The Effortless Economy of Science? Philip Mirowski, 2004 A compilation of essays by the author that reveals the value for science studies of examples arising within the history of economics      The Life of Sir Thomas Fowell Buxton David Bruce, 2013-12-05 The social conscience of Sir Thomas Fowell Buxton 1786 1845 developed as he operated a brewery in Spitalfields nineteenth century London s poorest parish His interest and research on penal discipline brought him national prominence and led to a parliamentary career that lasted nearly two decades Buxton s association with noted activist William Wilberforce led to his own involvement in the anti slavery movement a cause he fiercely championed resulting in Britain s abolition of slavery in 1834 Buxton s involvement in the disastrous 1841 Niger expedition effectively ended his public career and paved the way to British imperialism in Africa A man of many interests Buxton also supported Catholic emancipation and ending the Hindu suttee Few nineteenth century social reformers have had as much of an impact or have cast as long a shadow as Buxton At the time of his death many saw him as the epitome of Christian activism yet today Buxton remains largely ignored and forgotten David Bruce examines the life of one of Great Britain s most prominent social activists Using his personal papers and the papers and books of his friends associates and contemporaries The Life of Sir Thomas Fowell Buxton paints a portrait of a unique individual driven to improve his world      **Value Practices in the Life Sciences and Medicine** Isabelle Dussauge, Claes-Fredrik Helgesson, Francis Lee, 2015 This book provides a compelling scholarly statement about the interrelation and pliability of values in the life sciences medicine and health care The volume aims to aid our understanding of the roles of power knowledge production and economic action in the heavily scientised and economised areas of life science and medicine      *Reproductive Labor and Innovation* Jennifer Denbow, 2024-09-27 In *Reproductive Labor and Innovation* Jennifer Denbow examines how the push toward technoscientific innovation in contemporary American life often comes at the expense of the care work and reproductive labor that is necessary for society to function Noting that the gutting of social welfare programs has shifted the burden of solving problems to individuals Denbow argues that the aggrandizement of innovation and the degradation of reproductive labor are intertwined facets of neoliberalism She shows that the construction of innovation as a panacea to social ills justifies the accumulation of wealth for corporate innovators and the impoverishment of those feminized and racialized people who do the bulk of reproductive labor Moreover even innovative technology aimed at reproduction such as digital care work platforms and noninvasive prenatal testing obscure structural injustices and further devalue reproductive labor By drawing connections between innovation discourse the rise of neoliberalism financialized capitalism and the social and political degradation of reproductive labor Denbow illustrates what needs to be done to destabilize the overvaluation of innovation and to offer collective support for reproduction      Enacting Dismal Science Ivan Boldyrev, Ekaterina Svetlova, 2016-07-14 In this book sociologists philosophers and economists investigate the conceptual issues around the performativity of economics over a variety of disciplinary contexts and provide

new case studies illuminating this phenomenon In featuring the latest contributions to the performativity debate the book revives discussion of the fundamental questions What precise meaning can we attribute to the notion of performativity What empirical evidence can help us recognize economics as performative And what consequences does performativity have for contemporary societies The contributions demonstrate how performativity can serve as a powerful conceptual resource in dealing with economic knowledge as an inspiring framework for investigating performative practices and as an engine of discovery for thinking of the economic proper

**Bruno Latour** Kyle McGee,2014-06-23 The first extended study of Bruno Latour s legal theory this book presents a critical reconstruction of the whole of Latour s oeuvre to date from *Laboratory Life* to *An Inquiry into the Modes of Existence* Based on the powerful insights into normative effects that actor network theory makes possible the book advances a new theory of legal normativity and the force of law rethinking Latour s work on technology the image and referential scientific inscriptions among others and placing them within the ambit of legality The book also captures and deepens the contrast between the modern legal institution and the value of law as a mode of existence and provides a fulsome theoretical account of legal veridiction Throughout Latour s thought is put into dialogue with important progenitors and adversaries as well as historical and contemporary strands of legal and political philosophy But the thread of legality is not confined to Latour s reflections on the making of law rather it cuts through the whole of his highly diverse body of work The empire of mononaturalism augured by modern philosophies of science is thoroughly juridical as such the actor network theory that promises to undo that empire by freeing the value of the sciences from its epistemological clutches is unthinkable without the device of the trial and the descriptive semiotics of normativity that sustain ANT The democratization of the sciences and the vibrancy of ecologized politics that become possible once the bifurcation of nature into essential primary and disposable secondary qualities is disabled and once the modern Constitution is called into doubt also have important legal dimensions that have gone largely unexamined Bruno Latour *The Normativity of Networks* remedies this and other omissions evaluating Latour s thought about law while carrying it in striking new directions This book introduces legal scholars and students to the thought of the philosopher and sociologist Bruno Latour whilst also presenting a critical analysis of his work in and around law This interdisciplinary study will be of interest to those researching in Law Philosophy and Sociology

