craftsmen of their time come from a broad spectrum of backgrounds each contributing to the anthology's overarching theme with their unique flavor of apocalypse. These writers are not just storytellers but visionaries who collectively paint a multifaceted picture of humanity at the brink. They belonged to and were influenced by a range of historical, cultural, and literary movements from the romanticism and transcendentalism of the 19th century to the early 20th century's modernism and the budding science fiction genre. Their combined works offer a historical capsule of societal anxieties and hopes reflecting on themes of human resilience, the abuse of technology, and the moral dilemmas of progress. **DAWN OF THE APOCALYPSE** is an essential collection for readers eager to dive into the depths of human imagination faced with its own end. The Mantle and Core R.W. Carlson, 2005-11-22. Though largely inaccessible, the geochemistry of Earth's mantle and core can be examined through a wide variety of approaches. Volume 2 focuses first on remote sensing using evidence from cosmochemical, seismic, petrologic, and geochemical approaches. Mantle composition is then examined in detail through descriptions of mantle samples brought to Earth's surface through tectonic, volcanic, and volatile outgassing processes. The volume concludes with examination of processes that modify the composition of the mantle and core, including an early magma ocean, partial melting, element partitioning between minerals and melts, and physical mixing caused by plate subduction, mantle convection, and mass exchange between mantle and core. Reprinted individual volume from the acclaimed *Treatise on Geochemistry*, 10 Volume Set, ISBN 0 08 043751 6, published in 2003. Comprehensive and authoritative scope and focus. Reviews from renowned scientists across a range of subjects, providing both overviews and new data, supplemented by extensive bibliographies. Extensive illustrations and examples from the field.
