The Engineering Drawings Of Benjamin Henry Latrobe:

The Engineering Drawings of Benjamin Henry Latrobe Benjamin Henry Latrobe, Maryland Historical Society, 1980 Benjamin Henry Latrobe 1764 1820 was one of the founders of the engineering profession in America This book is the first detailed treatment of his engineering projects as well as a pioneering attempt to make available a collection of early American technical drawings The excellence of Latrobe s draftsmanship and the rarity of comprehensive graphic records for early American engineering make this collection a particularly valuable addition to the history of technology **The Engineering Drawings of Benjamin Henry Latrobe** Benjamin Henry Latrobe, 1980 **The Papers of Benjamin Henry Latrobe** Benjamin Henry Latrobe, 1980 **The engineering drawings of Benjamin Henry Latrobe** Darwin H. Sir John Soane? Influence on Architecture from 1791 Oliver Bradbury, 2017-07-05 Sir John Soane s Influence on Architecture from 1791 A Continuing Legacy is the first in depth study of this eighteenth century British architect s impact on the work of others extending globally and still indeed the case over 200 years later Author Oliver Bradbury presents a compelling argument that the influence of Soane 1753 1837 has persevered through the centuries rather than waning around the time of his death Through examinations of internationally renowned architects from Benjamin Henry Latrobe to Philip Johnson as well as a number of not so well known Soanean disciples Bradbury posits that Soane is perhaps second only to Palladio in terms of the longevity of his influence on architecture through the course of more than two centuries from the early 1790s to today concluding with the recent return to pure revivalism Previous investigations have been limited to focusing on Soane s late Georgian and then post modern influence this is the first in depth study of his impact over the course of two centuries Through this survey Bradbury demonstrates that Soane s influence has been truly international in the pre modern era reaching throughout the British Isles and beyond to North America and even colonial Australia Through his inclusion of select detailed case studies Bradbury contends that Soane s is a continuing not negated legacy in architecture

Early American Technology Judith A. McGaw, 2014-01-01 This collection of original essays documents technology s centrality to the history of early America Unlike much previous scholarship this volume emphasizes the quotidian rather than the exceptional the farm household seeking to preserve food or acquire tools the surveyor balancing economic and technical considerations while laying out a turnpike the woman of child bearing age employing herbal contraceptives and the neighbors of a polluted urban stream debating issues of property odor and health These cases and others drawn from brewing mining farming and woodworking enable the authors to address recent historiographic concerns including the environmental aspects of technological change and the gendered nature of technical knowledge Brooke Hindle s classic 1966 essay on early American technology is also reprinted and his view of the field is reassessed A bibliographical essay and summary of Hindle s bibliographic findings conclude the volume The contributors are Judith A McGaw Robert C Post Susan E Klepp Michal McMahon Patrick W O Bannon Sarah F McMahon Donald C Jackson Robert B Gordon Carolyn C Cooper and

The Civil Engineering of Canals and Railways before 1850 Michael M. Chrimes,2017-09-08 Between 1750 and 1850 the British landscape was transformed by a transport revolution which involved engineering works on a scale not seen in Europe since Roman times While the economic background of the canal and railway ages are relatively well known and many histories have been written about the locomotives which ran on the railways relatively little has been published on how the engineering works themselves were made possible This book brings together a series of papers which seek to answer the questions of how canals and railways were built how the engineers responsible organised the works how they were designed and what the role of the contractors was in the process **The Papers of Thomas Jefferson, Volume 39** Thomas Jefferson,2018-06-05 This volume opens on 13 November 1802 when Jefferson is in Washington and closes on 3 March 1803 the final day of his second year as president The central issue of these months is the closing of the right of deposit at New Orleans an act that threatens the economic wellbeing of Westerners Jefferson asks his old friend Pierre Samuel du Pont de Nemours to remind the French government of the strong friendship between the two nations To disarm the political opposition the president sends James Monroe who is respected by the Federalists to Europe as a special envoy to work with Robert Livingston in negotiating the dispute with France Jefferson proposes a bargain that will result in the acquisition of the Louisiana Territory In a confidential message to Congress Jefferson seeks 2 500 to send a small party of men to explore the Missouri River Congress concurs and Jefferson s secretary Meriwether Lewis will lead the expedition Settling the boundaries with Native American lands is a major theme of the volume In reality settling results in major cessions of Indian lands to the American government During the months of this volume Jefferson never leaves the capital even for a brief sojourn at Monticello He does however enjoy a visit of six weeks from his daughters and two of his grandchildren They participate in Washington society capture the affection of Margaret Bayard Smith and brighten Jefferson s days
