Sixth Column Also Released As The Day After Tomorrow:

Transformations Mike Ashley, 2005-02-01 This is the second of three volumes which chart the history of the science fiction magazine from the earliest days to the present. The first volume *Time Machines* traced the development of the sf magazine from its earliest days and the creation of the first specialist magazine *Amazing Stories*. *Transformations* takes up the story to reveal a turbulent period that was to witness the extraordinary rise and fall and rise again of science Britain's foremost sf historian Mike Ashley charts the sf boom years in the wake of the nuclear age that was to see the Golden Age of Science Fiction with the emergence of magazines such as *Galaxy*, *Startling Stories* and *Fantastic* as well as authors like Isaac Asimov, Philip K. Dick and Frank Herbert. He then goes on to explore the bust years of 1954-1960 followed by the renaissance in the 1960s led by the new wave of British authors like Michael Moorcock and J. G. Ballard and the rise in interest of fantasy fiction encouraged by *Lord of the Rings* and the Conan books of Robert E. Howard. *Transformations* concludes with an examination of the new found interest in sf magazines during the late 1960s and the incredibly influential roles *Star Trek*, the film *2001: A Space Odyssey* and above all the first manned Moon landing played in transforming the sf magazine.

To Seek Out New Worlds J. Weldes, 2003-05-01 This volume explores the science fiction world politics intertext. Through detailed analyses of such texts as *Blade Runner*, *Stalker*, *Star Trek* and *Buffy the Vampire Slayer*, the chapters in this volume examine the complex and sometimes contradictory relations between world politics both as discipline and as practice and discourses of science fiction. Offering a novel combination of popular culture analysis with major theoretical and empirical issues concerning world politics, *Science Fiction and World Politics* provides insights into the discursive constitution of both science fiction and world politics while highlighting the occasional challenges that the science fiction world politics intertext launches at our common sense.

Encyclopedia of Science Fiction Don D'Ammassa, 2015-04-22 Presents articles on the science fiction genre of literature including authors, themes, significant works and awards.

Religion in Science Fiction Steven Hrotic, 2014-07-31 *Religion in Science Fiction* investigates the history of the representations of religion in science fiction literature. Space travel, futuristic societies and non-human cultures are traditional themes in science fiction. Speculating on the societal impacts of as yet undiscovered technologies is after all one of the distinguishing characteristics of science fiction literature. A more surprising theme may be a parallel exploration of religion, its institutional nature, social functions and the tensions between religious and scientific worldviews. Steven Hrotic investigates the representations of religion in 19th-century proto-science fiction and genre science fiction from the 1920s through the end of the century. Taken together, he argues that these stories tell an overarching story, a metanarrative of an evolving respect for religion paralleling a decline in the belief that science will lead us to an ideal and religion-free future. Science fiction's metanarrative represents more than simply a shift in popular perceptions of religion; it also serves as a model for cognitive anthropology, providing new insights into how groups and identities form in a globalized world and into

The Subject of Race in American Science Fiction Sharon DeGraw, 2006-12-19 While the connections between science fiction and race have largely been neglected by scholars racial identity is a key element of the subjectivity constructed in American SF In his Mars series Edgar Rice Burroughs primarily supported essentialist constructions of racial identity but also included a few elements of racial egalitarianism Writing in the 1930s George S Schuyler revised Burroughs' normative SF triangle of white author white audience and white protagonist and promoted an individualistic highly variable concept of race instead While both Burroughs and Schuyler wrote SF focusing on racial identity the largely separate genres of science fiction and African American literature prevented the similarities between the two authors from being adequately acknowledged and explored Beginning in the 1960s Samuel R Delany more fully joined SF and African American literature Delany expands on Schuyler's racial constructionist approach to identity including gender and sexuality in addition to race Critically intertwining the genres of SF and African American literature allows a critique of the racism in the science fiction and a more accurate and positive portrayal of the scientific connections in the African American literature Connecting the popular fiction of Burroughs the controversial career of Schuyler and the postmodern texts of Delany illuminates a gradual change from a stable essentialist construction of racial identity at the turn of the century to the variable social construction of poststructuralist subjectivity today
