Strengthening The Poor What Have We Learned:

Strengthening the Poor John Prior Lewis, 1988 A veritable treasure trove Newsletter of the International Center for Economic Growth Network Viewing strengthening the poor as encompassing both top down and ground up approaches Lewis sets out an array of lessons about poverty alleviation and the empowerment of the poor that he finds in the experiences of the 1970s and 1980s These are lessons involving poverty aspects of agricultural and rural development human resource development and institution building the interplay of environment and development the effects of the market the roles of local groups and governments financing development at the local level the limitations of project aid as conventionally practiced wholesaling versus retailing roles for aid donors the comparative advantage and limitations of non governmental organizations NGOs antipoverty politics in developing countries and the proper accommodations that adjustment programs need to incorporate A distinguished group of co authors reacts to these propositions on the basis of diverse sectoral country and regional expertise

U.S. Development Aid--An Historic First Samuel Hale Butterfield, 2004-08-30 The first comprehensive account of U S development aid policies and implementation operations in Africa Asia and Latin America this work is a unique contribution to world history and to the extensive literature on Third World development Butterfield begins with the remarkable story of why in 1949 President Truman surprised Americans with his unprecedented development aid policy He then describes the major alterations in U S development aid strategy and operations from 1950 to 2000 Drawing upon his long experience both in Washington and in country aid missions Butterfield puts a human face on the story by weaving real world vignettes into his narrative The survey addresses the role of Congress important program foundations established in the 1950s creative initiatives of the 1960s frustrated promises in Vietnam It explores the Third World s unexpected population explosion America s evolving technical assistance work in the core sectors such as agriculture education health and administration and initiatives to reach the rural poor and promote the development role of women It also comments upon linkages between policy dialogue and financial aid to promote market oriented policy reforms Africa s lagging development and the decline of U S development aid in the 1990s

The Design and Management of Poverty Reduction Programs and Projects in Anglophone Africa Michael Bamberger, Abdullahi Mohamed Yahie, George Matovu, 1996-01-01 This timely report presents a comprehensive view of the challenges of reconstruction facing the Bosnian authorities during the next three years acknowledges the considerable difficulties in implementing their agenda and points to the actions requiring the most urgent attention in the coming months The report prepared for the second donors conference jointly sponsored by the European Union and the World Bank in April 1996 serves two purposes First it presents a framework for understanding the challenges facing Bosnia in the critical period ahead as it attempts simultaneously to rebuild its economy strengthen economic management and make the transition from a planned to a market economy Second it outlines background information on the new state and entity structures that have emerged since the signing of the Dayton and Paris

peace accords The report describes Bosnia s current macroeconomic situation policies and recent economic performance and articulates policy options for structural reforms in the public sector and in the enterprise and banking systems **Access to Basic Infrastructure by the Urban Poor** Aurelio Menéndez,1991 This report documents discussions on urban poverty issues in the developing countries of Latin America Africa and Asia related to the urban poor s access to basic infrastructure services Basic infrastructure services are services that allow the urban poor to live under conditions that facilitate their income generating activities so they can maintain a good nutritional level and participate in the normal activities of society Services include housing transportation water sanitation solid waste disposal and energy for cooking and lighting In addition to discussing ways to improve the conditions of the poor in urban areas through the provision of basic infrastructure services the workshop also laid the groundwork for follow up regional senior policy seminars in Latin America Africa and Asia While workshop participants did not attempt to conclude with formal policy recommendations they did develop general areas of consensus The focus of the workshop discussions were on the following concerns financial issues the role of nongovernmental organizations the role of governments and the relationship between nongovernmental organizations and the governments Poverty, Natural Resources, and Public Policy in Central America Sheldon Annis, Suggests specific guidelines for linking responsible environmental management and economic development Includes proposals for international peace parks fostering conservation institutions and modifying nontraditional agricultural exports Handbook of Latin American Studies v 57 **Environment and the poor development** H. Jeffrey Leonard,1989-01-01 This volume one of the ODC s U S Third World Policy Perspectives series offers useful steps for policymakers concerned with the critical challenges of integrating environment and development concerns Jessica Tuchman Matthews World Resources Institute Six out of every ten of the world s people are being inexorably pushed by agricultural modernization and continuing high population growth rates into ecologically vulnerable environments tropical forests dryland and hilly areas and the fringes of great urban centers Unless development strategies support their capabilities to ensure their own survival the 470 million people living in these vulnerable areas will be forced to meet their short term need to survive at the cost of long term ecological sustainability and the well being of future generations In response to these startling statistics the authors call for new policies and new forms of collaboration among participants at the local national and international levels They offer practical and stimulating recommendations to bring together population planners water engineers health professionals bankers among others to find solutions to both poverty and environmental problems **Non-governmental Organizations and Natural Resource Management in Africa** T. R. Ramanathan,1992 Sustainable Development and Economic Growth in the Third World United States. Congress. Joint Economic Committee. Subcommittee on Technology and National Security,1990 **Non-Governmental Organisations - Performance and Accountability** Michael Edwards,David Hulme,2014-03-18 The last decade has seen some significant changes in international development and in the status of non

governmental organisations operating in the field Not only has the number of NGOs virtually doubled many of them have seen a considerable growth in their budgets and have grown closer to governments and official aid agencies NGOs are acknowledged by many to be more effective agents of development than governments or commercial interests even as a magic bullet for development problems Despite these positive trends the real impact of the NGO sector is not well documented This is partly because NGO performance assessment and accountability methods are weak and partly because NGOs are caught up increasingly in the world of official aid which pushes them towards certain forms of evaluation at the expense of others This unique book takes a hard and critical look at these issues and describes how NGOs can and must improve the way they measure and account for their performance if they are to be truly effective **After the Wars**

Anthony Lake, 1990-01-01 The end of the Cold War is reverberating far beyond its European theatre in the killing fields of Afghanistan Indochina Central America Southern Africa for others it is in sight But beyond peacemaking lie the delicate challenges of peacekeeping 16 million refugees battered people towns a generation of unschooled youth countrysides planted with explosives teeming cities lacking in jobs essential services In this the sixteenth volume in ODC's U S Third World Policy Perspective series the authors provide valuable timely analysis of the differing problems of polity economy confronting the governments of these devastated countries In short Cyrus R Vance calls it a stimulating provocative book
