US Navy Ships vs Japanese Attack Aircraft Mark Stille, 2020-09-17 The striking power of the Imperial Japanese Navy s carrier based attack aircraft was established at Pearl Harbor and the IJN s carrier based torpedo and dive bombers showed their prowess again at the Battle of Coral Sea when they sank the US Navy carrier USS Lexington and damaged the carrier USS Yorktown Even at the disastrous Battle of Midway the relatively small number of IJNAF attack and torpedo bombers that were launched against the US fleet proved that they remained a potent force by heavily damaging Yorktown again which allowed an IJN submarine to sink the carrier At Guadalcanal IJNAF carrier based aircraft sank the carrier USS Hornet and badly damaged USS Enterprise twice However throughout 1942 US Navy ship defences brought down an increasing number of attacking IJNAF aircraft The final major battle of the year the Battle of Santa Cruz exacted crippling losses on the IJN setting the stage for the eclipse of the IJNAF s highly trained and effective aviation attack forces Packed with illustrations and contemporary photographs this engrossing volume details the design tactics and operational records of both the US Navy ships and the IJNAF aircraft which attacked them over the year following Pearl Harbor Midway Mark Stille, 2024-09-12 A detailed re examination of Midway one of the most significant battles in the Pacific Theater of World War II In April 1942 the Combined Fleet of the Imperial Japanese Navy was at the zenith of its power It had struck a severe blow against the US Navy at Pearl Harbor in December 1941 before spearheading the Japanese advance through Southeast Asia and rampaging across the South Pacific Only a few months later in June 1942 the US Navy managed to inflict a decisive defeat on this mighty force off Midway Atoll and the strategic initiative in the Pacific Theater passed to the US Navy Midway is the most famous naval battle of the Pacific War and one of the most mythologized The traditional view of the battle popularized in its immediate aftermath and surviving through to the present day is of a heavily outnumbered American force snatching victory in the face of overwhelming odds This view is simplistic and in many respects wrong Pacific War expert Mark Stille provides a detailed analysis of this pivotal battle and argues that Midway was neither a miraculous American victory nor a product of good fortune but that the plans personalities doctrines ships and weapons of the two sides meant

that a Japanese defeat was the more likely outcome This new study provides an unparalleled level of insight and thorough analysis into one of the decisive moments of the Pacific War **Special Air Warfare Tactics** United States. Department of the Air Force,1966 **China's Military Power** Roger Cliff,2015-09-15 Once termed the world s largest military museum the Chinese military has made enormous progress over the past twenty years With skyrocketing military budgets and new technology China s tanks aircraft destroyers and missile capabilities are becoming comparable to those of the United States If these trends continue how powerful will the Chinese military be in the future Will its capabilities soon rival or surpass those of the United States The most comprehensive study of its kind this book provides a detailed assessment of China s military capabilities in 2000 and 2010 with projections for 2020 It is the first of its kind in outlining a rigorous theoretically and empirically grounded framework for assessing military capability based on not just weaponry but also doctrine training equipment and organizational structure This framework provides not only the most accurate assessment of China s military to date but an important new tool in the study of military history Fighting Techniques of Naval Warfare Iain Dickie,2009-06-09 An illustrated exploration of how sea battles have been fought throughout history explores key tactics and strategies while surveying how the development of various weapons impacted naval warfare **Tactical Air Command and Control Specialist (AFSC 27550)** Alan F.
