## **The Ecology Of Reproduction In Wild And Domestic Mammals:**

*The Ecology of Reproduction in Wild and Domestic Mammals* R.M. Sadler, 2012-12-06 49 about six months to well over a year If there is only one part of the year that is favourable such as spring and early summer in the temperate climates then each species must make an evolutionary choice so to speak as to which parts of the reproductive cycle conception gestation lactation or weanin must be protected and which can come in less favourable times of the year The rhesus and langur monkeys of northern India give birth during the time of year when temperatures are hottest and wells and tanks are often dry However gestation and the later months of lactation come during the monsoon season when food and water are abundant In contrast the east African baboons give birth at the beginning of the small rains and gestation and the late part of lactation occur during the six months dry season Whether any pattern of relationship will be found to hold true for other species of primates is still not clear It may be that a wide variety of patterns have evolved depending on the lengths of gestation and lactation and the particular ecological complex in which each species or even subspecies lives pages 503 504

Jonathan Kingdon, 1988-12-29 Detailed anatomical illustrations accompany information on the appearance habits geographical distribution and evolutionary changes of the smaller mammals of Kenya Uganda and Tanzania Bibliogs    **The Wolves of Denali** L. David Mech, 2003-05-01 For more than nine years the wolves in Alaska's Denali National Park were the subject of intense research by a group of renowned scientists led by L David Mech The result of their work is the most comprehensive study of a population of wolves and their prey ever available This accessible fascinating and extensively illustrated book will appeal to researchers general readers and wolf enthusiasts across the world

**The Mammals of Minnesota** Evan B. Hazard,    **Australian Mammal Society**, 1984-06    **Environmental Signal Processing and Adaptation** Gerhard Heldmaier, Dietrich Werner, 2012-12-06 Animals and plants live in changing environmental conditions which require adaptation in order to cope with this Some of these environmental changes serve as signals which have to be sensed and interpreted correctly by the organisms to initiate the adaptation This signal processing is based on biochemical molecular and neuronal processes which are discussed in this book All examples given underline that continuous adjustment of physiological functions is an essential requirement for life and survival in complex changing environments

[National Library of Medicine Current Catalog](#) National Library of Medicine (U.S.), 1969 First multi year cumulation covers six years 1965-70    **Biological Rhythms** Jurgen Aschoff, 2013-03-09 Interest in biological rhythms has been traced back more than 2 500 ears to Archilochus the Greek poet who in one of his fragments suggests i VWO KE o olos pv J tos txv pW7rOVS XH recognize what rhythm governs man Aschoff 1974 Reference can also be made to the French student of medicine J J Virey who in his thesis of 1814 used for the first time the expression horloge vivante living clock to describe daily rhythms and to D

C W Hufeland 1779 who called the 24 hour period the unit of our natural chronology However it was not until the 1930s that real progress was made in the analysis of biological rhythms and Erwin Bunning was encouraged to publish the first and still not outdated monograph in the field in 1958 Two years later in the middle of exciting discoveries we took a breather at the Cold Spring Harbor Symposium on Biological Clocks Its survey on rules considered valid at that time and Pittendrigh's anticipating view on the temporal organization of living systems made it a milestone on our way from a more formalistic description of biological rhythms to the understanding of their structural and physiological basis     *The Evolution of Primate Societies* John C. Mitani, Josep Call, Peter M. Kappeler, Ryne A. Palombit, Joan B. Silk, 2012-10-24 In 1987 the University of Chicago Press published *Primate Societies* the standard reference in the field of primate behavior for an entire generation of students and scientists But in the twenty five years since its publication new theories and research techniques for studying the Primate order have been developed debated and tested forcing scientists to revise their understanding of our closest living relatives Intended as a sequel to *Primate Societies* *The Evolution of Primate Societies* compiles thirty one chapters that review the current state of knowledge regarding the behavior of nonhuman primates Chapters are written by the leading authorities in the field and organized around four major adaptive problems primates face as they strive to grow maintain themselves and reproduce in the wild The inclusion of chapters on the behavior of humans at the end of each major section represents one particularly novel aspect of the book and it will remind readers what we can learn about ourselves through research on nonhuman primates The final section highlights some of the innovative and cutting edge research designed to reveal the similarities and differences between nonhuman and human primate cognition *The Evolution of Primate Societies* will be every bit the landmark publication its predecessor has been     *The Greater Yellowstone Ecosystem* Robert B. Keiter, Mark S. Boyce, 1994-04-05 In 1872 Congress designated Yellowstone National Park as the world's first National Park In this book various experts in science economics and law discuss key resource management issues in the greater Yellowstone ecosystem and how humans should interact with the environment of this area     New Zealand Journal of Zoology, 1987     **A Territorial Antelope: The Uganda Waterbuck** C Spinage, 2012-12-02 A Territorial Antelope The Uganda Waterbuck discusses anatomical physiological and behavioral organization from birth to death of waterbuck Comprised of 12 chapters the book focuses on the function and cause of the waterbuck's territorial behavior After an introduction to the classification distribution and origins of waterbuck the book discusses the topography geology vegetation fauna and methods of evaluation of this species The following chapters focus on the biological aspects of waterbuck including its growth and senescence reproduction and reproductive behavior and parturition and maternal behavior The book also deals with the role of food supply and habitat preference in population density and survival of waterbuck Discussions on the activity rhythm movement reaction to predators and relationships with other species of waterbuck are also included The concluding chapters describe the diverse and complex social organization of this animal These chapters also cover the

