Clark, Rick R. Whitman, Kirk A. Morgan, Scudder D. Mackey, 1980-01-01 **Benthic Foraminiferal Biostratigraphy of the South Caribbean Region** Hans M. Bolli, J. P. Beckmann, J. B. Saunders, 1994-06-16 Benthic foraminifera from the classic southern Caribbean region are presented in this book to provide valuable information on ranges for biostratigraphers working in the region and beyond Around 1000 of the more important species are assembled from the Barremian early Cretaceous to the middle Miocene approximately 120 to 10 million years before the present The deeper water benthic species are tied in to the zonal scheme used in Plankton Stratigraphy published by Cambridge University Press in 1985 The taxa have been brought up to date generically and in many cases new comparisons between species have been made the late Cretaceous and early Paleogene are particularly detailed This information together with detailed illustrations will enable the taxa to be used stratigraphically *Impact Stratigraphy* Alessandro Montanari, Christian Koeberl, 2006-04-10 This book provides a general introduction to impact stratigraphy with emphasis on the recognition of distal impact ejecta in the field by focusing on the impactoclastic layers of the Umbria Marche sequence in Central Italy with an almost perfect stratigraphic record over the last 200 Million years A general introduction to impact cratering and a discussion of distal ejecta and impact layers around the world is followed by a detailed description of the record of the impact of extraterrestrial bodies in sediments of the Umbria Marche Apennines The volume is of interest to a diverse audience in the geological and planetary sciences ranging from upper undergraduate to research level This book can also be used by students and researchers as a field guide to some of the most important Italian impact layers **Automated Stratigraphic Correlation** F.P. Montanari, R. Coccioni, G.S. Odin, 1997-06-18 Integrated stratigraphy is essential for detailed paleoecologic studies of critical intervals in Earth history the calibration of the time scale for global use the establishment of Global Stratotype Sections and Points GSSPs for the definition of chronostratigraphic boundaries This book constitutes an excellent and probably unique example of how interdisciplinary stratigraphic and geochronologic studies are approached with modern methodologies and techniques It

contains numerous unpublished accurate radioisotopic dates of volcano sedimentary layers interbedded in fossiliferous marine and continental Miocene sequences representing Mediterranean and Pacific environments New extremely detailed paleontologic data which constitute the basis for an accurate definition of the Miocene biostratigraphy and the study of the ecologic evolution of Miocene marine environments are also included The chapters are complimented by black and white photographs graphic figures and tables Stratigraphers paleontologists and sedimentologists plus geologists working in oil companies will certainly find this work of interest
