questions whether or not they are all equally complex The topic of complexity has become a hot issue in recent years particularly in creole studies historical linguistics and language contact As McWhorter describes when languages came into contact over the years when French speakers ruled the English for a few centuries or the vikings invaded England a large number of speakers are forced to learn a new language quickly and this came up with a simplified version a pidgin When this ultimately turns into a real language a creole the result is still simpler and less complex than a non interrupted language that has been around for a long time McWhorter makes the case that this kind of simplification happens in degrees and criticizes linguists who are reluctant to say that for example English is simply simpler than Spanish for socio historical reasons He analyzes how various languages that seem simple but are not creoles actually are simpler than they would be if they had not been broken down by large numbers of adult learners In addition to English he looks at Mandarin Chinese Persian Malay and some Arabic varieties His work will interest not just experts in creole studies and historical linguistics but the wider community interested in language complexity

Languages in Jewish Communities, Past and Present Benjamin Hary, Sarah Bunin Benor, 2018-11-05 This book offers sociological and structural descriptions of language varieties used in over 2 dozen Jewish communities around the world along with synthesizing and theoretical chapters Language descriptions focus on historical development contemporary use regional and social variation structural features and Hebrew Aramaic loanwords The book covers commonly researched language varieties like Yiddish Judeo Spanish and Judeo Arabic as well as less commonly researched ones like Judeo Tat Jewish Swedish and Hebraized Amharic in Israel today

Studies in Arabic Syntax and Semantics Ariel A. Bloch, 1991 In view of the great upsurge of interest in syntax in recent years it is remarkable that there are so few studies of Arabic syntax and the works of a diachronic orientation are virtually nonexistent The main portion of this book is historical dealing with fundamental mechanisms of syntactic and semantic change Here Bloch has made a substantial contribution to the historical syntax of Arabic Throughout the book the phenomena are viewed from a broad perspective that takes into account evidence not only from all periods and genres of Arabic Ancient Poetic Koranic Classical Middle Modern Literary and Colloquial but also from other Semitic and occasionally non Semitic In the second printing are almost exclusively corrections of misprints and other minor alterations made
