The Egoist A Play:

The Egoist George Meredith,1981 **The Egoist** Lester Heller,1947 **The Egoist** ,1967 The egoist George Meredith,1906 The egoist George Meredith,2023-06-25 Comedy is a game played to throw reflections upon social life and it deals with human nature in the drawing room of civilized men and women where we have no dust of the struggling outer world no mire no violent crashes to make the correctness of the representation convincing Credulity is not wooed through the impressionable senses nor have we recourse to the small circular glow of the watchmaker s eye to raise in bright relief minutest grains of evidence for the routing of incredulity The Comic Spirit conceives a definite situation for a number of characters and rejects all accessories in the exclusive pursuit of them and their speech For being a spirit he hunts the spirit in men vision and ardour constitute his merit he has not a thought of persuading you to believe in him Follow and you will see But there is a question of the value of a run at his heels Now the world is possessed of a certain big book the biggest book on earth that might indeed be called the Book of Earth whose title is the Book of Egoism and it is a book full of the world s wisdom So full of it and of such dimensions is this book in which the generations have written ever since they took to writing that to be profitable to us the Book needs a powerful compression **The Egoist; A Comedy in Narrative** George Meredith,2025-09-01 Reproduction of the original The Antigonos publishing house specialises in the publication of reprints of historical books We make sure that these works are made available to the public in good condition in order to preserve their cultural heritage **The Egoist** Dora Marsden,Harriet Shaw Weaver,1967 Experiments in Environmental Economics Jason F. Shogren,2018-04-27 This title was first published in 2003 Over the decades experiential methods have become an established research tool in environmental economics Economists working in this area have realised that experimental methods from economics and other disciplines such as psychology and decision theory can be applied to gain insight into the behavioral underpinnings of environmental policy Economic experiments in the lab and field are an attractive tool to address the incentive and contextual questions that arise in environmental policy Experiments have been and continue to be designed to capture the key elements of market and non market choices to test theory for pattern recognition to testbed new institutions and to value public goods including environmental protection This volume collects the most significant papers in the literature that identify the underpinnings of experimental approaches are complemented by works that specifically address the use of experimental economics to identify choice under risk conflict cooperation environmental policy instruments and environmental valuation **The Beloved Self** Alison Hills,2010-04-29 The Beloved Self is about the holy grail of moral philosophy an argument against egoism that proves that we all have reasons to be moral Part One introduces three different versions of egoism Part Two looks at attempts to prove that egoism is false and shows that even the more modest arguments that do not try to answer the egoist in her own terms seem to fail But in part Three Hills defends morality and develops a new problem for egoism an epistemological problem She shows that it is not epistemically rational to believe

the most plausible versions of egoism The first part of the book will be most relevant to those interested in moral theory as it contains detailed discussions of recent interpretations of virtue ethics and especially of Kant's moral theory The second and third part of the book turn to epistemology particularly moral epistemology and include an account of the relationship between knowledge and action a new theory of moral understanding and a discussion of the epistemically rational response to various kinds of disagreement Hills also defends a new account of virtue and of morally worthy action

Learning to Kneel Carrie J. Preston, 2016-08-30 In this inventive mix of criticism scholarship and personal reflection Carrie J. Preston explores the nature of cross cultural teaching learning and performance Throughout the twentieth century Japanese noh was a major creative catalyst for American and European writers dancers and composers The noh theater's stylized choreography poetic chant spectacular costumes and masks and engagement with history inspired Western artists as they reimagined new approaches to tradition and form In Learning to Kneel Preston locates noh's important influence on such canonical figures as Pound Yeats Brecht Britten and Beckett These writers learned about noh from an international cast of collaborators and Preston traces the ways in which Japanese and Western artists influenced one another Preston's critical work was profoundly shaped by her own training in noh performance technique under a professional actor in Tokyo who taught her to kneel bow chant and submit to the teachings of a conservative tradition This encounter challenged Preston's assumptions about effective teaching particularly her inclinations to emphasize Western ideas of innovation and subversion and to overlook the complex ranges of agency experienced by teachers and students It also inspired new perspectives regarding the generative relationship between Western writers and Japanese performers Pound Yeats Brecht and others are often criticized for their orientalist tendencies and misappropriation of noh but Preston's analysis and her journey reflect a more nuanced understanding of cultural exchange

Reason and Morality Alan Gewirth,1978 Most modern philosophers attempt to solve the problem of morality from within the epistemological assumptions that define the dominant cultural perspective of our age Alan Gewirth s Reason and Morality is a major work in this ongoing enterprise Gewirth develops with patience and skill what he calls a modified naturalism in which morality is derived by logic alone from the concept of action I think that the publication of Reason and Morality is a major event in the history of moral philosophy It develops with great power a new and exciting position in ethical naturalism No one regardless of philosophical stance can read this work without an enlargement of mind It illuminates morality and agency for all E M Adams The Review of Metaphysics This is a fascinating study of an apparently intractable problem Gewirth has provided plenty of material for further discussion and his theory deserves serious consideration He is always aware of possible rejoinders and argues in a rigorous manner showing a firm grasp of the current state of moral and political philosophy Mind *The New Age* Alfred Richard Orage,Arthur Moore,1914 Faith and

Freedom Sven R. Larson,2019-07-29 As America approaches her 250th birthday she is also approaching a fork in the road The choice before us is moral and boils down to two terms liberty or social justice We cannot have both This book written by a Swedish immigrant lays out the moral case for returning America to the Christian libertarian values that the Founding Fathers wrote into the Declaration of Independence and the Constitution These values guarantee liberty and opportunity but they also require responsible citizenship in return In understanding the latter we can resurrect the former By contrast the failure to understand responsible citizenship and its critical role in defending liberty opens the door for America to

irrevocably change character Our country is already on the cusp of becoming a full fledged egalitarian welfare state defined not by liberty but by the endless pursuit of social justice As this book explains there is a path back to freedom one illuminated by faith paved with practical sensible policy reforms and traveled by people ready to exercise responsible citizenship
