China's peaceful rise in the international arena *The "third" United Nations* Tatiana Carayannis, Thomas G. Weiss, 2021

People often refer to the United Nations but without specifying which specific parts are responsible for success or failure. This book explores supportive non-state actors that are essential players in developing global policies and norms alongside the traditional categories of member states: first UN and staff, second UN.

Military Strategy in an Era of Unipolar Demise Håkan Edström, Jacob Westberg, 2024-11-15

This book presents a systematic comparison of the military strategies pursued by five great powers, eight major middle powers, and eight middle powers during the early twenty-first century. In addition to mapping the strategic priorities of these states, the study develops and applies a theoretical framework to explain differences and similarities in their strategic priorities. Moreover, the work evaluates how the stability of the present international system and the US-led liberal international order (LIO) is affected by the strategies pursued by the US and other leading states. The book aims to contribute to previous research in three ways: First, it intervenes in the debate on the stability of the unipolar system and the US-led international order by offering a theoretical framework and an empirical approach for exploring and explaining the strategic priorities and defence strategies of different categories of states. Second, it aims to fill a void in research on strategy: the lack of a comparative and systematic approach to contemporary strategy that facilitates and guides systematic comparisons and analyses of the alignment and military strategies pursued by both major powers and less powerful states. Third, it provides an empirical contribution to the debate on the stability of the unipolar system and the US-led international order by presenting a documentation of the strategic priorities of 21 states based on primary sources consisting of official documents such as national security and defence strategies and defence bills. In the conclusion, the authors summarise the empirical findings on the system level, the regional level, and the unit level and present their overarching conclusions for the whole project. This book will be of much interest to students of military and strategic studies, defence studies, foreign policy, and international relations in general.

[Australia's Defence](#) Peter Dean, Brendan Taylor, Stephan Frühling, 2014-07-18

Almost half a century ago, the Australian National University's TB Millar penned a seminal book on Australian defence policy in the lead-up to the Vietnam War. Today, Australia's defence forces are returning from long conflicts overseas, while the rise of China and the economic integration in the Indo-Pacific presents a complex mix of challenges and opportunities. Drawing inspiration from Millar's original volume, *Australia's Defence: Towards a New Era* brings together leading experts to examine the domestic and international context of Australia's defence policy, Australian strategy, and the size and state of our armed forces. As the country heads towards a new era, this book provides an in-depth overview and key insights into the past, present, and future of Australia's defence.

Rising Powers, Global Governance and Global Ethics Jamie Gaskarth, 2015-02-11

Two of the dominant themes of discussion in international relations scholarship over the last decade have been global governance and rising powers. Underlying both discussions are profound ethical questions about how the world should be ordered, who is responsible for addressing global problems, how change can

be managed and how global governance can be made to work for peoples in developing as well as developed states Yet these are often not addressed or only briefly mentioned as ethical dilemmas by commentators This book seeks to ask critical and profound questions about what relative shifts in power among states might mean for the ethics and practice of global governance Three key questions are addressed throughout the volume Who is rising and how How does this impact on global governance What are the implications of these developments for global ethics Through these questions some of the key academics in the field explore how far debates over global ethics are really between competing visions of how international society should be governed as opposed to tensions within the same broad paradigm By examining how governance works in practice across the Middle East Africa and Asia the contributors to this volume seek to critique the way global governance discourse masks the exercise of power by elites and states both developed and rising This work will be essential reading for all those with an interest in the future of international relations and global governance
