## **The Emergence Of Whiteheads Metaphysics 1925 1929:**

*The Emergence of Whitehead's Metaphysics, 1925-1929* Lewis S. Ford, 1985-06-30 A breathtaking detective story this book charts the adventure of Whitehead's ideas in a remarkably detailed and careful reconstruction of his metaphysical views. Incorporating heretofore unpublished material from students' notes and correspondence, Professor Ford analyzes the order of composition of various portions of Whitehead's books principally *Science and the Modern World*, *Religion in the Making*, and *Process and Reality*. Ford's reconstructive method is perfectly tailored to his subject for Whitehead revised by inserting new material rather than altering or deleting the old. Thus Ford is able to date the sequence of the composition of many passages. In distinguishing these layers of articulation, he has pushed the techniques of higher criticism beyond anything the French structuralists and deconstructionists have dreamed of and chronicled an extraordinary intellectual biography.

**Concerning Creativity** John H. Berthrong, 1998-10-01 This work examines the philosophies and theologies of three thinkers: Chu Hsi, Alfred North Whitehead, and Robert C. Neville, separated by time, space, and culture. In so doing, John H. Berthrong provides a suggestive and successful comparison of creativity as a cross-cultural theme while introducing Neo-Confucianism as a sophisticated dialogue partner with modern Western speculative philosophy and theology. Creativity lies at the heart of the discourse of Chu Hsi (1130-1200) and Alfred North Whitehead. For both, creativity emerges as an attempt to illustrate the organic unity of the world without resorting to an appeal to a source for creativity beyond the concrete actuality of the cosmos. Subtle critics such as Robert C. Neville argue that process thought is fatally flawed because Whitehead separated creativity from the other crucial elements of his system. By interjecting the Chinese Neo-Confucian synthesis of Chu Hsi, it is possible to show how creativity can be re-integrated into process discourse as creative synthesis. [Thinking with Whitehead and the American Pragmatists](#) Brian G. Henning, William T. Myers, Joseph D. John, 2015-04-16 Despite there being deep lines of convergence between the philosophies of Alfred North Whitehead, C. S. Peirce, William James, John Dewey, and other classical American philosophers, it remains an open question whether Whitehead is a pragmatist and conversation between pragmatists and Whitehead scholars have been limited. Indeed, it is difficult to find an anthology of classical American philosophy that includes Whitehead's writings. These camps began separately and so they remain. This volume questions the wisdom of that separation, exploring their connections both historically and in application. The essays in this volume embody original and creative work by leading scholars that not only furthers the understanding of American philosophy but seeks to advance it by working at the intersection of experience and reality to incite novel and creative thought. This exploration is long overdue. Specific questions that are addressed are: Is Whitehead a pragmatist? What contrasts and affinities exist between American pragmatism and Whitehead's thought? What new questions, strategies, and critiques emerge by juxtaposing their distinct perspectives? **Hartshorne, Process Philosophy, and Theology** Robert Kane, Stephen H. Phillips, 1989-01-01 This book provides an introduction to Hartshorne's contributions to contemporary

philosophy and theology It also covers some of the current controversies in philosophy and theology that Hartshorne's contributions have generated The opening chapter is a lucid and penetrating introduction to Hartshorne's thought Some of the following chapters break new ground on issues that have concerned Hartshorne throughout his career the nature and methods of metaphysics the existence and nature of God and the place of religion and metaphysics in the modern world Many chapters survey the current state of controversies on those topics Other chapters relate Hartshorne's work to other traditions and to trends in contemporary philosophy to postmodernism classical Western theism Indian philosophy analytical philosophy and American pragmatism

**Transforming Process Theism** Lewis S. Ford, 2000-05-18 Process theism in a variety of manifestations and modifications stemming from Whitehead's original suggestions dominates discussions of philosophical and natural theology in Europe and America In *Transforming Process Theism* Ford argues that subsequent modifications of Whitehead's original line of thought mask a fundamental and unresolved aporia in that original proposal since only past or objectified determinate events can influence present experiences and since God as conceived by Whitehead is never fully determinate or objectifiable as a past event it is difficult to see how this divine persuasive power can have any influence on the present as a source of creativity and genuinely new possibilities for enactment Ford meticulously reconstructs and evaluates Whitehead's own versions of theism and he critically appraises the most influential subsequent modifications of these unrecognized variants by other process thinkers He recovers the original trajectory of Whitehead's continuous revision of his conception of God and forges an appropriate solution to this central aporia He concludes that consistent with Whitehead's overarching metaphysical principles there is another kind of causal influence that does not require objectification and is the opposite of past determinateness The future conceived as active offers an account of subjectivity which is both universal and transcendent God according to Ford's revisions must be understood as this particular but indefinite creativity or universal activity of the future bestowing subjectivity on each present occasion of experience without ever becoming determinate

