Strategic Planning For Technology Industries:

Strategic Planning for Technology Industries Philip M. Sherman, 1982 **Strategic Planning Decisions in the High Tech Industry** Dilek Cetindamar, Tugrul Daim, Berna Beyhan, Nuri Basoglu, 2013-02-05 The scale and complexity of research and practices of open innovation mandate a correspondingly sophisticated form of decision making Strategic Planning Decisions brings together a number of tools that ease the decision process in technology companies providing both conceptual frameworks and practical applications Innovative approaches are presented such as an ontology based model where all the relevant aspects of a potential technology are interrelated to provide a comprehensive and logically connected data pool for decision makers Divided into two sections Strategic Planning Decisions describe both strategic approaches using the decision tools and tactical approaches Some of these tools are expanded while some others are embedded in a model that will lay the ground for practical application These include bibliometric analysis ontology roadmapping lead user six sigma and multi actor multi objective decision making methods Recent research and relevant theory are balanced with up to date practical applications and hands on techniques making Strategic Planning Decisions ideal for engineers who wish to keep up to date with current ideas in the field of TM It also provides workable methods for practising managers from all levels who wish to apply a more rigorous approach in their work and consultants concerned with technology assessment and its management **The Development of High Technology Industries** Michael J Breheny, Ronald Mcquaid, 2018-03-22 This book originally published in 1988 reviews the development of high technology industries at global and selected national and local levels providing a unique insight into reasons for and consequences of such modern industrial development It appraises government policies for assisting the development of this sector and focuses on the fact that high tech industry tends to be concentrated in particular regions of countries which attain the status of successful populations High technology industry seems to offer little benefit to declining manufacturing areas and the book offers explanations for these regional concentrations and assesses the likely consequences Technology and Strategy Richard A. Goodman, Michael W. Lawless, 1994-10-06 In today's complex dynamic competitive landscape management of technology can mean the difference between success and failure Managers and researchers alike need effective ways to conceptualize and develop technology strategies Richard Goodman and Michael Lawless provide tools needed to integrate firms technology capabilities with their competitive direction Technology and Strategy presents models that help put technology and its market impacts into perspective It addresses the broad questions of how technology and markets evolve how technology can re order the rules of competition and how it can shift the balance of individual firms competitive advantage It also blends topics currently capturing attention in business circles such as Total Quality Management and the resource based view of the firm into a clear view of technology management programs Technology and Strategy also describes methods to develop specific strategies to cope with challenges facing executives like evaluating promising but untried new technologies Using actual case studies from

the electronics and bio tech industries Goodman and Lawless demonstrate the use of new techniques to formulate strategy including Technology Mapping and the Innovation Audit Both were created to help executives choose the approach to technology best suited to their firms particular capabilities Offering clear practical guidance through a complex fast changing world of competition this new analysis of technology and strategy is a valuable guide for general managers R D and manufacturing managers strategic planners and academics