McKenzie Wark, 2015-04-21 In *Molecular Red* McKenzie Wark creates philosophical tools for the Anthropocene our new planetary epoch in which human and natural forces are so entwined that the future of one determines that of the other Wark explores the implications of Anthropocene through the story of two empires the Soviet and then the American The fall of the former prefigures that of the latter From the ruins of these mighty histories Wark salvages ideas to help us picture what kind of worlds collective labor might yet build From the Russian revolution Wark unearths the work of Alexander Bogdanov Lenin s rival as well as the great Proletkult writer and engineer Andrey Platonov The Soviet experiment emerges from the past as an allegory for the new organizational challenges of our time From deep within the Californian military entertainment complex Wark retrieves Donna Haraway s cyborg critique and science fiction writer Kim Stanley Robinson s Martian utopia as powerful resources for rethinking and remaking the world that climate change has wrought *Molecular Red* proposes an alternative realism where hope is found in what remains and endures      Legacies, Logics, Logistics Jane I.

Guyer, 2016-05-27 *Legacies Logics Logistics* brings together a set of essays written both before and after the financial crisis of 2007-08 by eminent Africanist and economic anthropologist Jane I Guyer Each was written initially for a conference on a defined theme When they are brought together and interpreted as a whole by Guyer these varied essays show how an anthropological and socio historical approach to economic practices both in the West and elsewhere can illuminate deep facets of economic life that the big theories and models may fail to capture Focusing on economic actors whether ordinary consumers or financial experts Guyer traces how people and institutions hold together past experiences legacies imagined scenarios and models logics and situational challenges logistics in a way that makes the performance of economic life on platforms made of these legacies logics and logistics work in practice Individual essays explore a number of topics including time frames and the future the use of percentages in observations and judgments the explanation of prices the coexistence of different world currencies the reapplication of longtime economic theories in new settings and crucially how we talk about the economy how we use stable terms to describe a turbulent system Valuable as standalone pieces the essays build into a cogent method of economic anthropology      **Handbuch Wissenschaftssoziologie** Sabine Maassen, Mario Kaiser, Martin

**Behemoth** Irving Horowitz, 2017-10-19 The title Behemoth derives from the Hebrew word Behemah a beast an enormous creature monstrously huge and vast It is an apt description of the State on the eve of the twenty first century Loved by few vilified by many from all perspectives it nonetheless continues to grow by turns rivaling and co-opting that more pleasant sounding word Society Political sociology aims to define and understand the interrelationship between these two huge terms State and Society Continuing in a path begun by Horowitz in the 1950s in *The Idea of War and Peace in Contemporary Social and Philosophical Thought* expanded upon in the 1970s with *Foundations of Political Sociology* this summing up in the late 1990s is an effort to extract and evolve the canon of political sociology Starting with Montesquieu Horowitz proceeds through the European experience of Rousseau Tocqueville Hegel Marx Durkheim Sorel and Weber He then takes the field on its tangled migration to America with the Frankfurt School in exile followed by searching chapters on Schumpeter Mills Arendt and Huntington among others The result is a stunning

reevaluation of the intellectual sources of the present day divisions between statist and socialist welfarists and individualists advocates of dictatorship and of democracy mandated rules and voluntary association hard realists and soft utopians a world without states and a world with a single state Horowitz does not offer the usual evolutionary notion of doctrines but a canon embedded in and embattled with the societies they aim to serve or overthrow in the present as in the past The result is a major recasting of the theory and practice of social science and normative frameworks The final chapter offers Horowitz's own prognosis of what we can expect in the recasting of the Welfare State to include the Welfare Society and its growing nemesis the global economy which threatens to engulf State and Society alike in a return to civilizational concerns This is an essential text for policy makers and social scientists interested in macroscopic changes in the political order [The Oxford Handbook of Evolutionary Psychology and Religion](#) James R.