territorial concepts and function territorial boundaries and repression of aggression behavior of waterbuck This book is an invaluable source for biologists researchers teachers and students who wish to gain insights on the mechanisms of territorial behavior

[Sexual Selection and the Descent of Man](#) Bernard Campbell,2017-07-12 Just over one hundred and thirty years ago Charles Darwin in The Descent of Man and Selection in Relation to Sex 1871 developed remarkably accurate conclusions about man's ancestry based on a review of general comparative anatomy and psychology in which he regarded sexual selection as a necessary part of the evolutionary process But the attention of biologists turned to the more general concept of natural selection in which sexual selection plays a complex role that has been little understood This volume significantly broadens the scope of modern evolutionary biology by looking at this important and long neglected concept of great importance In this book which is the first full discussion of sexual selection since 1871 leading biologists bring modern genetic theory and behavior observation to bear on the subject The distinguished authors consider many aspects of sexual selection in many species including man within the context of contemporary evolutionary theory and research The result is a remarkably original and well rounded view of the whole concept that will be invaluable especially to students of evolution and human sexual behavior The lucid authority of the contributors and the importance of the topic will interest all who share in man's perennial fascination with his own history The book will be of central importance to a wide variety of professionals including biologists anthropologists and geneticists It will be an invaluable supplementary text for courses in vertebrate biology theory of evolution genetics and physical anthropology It is especially important with the emergence of alternative explanations of human development under the rubric of creationism and doctrines of intelligent design

[Social Behavior of Female Vertebrates](#) Samuel Wasser,2012-12-02 Social Behavior of Female Vertebrates focuses on the evolution of reproductive behavior in female vertebrates ranging from fish to birds and humans including issues of mate choice and other factors underlying female attitudes toward males It also looks at the evolution of mating systems the co evolution of the sexes sex role reversal reproductive competition between females maternal behavior and how females enhance the investment received by their offspring from others It also considers other social behaviors that influence the nature of affiliative associations between females Organized into three parts encompassing 13 chapters this volume begins with an overview of behavioral biology and sources of variation in female reproductive success It then discusses the establishment and maintenance of sex biases sex differences mediated by sexual selection constraints on female choice in the mottled sculpin mate choice by females in sexual selection of bird song and female manipulation of male avoidance of cuckoldry behavior in the ring dove The reader is also introduced to the evolution of polyandry in shorebirds reproductive strategies in human females social and health seeking behaviors of Taiwanese women female roles in cooperatively breeding acorn woodpeckers altruism in coati bands cooperation and reproductive competition among female African elephants mate choice in matrilineal macaque groups and reproductive competition and cooperation among female yellow baboons This book is a valuable

resource for scientists and behavioral biologists as well as lay people whose interests span a variety of fields      **The Mandrill** Alan F. Dixson,2015-11-12 Living in the remote forests of western central Africa the mandrill *Mandrillus sphinx* is notoriously elusive and has evaded scientific scrutiny for decades Yet it is the largest and most sexually dimorphic of all the Old World monkeys and perhaps the most colourful of all the mammals Synthesising the results of more than twenty five years of research this is the first extensive treatment of the mandrill's reproductive and behavioural biology Dixson explores in detail the role that sexual selection has played in shaping the mandrill's evolution covering mechanisms of mate choice intra sexual competition sperm competition and cryptic female choice Bringing to life through detailed descriptions and rich illustrations the mandrill's communicatory biology and the functions of its brightly coloured adornments this book sheds new light on the evolutionary biology of this fascinating primate

Natural Selection and Social Theory Robert Trivers,2002-09-05 Robert Trivers is a pioneering figure in the field of sociobiology For Natural Selection and Social Theory he has selected eleven of his most influential papers including several classic papers from the early 1970s on the evolution of reciprocal altruism parent offspring conflicts and asymmetry in sexual selection which helped to establish the centrality of sociobiology as well as some of his later work on deceit in signalling sex antagonistic genes and imprinting Trivers introduces each paper setting them in their contemporary context and critically evaluating them in the light of subsequent work and further developments The result is a unique portrait of the intellectual development of sociobiology with valuable insights for evolutionary biology anthropology and psychology      **Australian Mammal Society** ,1985-01      National Agricultural Library Catalog National Agricultural Library (U.S.),1979
