The Changing Status Of The Blind From Separation To Integration:

The Changing Status of the Blind Berthold Lowenfeld,1975 INTRODUCTION TO THE SOCIAL HISTORY OF BLINDNESS AND CONTEMPORARY DEVELOPMENTS *The Changing Status of the Blind* Berthold Lowenfeld,1975

Woeful Afflictions Mary Klages,2016-11-11 From Tiny Tim to Helen Keller disabled people in the nineteenth century were portrayed in sentimental terms as afflicted beings whose sufferings afforded able-bodied people opportunities to practice empathy and compassion In all kinds of representations of disability from popular fiction to the reports of institutions established for the education and rehabilitation of disabled people the equation of disability and sentimentality served a variety of social functions from ensuring the continued existence of a sympathetic sensibility in a hard hearted market driven world to asserting the selfhood and equality of disabled adults Unique in its focus on blindness and its examination of the interplay between institutional discourse and popular literature Woeful Afflictions offers a detailed historical analysis of the types of cultural work performed by sentimental representations of disability in public reports and lectures exhibitions novels stories poems autobiographical writings and popular media portrayals from the 1830s through the 1890s in the United States Woeful Afflictions combines contemporary scholarship on sentimentalism with the most recent works on the cultural meanings of disability to argue that sentimentalism with its emphasis on creating emotional identifications between texts and readers both reinforces existing associations between disability and otherness and works to rewrite those associations in portraying disabled people in their emotional capacities as no different from the able-bodied This book will interest anyone concerned with disability studies and the social construction of the body with the history of education and of public institutional care in the United States and with autobiographical writings **Discourses on Disability** Anju Sosan

George,2023-03-31 Discourses on Disability bridges academic and personal voices from India to address the diverse and fluid conversations on disability It seeks to critically engage with the concept of being disabled attempting to deconstruct ableism while advocating for inclusive politics Narratives from people with bipolar disorder autism and locomotor disabilities serve to examine how it feels to exist in a world conditioned by deep seated cultural taboos about disability The chapters in this book show how India still has a systemic silence about people with disabilities **Self-esteem and Adjusting with Blindness**

Dean W. Tuttle,Naomi R. Tuttle,2004 This new and expanded Third Edition analyzes blindness within the context of two overlapping theoretical constructs the development of self esteem and the process of adjusting to social and or physical trauma The book is divided into four sections The first section provides an overview of blindness and the essential background for subsequent discussions Section II explores the general theoretical model for the development of self esteem common to all persons and analyzes the impact that blindness imposes upon this model Section III explores the process of coping with social and physical traumas or crises Section IV is addressed primarily to members of the blind person's support team and provides suggestions for creating a climate for optimum development Factors that may influence the adjustment

process descriptions of external and internal sources of self esteem activities for stimulating affective growth and guidelines for professionals who work with the blind are included Personal impacts and psychosocial implications of blindness are discussed in depth and illustrated with biographical and autobiographical statements by more than 50 blind men and women This book will serve as an excellent review and refresher for experienced practitioners and administrators working in the field of blindness Professionals in education social work vocational counseling rehabilitation recreation therapy ophthalmology and optometry will find this comprehensive resource to be an invaluable addition to their libraries

Psychological Evaluation of the Developmentally and Physically Disabled Jean-Pierre Fouque, Vincent B. Van Hasselt, 2013-06-29 The past decade has witnessed a considerable upsurge of clinical and research interest in the problems of developmentally and physically the fields of psychology disabled persons Indeed professionals from special education rehabilitation psychiatry and social work have all directed attention to the development and implementation of evaluation and remedial programs The heightened activity in this area is in part a result of early assessment research with these popUlations which provided preliminary evidence of difficulties in social and emotional adjustment in many disabled individuals In response to these findings many intervention efforts have been implemented to deal with these issues and improve the life situation of the disabled Also there were indications that developmentally and physically disabled children often were deprived of adequate educations As a result legal and legislative initiatives have been enacted in recent years to make public education available to all students irrespective of disability Central to all therapeutic and psychoeducational endeavors with the disabled is psychological evaluation Only through careful and com prehensive psychological evaluation can areas of deficit as well as strengths be identified Once treatment targets and goals have been ascertained psychological evaluation is needed to determine the efficacy of intervention strategies However the field of psychological evalua tion in general and with disabled persons in particular has become highly specialized This is largely a function of the changing roles of psychological evaluators

SOCIAL AND CULTURAL PERSPECTIVES ON BLINDNESS C. Edwin Vaughan, Fredric K. Schroeder, 2018-03-01 The central idea of this book is that blindness itself results in no particular social arrangement as a cultural pattern People are socialized to expect ideas about appropriate behavior for blind people and these vary from culture to culture The descriptions of blindness in several different cultures are the authors firsthand observations as outsiders visiting different cultures interviewing individuals as well as extensive reviewing of written sources The text describes different perspectives regarding blindness and the social arrangements created for and by

blind people The viewpoints of blind people themselves receive prominent attention in the book The text is critical in its perspective Its purpose is to analyze patterns of domination and subordination as they take various forms in different cultures including physical condition Major discussions include Why study rehabilitation and blindness from a cross cultural perspective Cultural perspectives on blindness Producing new images about blindness Blindness in the United States From isolation to full inclusion Blindness in Africa Blind people in the Middle Kingdom and the People s Republic of China Spain s unique Organizacion Nacional de Ciegos Espanoles and the Changing culture of blindness around the world The book strives to contribute to the social sciences and the study of behavior that is considered deviant or different It also seeks to stimulate interest in cross national and cross cultural studies of blindness and contributes to the development of a broader and richer understanding about blindness for those who provide education rehabilitation and employment services Finally the book strives to aid blind people who are reflective about their own situation and who are working to make it better *The Lighthouse Handbook on Vision Impairment and Vision Rehabilitation* Barbara Silverstone,2000-04-13 This comprehensive reference source is a state of the art guide to the scientific clinical rehabilitative and policy aspects of vision impairment and blindness More than 100 original contributions from physicians therapists rehabilitation specialists and policy makers cover everything from the basic science of vision and its diseases to assistive technologies treatment and care **Catalog of Copyright Entries.
