Men and Menswear Laura Ugolini,2017-03-02 Despite increasing academic interest in both the study of masculinity and the history of consumption there are still few published studies that bring together both concerns By investigating the changing nature of the retailing of menswear this book illuminates wider aspects of masculine identity as well as patterns of male consumption between the years 1880 and 1939 While previous historical studies of masculinity have focused overwhelmingly on the moral spiritual and physical characteristics associated with notions of manliness this book considers the relationship between men and activities which were widely considered to be at least potentially unmanly selling as well as buying clothes thus shedding new light on men s lives and identities in this period

Men in the Mirror Tim Edwards,2016-10-06 In recent decades the myth of fashionable women and sartorially challenged men has been overturned not least through the proliferation of men s style magazines such as GQ and the emergence of masculinity as a marketing tool In this engaging book Edwards applies a sociological approach to our understanding of men s fashion which he argues is

significant in the nexus of masculinity and society past and present rather than a narrow artistic or aesthetic interest Rejecting an essentialist or natural origin Edwards explores how masculinity and men's fashion are constructed particularly in relation to consumer society It is the growing commodification and aestheticism of everyday life alongside developments in marketing and advertising that Edwards identifies as the catalyst in the emergence of men's fashion rather than an abstract crisis of masculinity or new man identity Concurrently in the 1980s changes in demography economics and ideology gave certain men greater freedom and spending power than ever before Edwards investigates how these men clearly distinguished by age class and sexual orientation were seduced by advertisers with sexualised images of suited city gents and body beautiful boys in Levis and how the resultant process of consumption was facilitated through developments in the practice of shopping itself such as easy access to credit He examines the influence of the advertisers message in creating a hierarchy of masculinity in which some men are valorised and others are denigrated Starting with a historical review of men's fashion and a discussion of its importance and meanings Edwards goes on to analyse the contemporary marketing of menswear and masculinity in advertising and in the media and considers the politics of fashion for men in terms of gender class race and sexuality
