**Subnuclear Physics, the First 50 Years: Highlights From Erice To Eln** O Barnabei, P Pupillo, Fabio Roversi Monaco, Antonino Zichichi, 2000-08-04 For the Galvani Bicentenary Celebrations the University of Bologna and its Academy of Sciences singled out subnuclear physics as the field of scientific research to be associated with this important event as it would best illustrate for the new generation of students the challenge inherent in fundamental sciences Subnuclear physics was born 50 years ago and has represented ever since the new frontiers of Galilean science In his opening lecture delivered on the first day of the new academic year Professor Antonino Zichichi analytically reviewed the basic conceptual developments and main discoveries achieved in subnuclear physics during the last 50 years Given the importance of this field of fundamental research Professor Zichichi was invited to expand the contents of his lecture into a book and the outcome is this invaluable volume **Formation And Evolution Of Black Holes In The Galaxy: Selected Papers With**

**Commentary** Hans A Bethe, Gerald E Brown, Chang-hwan Lee, 2003-03-04 In published papers H A Bethe and G E Brown worked out the collapse of large stars and supernova explosions They went on to evolve binaries of compact stars finding that in the standard scenario the first formed neutron star always went into a black hole in common envelope evolution C H Lee joined them in the study of black hole binaries and gamma ray bursts They found the black holes to be the fossils of the gamma ray bursts From their properties they could reconstruct features of the burst and of the accompanying hypernova explosions This invaluable book contains 23 papers on astrophysics chiefly on compact objects written over 23 years The papers are accompanied by illuminating commentary In addition there is an appendix on kaon condensation which the editors believe to be relevant to the equation of state in neutron stars and to explain why black holes are formed at relatively low masses

**Creation Of Quantum Chromodynamics And The Effective Energy, The: In Honour Of A Zichichi On The Occasion Of The Galvani Bicentenary Celebrations** L N Lipatov, Gabriele Veneziano, Gerard 't Hooft, Vladimir N Gribov, Victor F Weisskopf, 2001-01-03 UNDER THE SPELL OF THE GAUGE PRINCIPLE by G t Hooft The University of Bologna and its Academy of Sciences in collaboration with the Italian National Institute for Nuclear Physics and the Italian Physical Society celebrated in 1998 the bicentenary of a great pioneer in the field of electric phenomena Luigi Galvani the father of macroelectricity During these two centuries the physics of electric phenomena has given rise first to the Maxwell equations then to quantum electrodynamics and finally to the synthesis of all reproducible phenomena the Standard Model A cornerstone of the Standard Model is quantum chromodynamics QCD which describes the interaction between quarks and gluons in the innermost part of the structure of matter The discovery of QCD will be recalled in the future as one of the greatest achievements of mankind Many physicists the world over have contributed to its creation on both the experimental and the theoretical front Professor Antonino Zichichi has played an important role in this scientific venture as documented by his works which are reproduced in this invaluable volume One of the founders of European physics Professor Victor F Weisskopf contributes with his memories of the time when QCD had many problems This volume owes its existence to a founding father of QCD Professor Vladimir N Gribov whose sudden demise prevented him from directly contributing to its final edition Two world leaders in subnuclear theoretical physics Professors Gerardus t Hooft and Gabriele Veneziano illustrate the significance of the contributions of Antonino Zichichi in QCD

From the Preshower to the New Technologies for Supercolliders Bjørn H. Wiik, 2002 In the year 2000 the city of Bologna was the European Capital for Culture For this reason the University of Bologna and its Academy of Sciences following the Guglielmo Marconi Centenary and the Luigi Galvani Bicentenary Celebrations decided to call attention to the major achievements of their most distinguished members in science and technology This invaluable volume presents a series of inventions and technological developments some thought of and directly implemented by Professor Antonino Zichichi others suggested and developed under his leadership all of them having contributed to the discovery of new particles and new phenomena in the field of subnuclear physics The book was

conceived by an eminent scientist Professor Dr Björn H Wiik Director of Germany's most prestigious physics laboratory DESY Hamburg It would not be published were it not for Professor Dr Albrecht Wagner Chairman of the DESY Board of Directors and Dr Horst Wenninger from CERN Geneva the greatest European physics laboratory
