mann Lecture ,1962     An Historical Introduction to American Education Gerald L. Gutek,2012-09-18 Guteks classic volume on the history of American education has been thoroughly revised and updated to provide a twenty first century perspective on the development of American educational institutions Like earlier editions the well researched Third Edition employs a topical approach to examine the evolution of key institutions like the common school and the high school as well as significant movements like progressive education racial desegregation and multiculturalism Primary source readings enhance and reinforce chapter content and feature new writings from Benjamin Rush Horace Mann Maria Montessori W E B Du Bois John Dewey and Jane Addams Two new chapters add depth to this comprehensive richly illustrated work Immigration Multiculturalism and Education examines the response of public schools to the education of immigrant children in the context of Americas industrialization and urbanization This compelling addition also looks at the changing demographics of immigration and discusses the experiences and contributions of Hispanic Americans and Asian Americans Progressive Education and John Dewey explores the origins of progressive education the philosophies of John Dewey and other leading progressive educators and this movements ongoing influence in American classrooms The Third Editions topical organization lends itself to multiple uses in the classroom Each chapter provides the historical foundation for the study of a contemporary topic in education including the organization and structure of schools the philosophy of education early childhood education curriculum and instruction multicultural and bilingual education and educational policy     *The Fractured Schoolhouse* Neal P. McCluskey,2022-09-15 American public schooling was established to unify diverse people and prepare citizens for democracy Intuitively it would teach diverse people the same values preferably in the same buildings with the goal that they will learn to get along and uphold government by the people But intuition can be wrong significant evidence suggests that public schools have not brought diverse people together whether from legally mandated racial segregation espousing values many people could not accept or human beings simply tending to associate with others like themselves Indeed the basic reality that people have diverse values and desires has rendered public schooling not a unifying force but a battleground That public schooling is necessary for democracy is also not supported both because we do not have a commonly agreed upon definition of democracy and because public schooling violates the bedrock American value liberty that democracy is supposed to protect The Fractured Schoolhouse Reexamining Education for a Free Equal and Harmonious Society proposes that to fulfill the mission of public schooling we need what some might call its opposite school choice Education grounded in liberty would enable diverse people to pursue curricula and policies they think are right without having to impose them on others and by making separated groups equals and easing the creation of new identities it would foster bridge building     **The SAGE Handbook of Educational Leadership** Fenwick W.
