Formulating development Lola Wilhelm, 2025-09-02 In the 1970s Nestl became a lightning rod for criticism against the food industry s negative impacts on humans and their environment especially in the Global South But what has so far eluded historical scrutiny is that the picture was more nuanced This book tells the exclusive story of how the Swiss food giant and more broadly corporate capitalism have shaped the aid industry since the late nineteenth century It follows Nestl s bid for a share of the humanitarian market brokered by the Red Cross in wartime Europe of its clinical trials in Swiss and Senegalese maternities and of its agricultural modernisation schemes in Mexico India and the Ivory Coast Based on extensive research in the firm s own historical archives and the records of national and international aid agencies the volume interrogates the legacies of this long history for international development today **The Politics of International Economic Relations**

Jeffrey A. Hart, Joan Edelman Spero, 2013-06-17 The first and definitive book of its kind Joan Spero s *The Politics of International Economic Relations* has been fully updated to reflect the sweeping changes in the international arena With the expertise of co author Jeffrey Hart the fifth edition strengthens the coverage of political and economic relations since the end of the Cold War economic polarization in developing nations and the roots of economic decline in centrally planned economies A new chapter on industrial policy and competitiveness debates further illustrates the changing dynamics of International Political Economy Ideal as a supplement to the International Relations course or as the core text in International Political Economy Spero and Hart s *The Politics of International Economic Relations* continues to give students the breadth and depth of scholarship needed to understand the politics of world economy *The Oxford Handbook of International Business* Alan M. Rugman, 2003 This handbook synthesises some literature of the last 40 years in 28 chapters The coverage is split into the following areas the history and theory of the multinational enterprise the political and policy environment of international business Big Business in China Sherman Cochran, 1980 This is the first major study in Chinese business history based largely on business s own records It focuses on the battle for the cigarette market in early twentieth century China between the British American Tobacco Company based in New York and London and its leading Chinese rival Nanyang Brothers Tobacco Company whose headquarters were in Hong Kong and Shanghai From its founding in 1902 the British American Tobacco Company maintained a lucrative monopoly of the market until 1915 when Nanyang entered China and extended its operations into the country s major markets despite the use of aggressive tactics against it Both companies grew rapidly during the 1920s and competition between them reached its peak but by 1930 Nanyang weakened bringing an end to serious commercial rivalry Though less competitive both companies continued to trade in China until their Sino foreign rivalry ended altogether with the founding of the People s Republic in 1949 Debate over international

commercial rivalries has often been conducted broadly in terms of imperialist exploitation and economic nationalism This study shows the usefulness and limitations of these terms for historical purposes and contributes to the separate but related debate over the significance of entrepreneurial innovation in Chinese economic history By analyzing the foreign Chinese companies business practices and by describing their involvement in diplomatic incidents boycotts strikes student protests relations with peasant tobacco growers dealings with the Kuomintang and Chinese Communist Party and a host of other activities the author brings to light the roles that big businesses played not only in China s economy but also in its politics society and foreign affairs

Family Multinationals Christina Lubinski,Jeffrey Fear,Paloma Fernández Pérez,2013-07-18

In contrast to widespread assessments that family enterprises lack sufficient resources and capabilities to go global many family companies are competing successfully in an increasingly globalized business environment Worldwide a large number of thriving multinationals are still family owned and or under family control While there is abundant literature on the phenomenon of globalization from many different disciplines neither the literature on multinationals nor the growing field of family business studies have systematically investigated family multinationals yet This volume is one of the first to deal explicitly with family multinationals and the role of the family in internationalization It situates itself at the crossroads of internationalization studies on the one hand and family business research on the other Why do families continue to play such a large role in some of the most prominent firms in emerging and mature economies How did they manage to maintain ownership control yet divest of unrelated business ventures How did they internationalize yet maintain control This book identifies the idiosyncratic strategies and structures of family multinationals in different countries and at different points in time A comparative historical and case study approach allows us to explore the role of the family through the firms various internationalization pathways and understand long term developments and path dependencies

American Firms in Europe Hubert Bonin,Ferry de Goey,2009 The Americanization of Europe and the strategic initiatives of American firms abroad have been well studied The expansion of American firms in Europe however lacked a comprehensive study This book gathers the works of two dozen economic and business historians from across Europe preceded by Mira Wilkins comparative essay The collection addresses the timetable and pace of American direct investment in Europe the patterns followed in each country according to the specificities of each industry and service sector and the strategies followed by the different firms The studies go beyond the facts scrutinizing the immaterial aspects of this business history especially European perceptions of American firms and the essential stakes of corporate images and identities The Europeanization of American firms is a key issue including social relations management commercial policies brand image connections and embeddedness The authors gauge the reaction of public authorities and lobbies industrialists and trade unions Graphs and tables provide data while overviews of ads published by American affiliates fuel analyses of consumer perception
