**The Eastern Front** James GRANDSEN,1989      **Yugoslavian armored units 1940-1945** Paolo Crippa,Luigi Manes,2020-05-07 This volume tells the almost unknown story of Yugoslav tankers from training to the Second World War The formation of the first armored units of the Army of the Kingdom of Yugoslavia dates back to the late 1920s when military authorities felt the need to equip the units with an armored component on the basis of the experiences lived during the Great War by the armies engaged in trench warfare Contrary to what happened with many other European armies at that time these armored units did not develop as an extension of the cavalry divisions but were instead formed as independent departments officially called Combat Units With these departments the Kingdom of Yugoslavia faced the Second World War After the Italian German invasion of 1941 Independent Croatia and Slovenian collaborative forces formed armored units employed in the anti partisan struggle and the Wehrmacht formed 3 Armored Divisions formed by Croatian volunteers

*Soviet Tanks in Manchuria 1945* William E. Hiestand,2023-03-16 A new illustrated study of the devastating but little known Soviet armored blitzkrieg against the Japanese in the last weeks of World War II and how it influenced Soviet tank doctrine as the Cold War dawned Although long overshadowed in the West by the dropping of the atomic bombs on Hiroshima and Nagasaki the USSR s lightning strike into Manchuria in August 1945 was one of the most successful and unique campaigns of the era Soviet forces led by over 5 500 tanks and self propelled guns attacked across huge distances and deserts marshes and mountains to smash Japan s million strong Kwantung Army in a matter of days Japanese forces were short of training and equipment but nevertheless fought fiercely inflicting 32 000 casualties on the Soviets Red Army operations were characterized by surprise speed and deep penetrations by tank heavy forces born of the brutal lessons they had learned during years fighting the Wehrmacht Lessons from the campaign directly shaped Soviet Cold War force structure and planning for mechanized operations against the West Illustrated with contemporary artwork and rare photos from one of the best collections of Soviet military photos in the West this fascinating book explains exactly how the last blitzkrieg of World War II was planned fought and won and how it influenced the Red Army s plans for tank warfare against NATO in Europe      **Hitler's War in the East, 1941-1945** Rolf-Dieter Müller,Gerd R. Ueberschär,2002 Provides a guide to the extensive literature on the war in the East including largely unknown Soviet writing on the subject Sections on policy and strategy the military campaign the ideologically motivated war of annihilation in the East the occupation and coming to terms with the results of the war offer a wealth of bibliographic citations and include introductions detailing history of the period and related issues For military historians and for scholars who approach this period in history from a socio economic or cultural perspective No index Annotation copyrighted by Book News Inc Portland OR      *Soviet Tanks at Kursk 1943* William E. Hiestand,2024-12-19 Illustrated throughout this book explains the composition and qualities of the Soviet tank force that fought Germany s mighty Panzers at the biggest tank battle in history In the summer of 1943 Hitler s army had rebuilt its

Panzer forces after defeat at Stalingrad and retreat from the Caucasus. New types including the Panther, Tiger and Elephant at last added technical superiority to the traditional tactical edge enjoyed by the Panzer divisions. The plan was to begin offensive operations by striking from the north and south to cut off Soviet forces in the Kursk salient. In this book, Soviet military specialist William E. Hiestand explores the armor that met this Panzer force in the biggest tank battle of World War II. The Soviets had benefited from their prodigious production capabilities but the tanks at Kursk varied widely. Still short of tanks, the Soviets also still operated weak T-60 and T-70 light tanks along with the increasingly obsolete KV-1 heavy tank. Significant numbers of Lend Lease tanks also fought, including M3 Lees, Valentines, Stuarts, Churchills and the first Shermans to join the Red Army. The Soviets also benefited from the firepower of the first generation of Soviet self-propelled guns, the SU-76, SU-122 and SU-152. With meticulously researched tank illustrations and rare archive photos, this is an expert account of the Soviet tank forces in the climactic clash on the Eastern Front.

**Typhoon over Moscow** Thomas Broderick, 2005-03-03

During the predawn hours of June 22, 1941, over 3.5 million German troops and thousands of tanks, planes and armored vehicles slammed into the Soviet Union's Western Frontier. Hitler's Operation Barbarossa had begun and stretched on a front spanning nearly 2,000 kilometers from north to south. The opening weeks of the Great Patriotic War, as it is known in Russia, were an unmitigated disaster for the Red Army. Brave soldiers like Lieutenant Alexander Semenov and General Nikolai Petrenko struggled heroically to shore up their country's defenses and halt Germany's three-pronged advance, the center of which was aimed right at the very heart and capital of their beloved motherland, Moscow. With the entire civilian population mobilized, thousands of men, women and children toiled without rest, digging fortifications and deep anti-tank trenches out of the rich black soil of Mother Russia. Industrial workers from across the country labored to create every piece of equipment not already in German hands and shipped them east to the Urals, out of harm's way. Thousands of vital war industries, large and small, sprung up from the frozen earth and within weeks were producing the vital tools needed to bring the fight to the Fascist invaders. As far as the German Army was concerned, the drive east into the depths of Russia was little different from any of her previous conquests. However, true professional soldiers like Colonel Wilhelm Eichorn knew better. Russia was a vast country with an unforgiving climate. If the campaign to destroy the Soviet field army and capture Moscow was not completed before the onset of the next brutal Russian winter, disaster was certain. The annals of history were littered with the wreckage of armies that learned getting into Russia was easy; getting out was not. As fall neared and the German summer successes began to fade, Hitler mustered his forces for one final decisive push to seize Moscow and end the war. Operation Typhoon had begun.