Process and Analysis George W. Shields, 2012-02-01 *Process and Analysis* brings together an unprecedented collection of the world's leading contemporary process and analytic philosophers to explore philosophical topics of common interest The contributors examine a wide variety of explicit and implicit commonalities and differences of approach to such central philosophical issues as the nature and status of events time space relations particulars and God This unique collection demonstrates that both traditions have important things to say to one another In fact a largely ignored conversation between the two traditions has been carried on since at least the days of Whitehead's influence on early Cambridge analytic philosophy This long awaited volume is an invaluable research tool for scholars and students alike working in the areas of analytic and process philosophy

Jewish Faith and Modern Science Norbert M. Samuelson, 2008-10-17 In *Jewish Faith and Modern Science* renowned Jewish philosopher and rabbi Norbert Samuelson argues that modern Jewish philosophy has died—that it has failed to address the challenges to traditional beliefs posed by

scientific advances and is therefore no longer relevant to Jews today Samuelson confronts these challenges head on critically reflecting on how all of the forms of contemporary Judaism from orthodox to liberal to secular to new age can address questions raised by the latest scientific advances Considering questions ranging from the existence of the soul to the relationship between God and particle physics to the debate over when life begins and ends Samuelson paves the way for a rebirth of Jewish philosophy applicable to life in the modern world      **The Recovery of Philosophy in America** Thomas P. Kasulis, Robert Cummings Neville, Robert C. Neville, John Edwin Smith, 1997-05-01 This collection of essays by leading American philosophers honors John E Smith a major figure in the struggle for the American profession of philosophy to redefine itself and return to its grander traditions      *The Ethics of Creativity* Brian G. Henning, 2011-12-09 Foreword by Daniel A Dombrowski A central concern of nearly every environmental ethic is its desire to extend the scope of direct moral concern beyond human beings to plants nonhuman animals and the systems of which they are a part Although nearly all environmental philosophies have long since rejected modernity's conception of individuals as isolated and independent substances few have replaced this worldview with an alternative that is adequate to the organic processive world in which we find ourselves In this context Brian G Henning argues that the often overlooked work of Alfred North Whitehead has the potential to make a significant contribution to environmental ethics Additionally inspired by classical American philosophers such as William James John Dewey and Charles Sanders Pierce and environmental philosophers such as Aldo Leopold Peter Singer Albert Schweitzer and Arne Naess Henning develops an ethical theory of which the seminal insight is called The Ethics of Creativity By systematically examining and developing a conception of individuality that is equally at home with the microscopic world of subatomic events and the macroscopic world of ecosystems The Ethics of Creativity correctly emphasizes the well being of wholes while not losing sight of the importance of the unique centers of value that constitute these wholes In this way The Ethics of Creativity has the potential to be a unique voice in contemporary moral philosophy

*Butler on Whitehead* Roland Faber, Michael Halewood, Deena Lin, 2012-03-22 This volume is based on the first set of formal conversations which brings together the dynamic philosophies of two eminent thinkers Judith Butler and Alfred North Whitehead Each has drawn from a wide palette of disciplines to develop distinctive theories of becoming of syntactical violence and creative opportunities of limitation In bringing together internationally renowned interpreters of Butler and Whitehead from a variety of fields and disciplines philosophy rhetoric gender and queer studies religion literary and political theory the editors hope to set a standard for the relevance of interdisciplinary philosophical discourse today This volume offers a unique contribution to and for the humanities in the struggles of politics economy ecology and the arts by reaching beyond their closed circles toward understandings that may serve as the basis for the activation of humanity today Considered together Butler and Whitehead delineate a whole new cadre of approaches to long standing problems as well as never before asked questions in the humanities      *Unearthing the Unknown Whitehead* Joseph Petek, 2024-04-08

