Strengthening Nuclear Nonproliferation:

Strengthening Nuclear Nonproliferation Kathleen C Bailey, 2019-06-26 This book examines the components of the nuclear non proliferation regime and policies which have been suggested as means to strengthen it It discusses alternatives that might lower the likelihood of further proliferation and help reduce the nuclear arms and capabilities of proliferant states

Strengthening U.S.-Russian Cooperation on Nuclear Nonproliferation Russian Academy of Sciences, Russian Committee on Strengthening U.S. and Russian Cooperative Nuclear Nonproliferation, National Research Council, Policy and Global Affairs, Development, Security, and Cooperation, U.S. Committee on Strengthening U.S. and Russian Cooperative Nuclear Nonproliferation, 2005-10-07 Strengthening U S Russian Cooperation on Nuclear Nonproliferation Recommendations for Action offers the consensus findings and recommendations of a joint committee established by the U S National Academies and the Russian Academy of Sciences to identify methods of improving the ongoing cooperation between the two nations in this area The report finds that the best way to realize the enormous potential of the U S Russian relationship on nuclear nonproliferation is to reinvigorate the relationship between the two governments as a true partnership It recommends that the U S and Russia establish a Joint High Level Commission of government and non government experts to assess their cooperation and devise a strategic plan for moving forward It suggests that the Senior Interagency Group that was recently established by the two presidents be empowered to carry out this strategic plan The report then examines three issue areas making specific recommendations in each law and taxation program organization and management and scientific and technical cooperation

Strengthening the Nuclear Nonproliferation Regime Paul Vorbeck Lettow, 2010 Nuclear technology has long been recognized as capable of both tremendous benefits and tremendous destruction With this in mind countries have devised international arrangements intended to promote peaceful nuclear applications while preventing the spread of materials equipment and technologies useful for producing nuclear weapons Today however it is clear that this global nonproliferation regime is falling short North Korea withdrew from the Nuclear Nonproliferation Treaty NPT in 2003 and has since tested two nuclear devices Iran while still a party to the NPT has developed the capacity to enrich significant amounts of uranium many believe it is seeking to build nuclear weapons or at least attain the ability to do so In addition there is the challenge of facilitating the expansion of nuclear energy something that could help reduce carbon emissions while preventing countries from using related technologies for military purposes Finally the prevalence of nuclear materials only intensifies the fear that terrorist groups could acquire them through theft or a deliberate transfer from a state Given these challenges it is fitting that nuclear issues are near the top of today s foreign policy agenda President Barack Obama organized a nuclear security summit in April to discuss ways to secure nuclear materials and reduce the threat of terrorism and NPT signatories will gather in May for the five yearly NPT review conference The United States and Russia have reached a successor agreement calling for further reductions in their nuclear arsenals And the United States and others continue to pursue both

sanctions and negotiations with the aim of limiting Iran's nuclear capabilities In this Council Special Report Paul Lettow examines the shortcomings of the nonproliferation regime and proposes a comprehensive agenda to shore it up He first explores the challenges facing current arrangements chief among them the spread of enrichment and reprocessing technologies needed to produce fissile material Lettow then makes a variety of recommendations First he calls for tighter sanctions on Iran with the goal of dissuading it from continuing its nuclear advances and discouraging others from following Tehran's path To combat the spread of enrichment and reprocessing the report urges the United States to lead nuclear suppliers in developing a system that would allow the sale of relevant equipment and technology only to countries that meet demanding criteria As regards a potential multilateral nuclear fuel bank the report argues for limiting participation to states that have a strong nonproliferation record and agree not to make their own nuclear fuel Lettow further recommends a larger budget more authority and various policy changes for the International Atomic Energy Agency so that it can better detect dangerous violations of nonproliferation agreements Finally he urges a series of steps in the United Nations Security Council to punish violators and deal with countries that seek to withdraw from the NPT while in noncompliance with their obligations Strengthening the Nuclear Nonproliferation Regime provides an authoritative look at today's nuclear related concerns and what can be done to address them With its thoughtful analysis and comprehensive recommendations it makes a strong contribution on a subject of vital importance And given the challenges now testing the nonproliferation regime as well as the issue's prominence in the foreign policy debate the report could not come at a better time
