Sitar Technique In Nibaddha Forms:

Sitār Technique in Nibaddh Forms Stephen Slawek, 1987-01-01 Students of Indian music are well aware of the emphasis their gurus place on the development of correct technique through rigorous practice This book focuses on sitar technique and shows how that technique comes into play during the improvisatory music making endeavours of master sitarists A series of systematic descriptions and analyses reveals how instrumental technique acts as a generative structure at the broad level and provides a corpus of factors of variation at the specific level A unique feature of this study is the inclusion of musical transcriptions detailing not only the line of melody but also the physical gestures techniques necessary to produce melody Though technically complex in appearance these transcriptions and the accompanying analyses provide valuable information to students interested in learning Sitar and to musicologists and ethnomusicologists inquiring into the basic improvisational processes that underlie contemporary styles of Sitar performance Semiosis in Hindustani Music José Luiz

Martinez, 2001-01-01 For thousands of years music in India has been considered a signifying art Indian music creates and represents meanings of all kinds some of which extend outwardly to the cosmos while others arise inwardly in the refined feelings which a musical connoisseur experiences when listening to it In this book the author explores signification in Hindustani classical music along a two fold path Martineq first constructs a theory of musical semiotics based on the sign theories of Charles Sanders Peirce He then applies his theory to the analysis of various types of Hindustani music and how they generate significations The author engages such fundamental issues as sound quality raga tala and form while advancing his unique interpretations of well known semiotic phenomena like iconicity metalanguage indexicality symbolism Martinez s study also provides deep insight into semiotic issues of musical perception performance scholarship and composition An specially innovative and extensive section of the book analyzes representations in Hindustani music in terms of the Indian aesthetic theory of rasa The evolution of the rasa system as applied to musical structures is traced historically and analyzed semiotically In the light of Martinez s theories Hindustani music reveals itself to be both a delightfully sensuous and highly sophisticated system of acoustic representations **The Dictionary of Hindustani Classical Music**