Unearthing the Unknown Whitehead argues that it is Alfred North Whitehead's recently published Harvard lectures and not his books that contain the truest record of the development of his philosophy including the false starts and dead ends that the published works obscure. This development could previously only be inferred as taking place in the gaps between books. It thus calls for a complete reconsideration of Whitehead's philosophical corpus. Joseph Petek critically evaluates the accuracy and reliability of the student accounts of Whitehead's recently published Harvard lectures and then examines these notes along with a number of previously unknown essays in order to trace previously unknown aspects of Whitehead's philosophy and the development of his thought. Additionally neglected early letters between Whitehead and Bertrand Russell appear to reveal a precise point at which he began transitioning from his long career in mathematics to a new career in philosophy. Two previously undiscovered essays, *Religious Psychology of the Western Peoples* and *Freedom and Order*, display Whitehead's concern for a creeping hyper nationalism that is intensely relevant in today's political climate along with terminological experiments that stretch our conceptions of Whitehead's philosophy in new directions.

**Dancing with Sophia** Michael Schwartz, Sean Esbjörn-Hargens, 2019-11-01 Explores the philosophical dimensions and implications of integral theory. *Dancing with Sophia* is the first book of essays to focus on the philosophical dimensions and implications of integral theory. A metatheory that organizes first order theories and disciplines into higher order modes of knowing and insight needed to address the complexity of today's world, integral theory has already impacted a wide range of disciplines from psychology to business to religious studies to art. Included here are perspectives by scholars in the continental, comparativist, and process traditions who dive into integral theory's postmetaphysical claims in order to mine, extend, and critique its philosophical merits. On the verge of its own emergence, integral philosophy promotes modes of creative critical thought oriented toward the multidimensional flourishing of planetary well-being, and *Dancing with Sophia* will be of interest to scholars in philosophy, religious studies, transpersonal, developmental, and humanist psychology, and more. Integral theory is a bold and provocative endeavor. It challenges one to think past the norm, to sail beyond the horizon, and risk encountering the Scylla and Charybdis of what is academically acceptable or at least familiar and what is possible in ways that only are now beginning to dawn on both thinking and dwelling. If it is nothing else, integral theory is the movement beyond the purely intellectual into the lived experience. This is its meta-dimension properly understood from the Foreword by Brian Schroeder.

**Process Philosophy and Political Ideology** Randall C. Morris, 1991-01-22 This book fills a significant gap in current process scholarship by providing a detailed exposition of Whitehead's and Hartshorne's social and political writings, reconstructing their ideological commitments in depth and placing them in their historical context. It focuses on four areas of inquiry: the individual and society; the ideals of freedom, equality, and democracy; the use of coercive force within and between societies; and the theory of social progress. As each feature of their political thought is examined, Morris shows how Whitehead's and Hartshorne's political commitments are reflected in their metaphysical principles.

**Individuum, Society, Humankind** Makoto

Ozaki,2021-10-01 In this collection on the Kyoto School of Philosophy the author offers the reader Tanabe's religious philosophy but also and for the first time his philosophy of nature and ontology. It is not only on individual society and humankind but also on the logical structure of Tanabe's thinking and aspects such as nature, beauty, matter, contemplation, practice, politics, religion, science, history, eternity, etcetera. A highly original work, the more as the reader becomes acquainted with Ozaki's own creative synthetic view of the main problems of Christian Buddhist theological and philosophical encounter.

**Ordering of Time** Lucas George Lucas,2020-09-25 What is the history of philosophy? What exactly is this the history of and how is that history to be understood in relationship to philosophy itself? Can philosophy's history on any of a number of diverse descriptions ever be said in its own right to constitute a unique and genuine source of philosophical wisdom or insight? George Lucas sweeps aside the constraints of traditional methodological and cultural boundaries to reflect broadly on a variety of answers to these questions as posed by many of the major philosophical figures of the past century. Inviting a reconsideration of the work of scholars as diverse as Alasdair MacIntyre, Leo Strauss, Jacques Derrida, Michel Foucault, Richard Rorty, Hans Georg Gadamer, Bertrand Russell, Arthur Danto, Martha Nussbaum, Paul Ricoeur, Charles Taylor, Keith Lehrer, and Jerome Schneewind, Lucas ranges widely over the history of philosophy itself in search of original probing answers to these profound and perennial issues.

