Kay, 2005-05-26 Examines the politics behind the funding of NASA *The Nuclear Spies* Vince Houghton, 2019-09-15 Why did the US intelligence services fail so spectacularly to know about the Soviet Union's nuclear capabilities following World War II As Vince Houghton historian and curator of the International Spy Museum in Washington DC shows us that disastrous failure came just a few years after the Manhattan Project's intelligence team had penetrated the Third Reich and knew every detail of the Nazi's plan for an atomic bomb What changed and what went wrong Houghton's delightful retelling of this fascinating case of American spy ineffectiveness in the then new field of scientific intelligence provides us with a new look at the early years of the Cold War During that time scientific intelligence quickly grew to become a significant portion of the CIA budget as it struggled to contend with the incredible advance in weapons and other scientific discoveries immediately after World War II As *The Nuclear Spies* shows the abilities of the Soviet Union's scientists its research facilities and laboratories and its educational system became a key consideration for the CIA in assessing the threat level of its most potent foe Sadly for the CIA scientific intelligence was extremely difficult to do well For when the Soviet Union detonated its first atomic bomb in 1949 no one in the American intelligence services saw it coming Experiment Station Record U.S. Office of Experiment Stations, United States. Vass Jr, James Vass Jr, 2003-05-13 This

book is a study of UW men's basketball fans during the 2001-2002 season and explores their proclivity to cheering for self during basketball events. The term basketball event is used rather than basketball game to make clear that everything connected to and seen, heard or experienced before, during and after a basketball game is included. The actual game itself is only part of the basketball event. An undercurrent runs throughout this participant observation mini-ethnography dealing with access and the relative quality of that access to basketball events being affected by one's age, class, race and gender. The prominent role of advertising in shaping basketball events and helping to construct fans as consumers of products both commercial and institutional during the process of cheering for self is central to this idea. Cheering for self is the activity engaged in by individual fans after they find things to identify or connect with through personal investment. Fans cheer for self indirectly. Fans cheer for the team that they identify with. Through the process of cheering for self while attending the basketball event, people are taught how to become fans, to consume a UW product, the basketball event and to consume advertisers' products. People have a tendency to spend their entire life trying to impress others.

Management Ideas

Klaus Brockhoff, 2022-09-01. This book offers a short history of business administration in four parts. Part 1 takes the reader from 8000 BCE with the development of simple control techniques to the middle of the nineteenth century. At this time, normative, empirical and theoretical approaches to business problems in the industrial area were developed. Furthermore, more powerful methodologies came into use. In Part 2, the criteria for science are discussed and related to the development of business administration as a science at the beginning of the twentieth century. Part 3 demonstrates using Germany as an example, the development of business administration as strongly influenced by its societal environment. The cases of National Socialist Germany, the socialist environment of the German Democratic Republic and the reconstruction of an academic-inspired business administration in Western Germany are provided as illustrative examples. Part 3 also presents a typology of major specializations in business administration, examples of their development and a proposal for a curricular approach to the discipline. The fourth and final part presents the benefits of studying the history of management ideas. This book is useful for academics in business administration, advanced students and anyone who seeks to understand recent developments in business administration.
