The Characteristics of Parallel Algorithms Leah H. Jamieson, Dennis Gannon, Robert J. Douglass, 1988 **Computer Algebra in Scientific Computing** Vladimir P. Gerdt, Wolfram Koepf, Werner M. Seiler, Evgenii V. Vorozhtsov, 2016-09-08

This book constitutes the proceedings of the 18th International Workshop on Computer Algebra in Scientific Computing CASC 2016 held in Bucharest Romania in September 2016 The 32 papers presented in this volume were carefully reviewed and selected from 39 submissions They deal with cutting edge research in all major disciplines of Computer Algebra

SIAM Journal on Scientific Computing ,1994 The Publishers' Trade List Annual ,1995 **Parallel and Distributed Processing and Applications** Jiannong Cao, 2004-12-02 This book constitutes the refereed proceedings of the Second International Symposium on Parallel and Distributed Processing and Applications ISPA 2004 held in Hong Kong China in December 2004 The 78 revised full papers and 38 revised short papers presented were carefully reviewed and selected from 361 submissions The papers are organized in topical sections on parallel algorithms and systems data mining and management distributed algorithms and systems fault tolerance protocols and systems sensor networks and protocols cluster systems grid applications and systems peer to peer and ad hoc networking grid scheduling and algorithms data replication and caching software engineering and testing grid protocols context aware and mobile computing distributed routing and switching protocols cluster resource scheduling and algorithms security high performance processing networking and protocols artificial intelligence systems hardware architecture and implementations high performance computing architecture and distributed systems architecture **Publishers Trade List Annual, 1992** ,1992 **Zentropy** Zi-Kui Liu, 2024-08-23 This book compiles selected publications authored or co authored by the editor to present a comprehensive understanding of following topics 1 density functional theory and CALPHAD modeling 2 computational tools and 3 applications of computational thermodynamics It is noted that while entropy at one scale is well represented by standard statistical mechanics in terms of probability of individual configurations at that scale the theory capable of counting total entropy of a system from different scales is lacking The zentropy theory provides a nested form for configurational entropy enabling multiscale modeling to account for disorder and fluctuations from the electronic scale based on quantum mechanics to the experimental scale based on statistical mechanics using free energies of individual configurations rather than their total energies in standard statistical mechanics The predictions from the zentropy theory demonstrate remarkable agreements with experimental observations for magnetic transitions and associated emergent behaviors of strongly correlated metals and oxides including singularity and instability at critical points and positive and negative thermal expansions without the need of additional truncated models and fitting model parameters beyond density function theory This paves the way to provide the predicted phase equilibrium data for high throughput predictive CALPHAD modeling of complex material systems and those individual configurations may thus be considered as the genomic building blocks of

individual phases in the spirit of Materials Genome **Australian Computer Journal** ,1994 Notices of the American Mathematical Society American Mathematical Society,1993 **Logic Colloquium 2000 (hardcover)** Rene Cori,Alexander Razborov,Stevo Todorcevic,Carol Wood,2005-04-25 This compilation of papers presented at the 2000 European Summer Meeting of the Association for Symbolic Logic marks the centennial anniversary of Hilbert's famous lecture Held in the same hall at La Sorbonne where Hilbert first presented his famous problems this meeting carries special significance to the Mathematics and Logic communities