**The Rehabilitation of Whitehead** George R. Lucas,1989-01-01 Lucas's book competently brings Whitehead's philosophy into dialogue with analytic philosophy. This is a topic of great originality and considerable potential importance for the field of philosophy. The writing is forceful, concise, and clear. George L. Kline, Bryn Mawr College. Lucas treats Whitehead within the framework of major themes in current Anglo-American analytic philosophy, viewed against the backdrop of significant historical trends in European and American thought since the Enlightenment. This most misunderstood of twentieth-century philosophers is critically interpreted here. Whitehead had developed 50 years ago some ideas only now emerging in analytic philosophy. Lucas examines the significance of Whitehead's thought for current epistemology of science, for the anti-foundationalism debate, and more generally for modal logic, action theory, philosophical psychology, and the philosophy of mind. He shows how some recent analytic philosophy is now developing ideas concerning language, personal identity, and other topics that are found in Whitehead. Lucas concludes with recent problems in relativity theory and quantum mechanics, indicating how these bear on the philosophy of science and on the task of forging a comprehensive understanding of nature. He examines the debates concerning Einstein and Whitehead on relativity and analyzes the work of Bohm, Prigogine, and others who have found Whitehead's categories useful for their own success. Whitehead is shown to be a historical figure of great importance, not an idiosyncratic thinker isolated along with a few enthusiastic followers from the mainstream of contemporary philosophy. With Russell, Whitehead participated in the same philosophical world that gave rise to analytic philosophy.

Self, God and Immortality Eugene Fontinell,2018-09-18 Can we who have been touched by the scientific, intellectual, and experimental revolutions of modern and contemporary times still

believe with and degree of coherence and consistency that we as individual persons are immortal Indeed is there even good cause to hope that we are In examining the present relationship of reason to faith can we find justifying reasons for faith These are the central questions in *Self God and Immortality* a compelling exercise in philosophical theology Drawing upon the works of William James and the principles of American Pragmatism Eugene Fontinell extrapolates carefully from data given in experience to a model of the cosmic process open to the idea that individual identity may survive bodily dissolution Presupposing that the possibility of personal immortality has been established in the first part the second part of the essay is concerned with desirability Here Fontinell shows that far from diverting attention and energies from the crucial tasks confronting us here and now such belief can be energizing and life enhancing The wider importance of *Self God and Immortality* lies in its pressing both immortality believers and terminality believers to explore both the metaphysical presuppositions and the lived consequences of their beliefs It is the author s expressed hope that such explorations rather than impeding will stimulate co operative efforts to create a richer and more humane community [The End of Evil](#) Marjorie Hewitt Suchocki,2005-06-16 The topic of evil and redemption has been at the center of the Western tradition since the beginning of the Christian era In *The End of Evil* Suchocki explores the source and end of evil in the thought of Augustine Leibniz Kant Schleiermacher Hegel and Nietzsche Whitehead s philosophy is used as a creative response to the problems and possibilities raised in these earlier developments *Encyclopedia of Religion and Nature* Bron Taylor,2008-06-10 The *Encyclopedia of Religion and Nature* originally published in 2005 is a landmark work in the burgeoning field of religion and nature It covers a vast and interdisciplinary range of material from thinkers to religious traditions and beyond with clarity and style Widely praised by reviewers and the recipient of two reference work awards since its publication see [www.religionandnature.com](http://www.religionandnature.com) ern this new more affordable version is a must have book for anyone interested in the manifold and fascinating links between religion and nature in all their many senses **Applied Process Thought II** Mark Dibben,Rebecca Newton,2013-05-02 Concentrating mainly on the process philosophy developed by Alfred North Whitehead this series of essays brings together some of the newest developments in the application of process thinking to the physical and social sciences These essays by established scholars in the field demonstrate how a wider and deeper understanding of the world can be obtained using process philosophical concepts how the distortions and blockages inevitably inherent in substantivist talk can be set aside and how new and fertile lines of research in the sciences can be opened as a result
