Exiting war Romain Fathi, Margaret Hutchison, Andrekos Varnava, Michael Walsh, 2022-01-18 *Exiting war* explores a particular 1918-20 moment in the British Empire's history between the First World War's armistices of 1918 and the peace treaties of 1919 and 1920 That moment we argue was a challenging and transformative time for the Empire While British authorities successfully answered some of the post war tests they faced such as demobilisation repatriation and fighting the widespread effects of the Spanish flu the racial social political and economic hallmarks of their imperialism set the scene for a wide range of expressions of loyalties and disloyalties and anticolonial movements The book documents and conceptualises this 1918-20 moment and its characteristics as a crucial three year period of transformation for and within the Empire examining these years for the significant shifts in the imperial relationship that occurred and as laying the foundation for later change in the imperial system

global warming is all about the author writes in order to grasp what will happen if we fail to take immediate steps to combat it The book is not a scientific treatise bogged down with academic language but rather a pacifists simple approach to solving one of the worlds most difficult dilemmas Employing a minimum of hard data to explore melting ice caps rising sea levels changing weather patterns and ocean currents Ratzlaff effectively illustrates the cause and effect relationship between human activity and the planets well being While Al Gore answered the hows and whys of global warming in An Inconvenient Truth Ratzlaff illustrates the imminent need for vast governmental and political changes and he explains the consequences of ignoring the obvious threat to our planet The author states that one of the biggest problems with the current approach to global warming is the tendency of advocates to ignore the significant role of population growth Additionally at the roots of global warming lay nationalism religious wars and the military industrial complex Ratzlaff outright blames governments and corporations for the current situation After demonstrating the various successes of the United Nations in heading off global conflicts the author concludes that the UN is the only organization capable of becoming a fully empowered international governing body Yet handcuffed by its current structure it can do nothing more than cast environmental resolutions that are often ignored Unlike other books that attempt to tackle major global issues rather than pointing out the problems and offering no solutions Ratzlaff rounds out each of the seven steps with definitive alternatives in his If I Were President summaries A thorough yet easy to comprehend take on global warming KIRKUS REVIEWS **Ending the U.S. War in Iraq** Richard R. MacKenzie, Nicole Wegner, 2021-11-20 War is a man's game or so goes the saying Whether this is true or not patriarchal capitalism is certainly one of the driving forces behind war in the modern era So can we end war with feminism This book argues that this is possible and is in fact already happening Each chapter provides a solution to war using innovative examples of how feminist and queer theory and practice inform pacifist treaties movements and methods from the international to the domestic spheres The contributors propose a range of solutions that include arms abolition centring Indigenous knowledge economic restructuring and transforming how we count civilian deaths Ending war requires challenging complex structures but the solutions found in this edition have risen to this challenge By thinking beyond the violence of the capitalist patriarchy this book makes the powerful case that the possibility of life without war is real **War and Punishment** H. E. Goemans, 2000-08-20 What makes wars drag on and why do they end when they do Here H E Goemans brings theoretical rigor and empirical depth to a long standing question of securities studies He explores how various government leaders assess the cost of war in terms of domestic politics and their own postwar fates Goemans first develops the argument that two sides will wage war until both gain sufficient knowledge of the other's strengths and weaknesses so as to agree on the probable outcome of continued war Yet the incentives that motivate leaders to then terminate war Goemans maintains can vary greatly depending on the type of government they represent The author looks at democracies dictatorships and mixed regimes and compares the willingness among leaders to back out of wars or risk the costs of continued warfare Democracies according to Goemans will prefer to withdraw quickly from a war they are not winning in order to appease the populace Autocracies will do likewise so as not to be overthrown by their internal enemies Mixed regimes which are made up of several competing groups and which exclude a substantial proportion of the people from access to power will likely see little risk in continuing a losing war in the hope of turning the tide Goemans explores the conditions and the reasoning behind this gamble for resurrection as well as other strategies using rational choice theory statistical analysis and detailed case studies of Germany Britain France and Russia during World War I In so doing he offers a new perspective of the Great War that integrates domestic politics international politics and battlefield developments
