The Internet has opened up many freelance opportunities expanded available markets and has contributed to service sector growth in many economies. Offshore outsourcing online outsourcing and crowdsourcing are heavily reliant on the Internet to provide economical access to remote workers and frequently leverage technology to manage workflow to and from the employer. Much computer freelance work is being outsourced to developing countries outside the United States and Europe. Freelance marketplaces provide a marketplace for freelancers and buyers. Service providers or sellers create a profile where they include a description of the services they offer examples of their work and in some cases information about their rates. Buyers register and complete a basic profile and then post projects outlining their requirements. Buyers will then bid for these projects on a fixed price or hourly basis.
